ISE Finance: Applications and Theory McGraw-Hill Incorporated, Us Corporate Finance, by Ross, Westerfield, and Jaffe is a popular textbook that emphasizes the modern fundamentals of

the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a

balance of theory and application. The well-respected author team is known for their clear, accessible presentation of material that makes this text an excellent teaching tool. Brad Jordan, known for his successful work on the RWJ Fundamentals and Essentials books, contributed to this edition. His influence will be seen particularly in the writing style with smoother coverage of topics, and the increased quality in the problem material. Foundations of Financial Management SAGE

The fifth edition continues to provide the core concepts for the undergraduate corporate finance course, as well as key research and current topics. Also, this is the first text to use individual examples to help students better understand the material. The framework of this text helps students understand how to approach core financial concepts by emphasizing three themes: Finance is about connecting core concepts Finance can be taught using a personal perspective Finance

focuses on solving problems and decision making

Demy Irwin/McGraw-Hill

"First of all, the field of finance has become much more analytical, with the emphasis on decision-oriented approaches to

problems rather than the old, descriptive approach. We have increased the use of analytical approaches to financial problems in virtually every chapter of the book. But we also have stayed with our basic mission of making sure students are able to follow us in our discussions throughout the text. While the 18th edition is considerably more sophisticated than the initial edition, it is still extremely "reader friendly." As the analytical skills demanded of students have increased,

so has the authors' care in presenting the material. The use of spreadsheets and calculators has become considerably more important, and this is also reflected in the 18th edition where we have added Excel tables and calculator keystroke solutions within key chapters. We offer Web Exercises at the end of every chapter, URL citations throughout the text, a library of course materials for students and faculty, computerized testing software and PowerPoint® for the

faculty, McGraw Hill Connect®, an online assignment and assessment solution, and SmartBook, a truly innovative adaptive study tool and eBook"--
