This is a print on demand  
edition of a hard to find  
publication. Explores  
whether sufficient data  
exists to examine the  
temporal and spatial  
relationships that existed  
in terrorist group

planning, and if so, could  
patterns of preparatory  
conduct be identified?  
About one-half of the  
terrorists resided,  
planned, and prepared for  
terrorism relatively close  
to their eventual target.  
The terrorist groups  
existed for 1,205 days  
from the first planning  
meeting to the date of the  
actual/planned terrorist  
incident. The planning  
process for specific acts  
began 2-3 months prior to  
the terrorist incident. This  
study examined selected  
terrorist groups/incidents  
in the U.S. from  
1980-2002. It provides for  
the potential to identify  
patterns of conduct that  
might lead to intervention  
prior to the commission of  
the actual terrorist  
incidents. Illustrations.
