Advances in Computer Science for Engineering and Manufacturing OECD Publishing

This comprehensive book presents emerging research findings and promising reform practices in the field of teacher education, curriculum, assessment, teaching and learning approaches, pedagogical innovations, and professional development in educating the next generation of globally competent students. It reflects the current trends and highlights contemporary teacher education programs

in twenty greater Asian countries and regions. It offers insight into improving teacher education in Singapore, Malaysia, Thailand, Philippines, Vietnam, Cambodia, Laos, Myanmar, Indonesia, Brunei, India, Pakistan, Bangladesh, Bhutan, China, Korea, Taiwan, Japan, Hong Kong, and Macau. The handbook contains chapters written by experienced international teacher educators who draw on their experience and expertise to perennial issues and formidable challenges in teacher preparation and meaningful school reforms. This volume is a valuable resource and essential companion for teacher educators, faculty members, staff developers, trainee teachers,

undergraduate and postgraduate students, researchers, school leaders, policy-makers, and professional learning communities to refresh their knowledge and improve their understanding. This book is a must-read for anyone interested in evolving issues in teacher education. Assessment, Restoration and Reclamation of Mining Influenced Soils covers processes operating in the environment as a result of mining activity, including the whole spectra of negative effects of anthropopressure and the environment, from changes in soil chemistry, changes in soil physical properties, geomechanical disturbances, and mine water discharges. Mining activity and its waste are an environmental concern. Knowledge of the fate of potentially harmful elements and their effect on plants and the food chain, and ultimately on human health, is still being understood. Therefore, there is a need for better knowledge on the origin, distribution, and management of mine waste on a global level. This book provides information on hazard assessment and remediation of the disturbed environment, including stabilization of contaminated soils and phytoremediation, and will help scientists and public authorities formulate answers to the daily challenges related to the restoration of contaminated land. Provides a thorough overview of the processes operating on mining-devastated areas, as well as origin, distribution, and deactivation of harmful elements Includes outcomes and recommendations of the Global Mining Initiative that are widely regarded as the code of conduct in the minerals industry Contains global case studies that elucidate various aspects of assessment and restoration of mine-contaminated land

Organizational Auditing and Assurance in the Digital Age Springer Nature

The European Conference on e-Learning was established 17 years ago. It has been held in France, Portugal, England, The Netherlands, Greece and Denmark to mention only a few of the countries who have hosted it. ECEL is generally attended by participants from more than 40 countries and attracts an interesting combination of academic scholars, practitioners and individuals who are engaged in various aspects of e-Learning. Among other journals, the Electronic Journal of e-Learning publishes a special edition of the best papers presented at this conference.

The 2017 Survey makes key policy recommendations to secure fiscal sustainability through pension and health care reform. In addition, the Survey

recommends measures to enhance economic growth by boosting investment incentives in human and physical capital. ICTR 2020 3rd International Conference on Tourism Research Frontiers Media SA
The MEGA-GUIDE to 1,355 COLLEGES AND UNIVERSITIES! No one knows colleges better than The Princeton Review! Inside The Complete Book of Colleges, 2017 Edition, you'll find meticulously researched information that will help you narrow the search for the best college for you! Each of the 1,355 user-friendly profiles answers your questions, including: * How much are tuition and other student fees and costs? * What types of financial aid are available, and when are the applications due? * What do admissions officers most look for in test scores and recommendations? * Which majors are the most popular and have the highest enrollment? * What is the housing like, and how accessible is technology on campus? * What are the key campus organizations, athletics, and student activities? * How selective is the school? * Plus! Indexes based on cost, selectivity, and size that will help you narrow your search. Get a leg up on your college search with this easy-to-use, comprehensive, and savvy guidebook from the experts at The Princeton Review. *Technology in Education: Pedagogical Innovations* IGI Global

This book constitutes extended papers from the 4th International Conference on Technology in Education, ICTE 2019, held in Guangzhou, China, in March 2019. The 27 full papers presented in this volume were carefully reviewed and selected from 109 submissions. They are organized in topical sections on blended learning and computer-supported learning; virtual reality, augmented reality and game-based learning; open online courses and open educational resources; teaching and learning analysis and assessment; pedagogical, psychological and cultural issues.

Leadership in Early Education in Times of Change Routledge

This book collects chapters on Aerospace Mechatronics and Control Technology as selected contributions from the 7th Asia Conference on Mechanical Engineering and Aerospace Engineering (MEAE) in 2021. The book focuses on novel techniques for aviation infrastructure in aerospace mechatronics and avionics systems, mechanical engineering in aerospace, and mechanical design and control system domains. The contents make valuable contributions to academic researchers and engineers in the industry. The MEAE 2021 provides a forum to discuss the latest trends and advances in

mechanical engineering and aerospace engineering and related fields, and foster the exchange of ideas and international collaboration in the field.

