 The Model Rules of Professional Conduct provides an up-to-date
 resource for information on legal ethics. Federal, state and local
 courts in all jurisdictions look to the Rules for guidance in solving
 lawyer malpractice cases, disciplinary actions, disqualification
 issues, sanctions questions and much more. In this volume, black-
 letter Rules of Professional Conduct are followed by numbered
 Comments that explain each Rule's purpose and provide
 suggestions for its practical application. The Rules will help you
 identify proper conduct in a variety of given situations, review
 those instances where discretionary action is possible, and define
 the nature of the relationship between you and your clients,
 colleagues and the courts.

Paradigms and Sand Castles describes in a lively and provocative
 manner the methodological pitfalls most characteristic of the
 study of developing countries. Although much of this book focuses
 on the concrete details of empirical research, its primary goal is
 to aid theory building. Its central message is that theoretical
 knowledge could be accumulated more rapidly if certain research
 norms in the field of comparative development were changed.
 The book deals with several standard methodological practices,
 showing their unfortunate consequences and making suggestions
 for their improvement. Traditionally, big subjects of immense real-
 world importance, such as democratization, economic
 development, and ethnic mobilization, have fascinated scholars of
 comparative politics. But the choice of a big question for study
 does not translate automatically into a feasible research design.
 Barbara Geddes offers a strategy for approaching big questions
 and addresses empirical issues such as effective use of evidence
 found in case studies to test arguments, the intricacies of
 operationalizing complicated and often "fuzzy" concepts, the
 nonquantitative "measurement" of such concepts, and
 determining the criteria for setting the boundaries of the domain
 within which an argument should apply. Barbara Geddes is
 Professor of Political Science, University of California at Los
 Angeles. *Paradigms and Sand Castles* describes in a lively and

Principles of Comparative Politics

CQ Press
 Why are the countries of the world governed so differently? How
 did this diversity of political orders come about? Will liberal
 capitalism retain its appeal and spread further around the globe
 in the 21st century, or will new and hostile challengers come on
 the scene? These are the questions that guide this new
 introductory text to comparative politics. Cast through the lens of
 ten theoretically informed and historically grounded country
 studies, it illustrates and explains how the three major concepts
 of comparative political analysis - interests, identities, and
 institutions - shape the politics of nations. A novel feature of this
 textbook is its explicit discussion of the international challenges
 to each country's chosen path of development. These challenges
 frequently alter domestic interests and identities, and force
 countries to find new institutional solutions to the problems of
 modern politics. Written in a style free of heavy handed jargon
 and organized in a way that speaks to contemporary
 comparativists' concerns, this textbook provides students with the
 conceptual tools and historical background they need to
 understand the politics of today's complex world.

Introducing Comparative Politics Barrons Educational Series Each year, tens of thousands of students who are interested in politics go through a rite of passage: they take a course in research methods. Many find the subject to be boring or confusing, and with good reason. Most of the standard books on research methods fail to highlight the most important concepts and questions. Instead, they brim with dry technical definitions and focus heavily on statistical analysis, slighting other valuable methods. This approach not only dulls potential enjoyment of the course, but prevents students from mastering the skills they need to engage more directly and meaningfully with a wide variety of research. With wit and practical wisdom, Christopher Howard draws on more than a decade of experience teaching research methods to transform a typically dreary subject and teach budding political scientists the critical skills they need to read published research more effectively and produce better research of their own. The first part of the book is devoted to asking three fundamental questions in political science: What happened? Why? Who cares? In the second section, Howard demonstrates how to answer these questions by choosing an appropriate research design, selecting cases, and working with numbers and written documents as evidence. Drawing on examples from American and comparative politics, international relations, and public policy, *Thinking Like a Political Scientist* highlights the most common challenges that political scientists routinely face, and each chapter concludes with exercises so that students can practice dealing with those challenges.

Subnational Research in Comparative Politics Hachette UK This book offers an accessible and broadly conceived examination of the impact of globalization on comparative politics. Written in a lucid and lively style, it assumes no prior knowledge of either globalization or comparative politics, and is the ideal textbook for students who want to know more about these crucial topics. The world has changed substantially since the end of the Cold War and the collapse of the Soviet Union in the early 1990s. There is much debate - but little agreement - about what precisely has happened, and how it affects what goes on politically and economically within countries. At the centre of the debate are the forces and processes of globalization and how they impact on domestic outcomes in various kinds of countries. *Comparative Politics in a Globalizing World* poses and answers two key questions: ? How do various aspects of globalization affect outcomes within countries? ? What are the implications of globalization for our understanding of comparative politics? By focusing on three kinds of countries - established democracies, transitional democracies, and non-democracies - Haynes explores how domestic outcomes are affected by contemporary globalization. Throughout the book, key topics are explained,

including regionalization, economic globalization, the natural environment, political culture, regime change and democratization, political violence and terrorism, religion, human rights, and women and political participation. These themes are developed within a consistently comparative perspective. This volume will be of immense value to all those interested in one of the great debates of our time. It will be essential reading for students of comparative politics, international relations, and globalization.
