BISHOP CUNNINGHAM

**Handbook of the
History of Economic
Thought** Jai Press
The books reprinted in

this set greatly influenced the way the development of economics was perceived and how the history of economics was viewed. Many of the titles represent the first attempts to chart the history of economics both from European and American perspectives.

Titles cover the USA, UK, Germany and France, and include: * History of Political Economy from Antiquity to our days [1880]-"Jerome Adolphe Blanqui" * View of the Progress of Political Economy in Europe [1847]--"Travers Twiss" * A Short History of Political

Economy in England [1891]-"L.L. Price" * The History of Economics [1896/1911]-"Henry Dunning MacLeod" * History of Economic Thought [1911/1930]-"Lewis H. Haney" * History of Economic Doctrines [1915]-"Charles Gide"and "Charles Rist" * Types of Economic Theory [1930]-"Othmar Spann" * Philosophy and Political Economy in Some of their Historical Relations [1893]-"James Bonar" * The Development of English Thought: a Study in the Economic

Interpretation of History [1899]-"Simon N. Patten" * A Guide to the Study of Political Economy [1876]-"Luigi Cossa"
The Study of Economic History JAI Press Incorporated
 This book contains a set of notes prepared by Ragnar Frisch for a lecture series that he delivered at Yale University in 1930. The lecture notes provide not only a valuable source document for the history of econometrics, but also a more systematic introduction to some of Frisch's key

methodological ideas than his other works so far published in various media for the econometrics community. In particular, these notes contain a number of prescient ideas precursory to some of the most important notions developed in econometrics during the 1970s and 1980s More remarkably, Frisch demonstrated a deep understanding of what econometric or statistical analysis could achieve under the situation where there lacked known

correct theoretical models. This volume has been rigorously edited and comes with an introductory essay from Olav Bjerkholt and Duo Qin placing the notes in their historical context.

Teaching the History of Economic Thought
Cambridge University Press

This work provides brief biographical sketches of the 28 laureates in economics, together with an overview of each of their lectures, accompanied by selected quotes. The book aims to

focus attention on how these lectures can be utilized as a source of economic knowledge.

History of Economic Thought Princeton University Press

This book describes the history of economic thought, focusing on the development of economic theory from Adam Smith's 'Wealth of Nations' to the late twentieth century. The text concentrates on the most important figures in the history of the economics. The book examines how important economists have reflected

on the sometimes conflicting goals of efficient resource use and socially acceptable income distribution.-- [book cover].

Research in the History of Economic Thought and Methodology JAI Press Incorporated

Ranking among the most distinguished economists and scholars of his generation, Jacob Viner is best remembered for his work in international economics and in the history of economic thought. Mark Blaug, in his Great Economists

Since Keynes (Cambridge, 1985) remarked that Viner was "quite simply the greatest historian of economic thought that ever lived." Never before, however, have Viner's important contributions to the intellectual history of economics been collected into one convenient volume. This book performs this valuable service to scholarship by reprinting Viner's classic essays on such topics as Adam Smith and laissez-faire, the intellectual history of laissez-faire, and power versus plenty

as an objective of foreign policy in the seventeenth and eighteenth centuries. Also included are Viner's penetrating and previously unpublished Wabash College lectures. "Jacob Viner was one of the truly great economists of this century as both teacher and scholar. This collection ... covers a wide range with special emphasis on the history of thought. Today's economists will find [the essays] just as thought-provoking and as illuminating as did his contemporaries. They

have aged very well indeed."--Milton Friedman, Hoover Institution "Jacob Viner was a great and original economic theorist. What is rarer, Viner was a learned scholar. What is still rarer, Viner was a wise scientist. This new anthology of his writings on intellectual history is worth having in every economist's library--to sample at intervals over the years in the reasoned hope that Viner's wisdom will rub off on the reader and for the pleasure of his writing."--Paul A. Samuelson, MIT "I

am frankly jealous of those who will be reading Viner's essays for the first time, marvelling at his learning, amused by his dry wit, instructed by his wisdom. But although I cannot share their joy of discovery, I shall be able to savor the subtleties that emerge from rereading these splendid essays."--George J. Stigler, University of Chicago
"This volume will be a treat for the reader who appreciates scholarship, felicitous use of language, and the workings of a great mind. The Wabash