The Making of a Police Officer Taylor & Francis

This book comprises high-quality refereed research papers presented at the Third International Conference on Computer Science, Engineering and Education Applications (ICCSEEA2020), held in Kyiv, Ukraine, on 21-22 January 2020, organized jointly by National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute", National Aviation University, and the International Research Association of Modern Education and Computer Science. The topics discussed in the book include state-of-the-art papers in computer science, artificial intelligence, engineering techniques, genetic coding systems, deep learning with its medical applications, and knowledge representation with its applications in education. It is an excellent source of references for researchers, graduate students, engineers, management practitioners, and undergraduate students interested in computer science and their applications in engineering and education. Applied Degree Education and the Shape of Things to Come Springer

The importance of effective use of resources within a business is paramount to the success of the business. This includes the effective use of employees as well as efficient strategies for the direction of those employees and resources. A manager's ability to adapt and utilize contemporary approaches for maximizing both individuals and organizational knowledge is essential. The Handbook of Research on Contemporary Approaches in Management and Organizational Strategy is a pivotal reference source that provides vital research on the application of contemporary management strategies. While highlighting topics such as e-business, leadership styles, and organizational behavior, this publication explores strategies for the achievement of organizational goals, as well as the methods of effective resource allocation. This book is ideally designed for academicians, students, managers, specialists, and consultants seeking current research on strategies for the management of people and knowledge within an organization.

Studying for an Early Childhood Degree Princeton Review

Auditing is constantly and quickly changing due to the continuous evolution of information and communication technologies. As the auditing process is

forced to adapt to these changes, issues have arisen that lead to a decrease in the auditing effectiveness and efficiency, leading to a greater dissatisfaction among users. More research is needed to provide effective management and mitigation of the risk associated to organizational transactions and to assign a more reliable and accurate character to the execution of business transactions and processes.

Organizational Auditing and Assurance in the Digital Age is an essential reference source that discusses challenges, identifies opportunities, and presents solutions in relation to issues in auditing, information systems auditing, and assurance services and provides best practices for ensuring accountability, accuracy, and transparency. Featuring research on topics such as forensic auditing, financial services, and corporate governance, this book is ideally designed for internal and external auditors, assurance providers, managers, risk managers, academicians, professionals, and students.

Bioclimatic Approaches in Urban and Building Design Springer Nature

This book explores how social determinants of health (SDH) impact the health of a variety of marginalized demographic groups in the United States. Chapters focus on the 13 groups that research demonstrates are most disadvantaged by SDH and, consequently, who suffer the most from ongoing health disparities in America. This includes Black and Hispanic individuals, the LGBTQIA+ community, women, the elderly, people with disabilities, veterans, and those living in rural areas, among others. Chapters follow a standardized format that makes it easy for readers to focus in on aspects of the subject that are of greatest interest. Each profile begins with a snapshot of that group's current state of health, including the biggest medical concerns and how other determinants of health may play a role. Next, each chapter takes an in-depth look at the four components of SDH: economic factors, educational access and quality, healthcare access and quality, and living environment and social context. Unique problems and possible solutions are explored within each of these four sections. An end-of-volume bibliography and further readings list points readers who wish to continue their investigation of the topic toward additional information. Relying on an interdisciplinary framework, the book incorporates research from diverse fields including public health, feminist theory, critical studies of race and ethnicity, poverty studies, disability studies, aging studies, cultural

competence, legal studies, and global health. In recognition of the reality that health disparities are the result of a complex interplay of forces and structural factors that permeate American culture, analysis extends beyond health and health care to include a broad range of interrelated social, political, economic, and educational components.

Advances in Processing Technology

MAC Prague consulting

This book explores the bioclimatic approach to building design. Constant innovations in the field are evident, including the need to face climate changes and increase the local resilience at different scales (regional, urban, architectural). Differently from other contributions, this book provides a definition of the bioclimatic design approach following a technological and performance-driven vision. It includes one of the largest collection of research voices on the topic, becoming also a critical reference work for bioclimatic theory. It is intended for architects, engineers, researchers, and technicians who have professional and research interests in bioclimatic and in sustainable and technological design issues.

