Although he is best known for his novels—several of which have been made into popular movies—E.M. Forster also published stories. This volume, which collects those stories published during Forster's lifetime, provides an opportunity for readers to discover these less familiar works. Rich in irony and alive with sharp observations on the

surprises life holds, the stories often feature violent events, discomfiting coincidences, and other disruptive happenings that throw the characters' perceptions and beliefs off balance. In their keen Introduction, David Leavitt and Mark Mitchell discuss Forster's place in both the short-story tradition and in the tradition of gay literature. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across

genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Writing and America surveys the writing genres that have contributed to the American notions of America . Essays from scholars from both side of the Atlantic chart the range of responses to American nationhood from colonial times to the present and include dissenting responses from communities such as native American, black and feminist writers. Case studies from writers such as James Fenimore Cooper and William Carlos Williams provide a framework for

discussions on topics such as colonial notions of America as the promised land, the discourses of nationhood in the republic, the sense of nationhood in American historiography, and the formation of the American Canon. Draws upon extracts from the American Bills of Rights and the Constitution as examples of different types of writing.

Andra wakes up from a cryogenic sleep 1,000 years later than she was supposed to, forcing her to team up with an exiled prince to navigate an unfamiliar planet in this smart, thrilling sci-fi adventure, perfect for fans of Renegades and Aurora Rising. When Andra wakes up, she's drowning. Not only that, but she's in a hot, dirty cave, it's the year 3102, and everyone keeps calling her Goddess. When Andra went into a cryonic sleep for a trip across the galaxy, she expected to wake up in a hundred years, not a thousand. Worst of all, the rest of the colonists--including her family and friends--are dead. They died centuries ago, and for some reason, their descendants think Andra's a deity. She knows she's nothing special, but she'll play along if it means she can figure out

why she was left in stasis and how to get back to Earth. Zhade, the exiled bastard prince of Eerensed, has other plans. Four years ago, the sleeping Goddess's glass coffin disappeared from the palace, and Zhade devoted himself to finding it. Now he's hoping the Goddess will be the key to taking his rightful place on the throne - if he can get her to play her part, that is. Because if his people realize she doesn't actually have the power to save their dying planet, they'll kill her. With a vicious monarch on the throne and a city tearing apart at the seams, Zhade and Andra might never be able to unlock the mystery of her fate, let alone find a way to unseat the king, especially since Zhade hasn't exactly been forthcoming with Andra. And a thousand years from home, is there any way of knowing that

Earth is better than the planet she's woken to?

The Red and the Black Stendhal - First published in 1830, *The Red and the Black*, is widely considered the masterpiece of 19th century French author Marie-Henri Beyle, known more commonly by his pen name, Stendahl. It follows the ambitions of Julien Sorel, a young man raised in the French countryside who wishes to rise above his provincial station by climbing the social ranks of Parisian society. Through a series of events, Juliens talent and hard work give way to deception and hypocrisy when he realizes the limitations for advancement of a sincere and honest man of humble origins.

Although Julien achieves much which he aspires to, ultimately his pride gets the better of him when he commits a violent crime of passion, leading to his tragic downfall. Through the deep psychological introspection of Julien we see Stendhals unique literary genius, the remarkable way in which he allows readers to live in the minds of his characters. Set against the backdrop of the July Revolution of 1830, *The Red and the Black* is a narrative which embodies the rich social conflict of that time. This edition is translated with an introduction by Horace B. Samuel.

Soon enough, nobody will remember life before the Internet. What does this unavoidable fact mean? Those of us who have lived both with and without the crowded connectivity of online life have a rare opportunity. We can still recognize the difference between Before and After. We catch ourselves idly reaching for our phones at the bus stop. Or we notice how, midconversation, a fumbling friend dives into the perfect recall of Google. In

this eloquent and thought-provoking book, Michael Harris argues that amid all the changes we're experiencing, the most interesting is the end of absence—the loss of lack. The daydreaming silences in our lives are filled; the burning solitudes are extinguished. There's no true "free time" when you carry a smartphone. Today's rarest commodity is the chance to be alone with your thoughts. Michael Harris is an award-winning journalist and a contributing editor at *Western Living* and *Vancouvermagazines*. He lives in Toronto, Canada.

The End of Absence Random House
Light and darkness shape our perception of the world. This is true in a literal sense, but also metaphorically: in theology, philosophy, literature and the arts the light of day signifies life, safety, knowledge and all that is good, while the

darkness of the night suggests death, danger, ignorance and evil. A closer inspection, however, reveals that things are not quite so clear cut and that light and darkness cannot be understood as simple binary opposites. On a biological level, for example, daylight and darkness are inseparable factors in the calibration of our circadian rhythms, and a lack of periodical darkness appears to be as contrary to health as a lack of exposure to sunlight. On a cultural level, too, night and darkness are far from being universally condemnable: in fiction, drama and poetry the darkness of the night allows not only nightmares but also dreams, it allows criminals to ply their trade and allows lovers to meet, it allows the pursuit of pleasure as well as deep thought, it allows metamorphoses,

transformations and transgressions unthinkable in the light of day. But night is not merely darkness. The night gains significance as an alternative space, as an 'other of the day', only when it is at least partially illuminated. The volume examines the interconnection of night, darkness and nocturnal illumination across a broad range of literary texts. The individual essays examine historically specific light conditions in literature, tracing the symbolic and metaphoric content of darkness and illumination and the attitudes towards them.

William Trevor has been acclaimed as the greatest contemporary writer of short stories in the English language, likened to Chekhov for his insights into

human nature. These three tales of obsession, heartbreak, silent sorrow and the small tragedies of ordinary lives are profound, immaculate and beautiful.

The Mark-2 Wife Routledge

'Her feelings for the child redeemed her from bitterness, and shed some light on the dark industrial terraces and the waste lands of the city's rubble.' One of the most acclaimed novelists of her generation, Margaret Drabble is an unmatched observer of postwar English lives, portraying social change, sexual liberation, landscape, class and the messy complications of human relationships with intricacy and honesty. In these two stories of lives colliding, a mother buying a birthday gift has her dreams destroyed, and a honeymoon leads to an unexpected epiphany. This

book contains The Gifts of War and Hassan's Tower.

 E.M. Forster is best known for his exquisite novels, but these two affecting short stories brilliantly combine the fantastical with the allegorical. In 'The Machine Stops', humanity has isolated itself beneath the ground, enmeshed in automated comforts, and in 'The Celestial Omnibus' a young boy takes a trip his parents believe impossible. *Make a perfectly finished quilt on your home machine* Penguin Classics
 They were mad, of course. Or evil. Or godless, amoral, arrogant, impersonal,

and inhuman. At best, they were well-intentioned but blind to the dangers of forces they barely controlled. They were Faust and Frankenstein, Jekyll and Moreau, Caligari and Strangelove--the scientists of film and fiction, cultural archetypes that reflected ancient fears of tampering with the unknown or unleashing the little-understood powers of nature. In *From Faust to Strangelove* Roslyn Haynes offers the first detailed and comprehensive study of the image of the scientist in Western literature and film--from medieval images of alchemists to present-day depictions of cyberpunks and genetic engineers. *The Strange Crime of John Boulnois* Pantheon
 In *The Ticket That Exploded*, William S. Burroughs's grand "cut-up" trilogy that

starts with The Soft Machine and continues through Nova Express reaches its climax as inspector Lee and the Nova Police engage the Nova Mob in a decisive battle for the planet. Only Burroughs could make such a nightmare

vision of scientists and combat troops, of ad men and con men whose deceitful language has spread like an incurable disease be at once so frightening and so enthralling.