Proceedings of the International Conference on Applied Science and Technology on Social Science 2022 (iCAST-SS 2022) Prof. Dr. Osman Titrek, Prof. Dr. Paulo Alberto da SILVA PEREIRA, Res. Assist. Gozde SEZEN-GULTEKIN

This book gathers the latest advances, innovations, and applications in the field of building design and construction, by focusing on new design solutions for buildings and new technologies creation for construction, as presented by researchers and engineers at the 4th International Conference Building Innovations (ICBI), held in Poltava – Baku, Ukraine – Azerbaijan, on May 19-20, 2022. It covers highly diverse topics, including structures operation, repairing and thermal modernization in existing buildings and urban planning features, machines and mechanisms for construction, as well as efficient economy and energy conservation issues in construction. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.

Blended Learning. New Challenges and Innovative Practices Springer

Physical Modelling in Geotechnics collects more than 1500 pages of peer-reviewed papers written by researchers from over 30 countries, and presented at the 9th

International Conference on Physical Modelling in Geotechnics 2018 (City, University of London, UK 17-20 July 2018). The ICPMG series has grown such that two volumes of proceedings were required to publish all contributions. The books represent a substantial body of work in four years. *Physical Modelling in Geotechnics* contains 230 papers, including eight keynote and themed lectures representing the state-of-the-art in physical modelling research in aspects as diverse as fundamental modelling including sensors, imaging, modelling techniques and scaling, onshore and offshore foundations, dams and embankments, retaining walls and deep excavations, ground improvement and environmental engineering, tunnels and geohazards including significant contributions in the area of seismic engineering. ISSMGE TC104 have identified areas for special attention including education in physical modelling and the promotion of physical modelling to industry. With this in mind there is a special themed paper on education, focusing on both undergraduate and postgraduate teaching as well as practicing geotechnical engineers. Physical modelling has entered a new era with the advent of exciting work on real time interfaces between physical and numerical modelling and the growth of facilities and expertise that enable development of so called 'megafuges' of 1000gtonne capacity or more; capable of modelling the largest and most complex of geotechnical challenges. *Physical Modelling in Geotechnics* will be of interest to professionals, engineers and academics interested or involved in geotechnics, geotechnical engineering and related areas. The 9th International Conference on Physical Modelling in Geotechnics was organised by the Multi Scale Geotechnical Engineering Research Centre at City, University of London under the auspices of Technical Committee 104 of the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE). City, University of London, are pleased to host the prestigious international conference for the first time having initiated and hosted the first regional conference, Eurofuge, ten years ago in 2008. Quadrennial regional conferences in both Europe and Asia are now well established events giving doctoral researchers, in particular, the opportunity to attend an international conference in this rapidly evolving specialist area. This is volume 1 of a 2-volume set. *Handbook of Research on Teacher Education* Academic Press

This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

[The Complete Book of Colleges, 2017 Edition](#) Springer Nature

The proceedings of the 3rd International Conference on Health, Technology, and Life Science (ICO-HELICS 2022) shared ideas, pre-clinical and clinical research results, and literature review, on various aspects of medical science including heart disease, stroke, cancers, vaccines, infections, immunological disease, reproductive health, pharmacology and other health diseases. The proceedings aim to deliver new insights to the knowledge and practice of health workers and equip them in providing the best quality health care and clinical outcomes.

As the idea of advanced clinical research originated from basic or fundamental research, it explores the life processes that are universal in their application to scientific knowledge. Therefore, these proceedings will also be of interest to academics, practitioners, health workers, and professionals involved in medical research.

Studying for an Early Childhood Degree, based on the practices of The Pen Green Centre for children and families, exemplifies how student-practitioners can foster strong communities of learners and

create student-teacher connections that remain long after studies are complete. The Pen Green Integrated Centre in Corby, UK, has developed a unique approach to adult education. Highly qualified tutors, with their wide-ranging experiences, have written Studying for an Early Childhood Degree in collaboration with current and former students. It illustrates different ways to complete assignments, providing 20 case-studies of work that achieved an excellent grade from students of different professional, geographical, ethnic, educational and socio-economic backgrounds; it also explores the rationale behind what contributed to these excellent final grades. Each chapter, linked to the key themes of the Quality Assurance Agency (QAA) Early Childhood Studies degree, includes discussions, reflections, commentary and extracts from students' works through Levels 4-7, as well as suggestions for further reading. Studying for an Early Childhood Degree is an essential read for learners as well as educators and practitioners. It will be a key resource for students having varied learning needs, professional heritages, writing styles and interests. Further, it will also support other educators to consider the unique and often competing demands of being an adult in higher education.