lectures are gems, and the introduction by Douglas Irwin contributes significantly to our understanding of Viner's accomplishments."--William J. Baumol, Princeton University/New York University Originally published in 1991. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts

of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. The Economic Thought of Henry Calvert Simons Elsevier
Lionel Robbins's now famous lectures on the history of economic thought comprise one of the greatest accounts

since World War II of the evolution of economic ideas. This volume represents the first time those lectures have been published. Lord Robbins (1898-1984) was a remarkably accomplished thinker, writer, and public figure. He made important contributions to economic theory, methodology, and policy analysis, directed the economic section of Winston Churchill's War Cabinet, and served as chairman of the "Financial Times. As a historian of economic ideas, he ranks with Joseph Schumpeter

and Jacob Viner as one of the foremost scholars of the century. These lectures, delivered at the London School of Economics between 1979 and 1981 and tape-recorded by Robbins's grandson, display his mastery of the intellectual history of economics, his infectious enthusiasm for the subject, and his eloquence and incisive wit. They cover a broad chronological range, beginning with Plato, Aristotle, and Aquinas, focusing extensively on Adam Smith, Thomas

Malthus and the classicals, and finishing with a discussion of moderns and marginalists from Marx to Alfred Marshall. Robbins takes a varied and inclusive approach to intellectual history. As he says in his first lecture: "I shall go my own sweet way-- sometimes talk about doctrine, sometimes talk about persons, sometimes talk about periods." The lectures are united by Robbins's conviction that it is impossible to understand adequately contemporary institutions

and social sciences without understanding the ideas behind their development.

Authoritative yet accessible, combining the immediacy of the spoken word with Robbins's exceptional talent for clear, well-organized exposition, this volume will be welcomed by anyone interested in the intellectual origins of the modern world.

A History of Economic Thought Taylor & Francis US

Drawing on years of research, Gerald Steele

dives into the diverse ideas of Henry Simons, a neglected economist whose work in the 1930s on monetary and financial instability is extremely relevant to today's debates about commercial bank credit, the interdependence of fiscal and monetary policy, and financial regulation. Steele describes the emergence of the first Chicago school of economics and its distinctive difference to the School subsequently associated with the Monetarism of Milton

Friedman, and shows how Simons provides the basis for what is now referred to as 'the fiscal theory of the price level' and how this differs from the monetarist attempt to control prices by controlling the supply of broad money. This book will be of interest to advanced students and researchers of the history of economic thought, economic history, macroeconomics and banking and finance. *The Historical Method in Social Science* Springer Science & Business Media

Lionel Robbins's now famous lectures on the history of economic thought comprise one of the greatest accounts since World War II of the evolution of economic ideas. This volume represents the first time those lectures have been published. Lord Robbins (1898-1984) was a remarkably accomplished thinker, writer, and public figure. He made important contributions to economic theory, methodology, and policy analysis, directed the economic section of Winston Churchill's War

History of Economic Thought as an Intellectual Discipline Routledge Presents materials in two fields, the history of economic thought and the methodology of economics. This book features articles and review essays on the works in the two fields. It also includes archival supplements such as lecture notes, papers, longer manuscripts, correspondence, and more.
Documents on and from the History of Economic Thought and Methodology

Princeton University Press This book presents, for the first time, a detailed transcription of Jacob Viner's Economics 301 class as taught in 1930. These lecture notes provide insight into the legacy of Jacob Viner, whose seminal contributions to fields such as international economics and the history of economics are well known, but whose impact in sparking the revival of Marshallian microeconomics in the United States via his classroom teaching has

been less appreciated. Generations of graduate students at the University of Chicago have taken Economics 301. The course has been taught by such luminaries as Milton Friedman and Gary Becker, and remains an introduction to the analytical tools of microeconomics and the distinctive Chicago way of thinking about the market system. This demanding and rigorous course first became famous in the 1930s when it was taught by Jacob Viner. When read in tandem with the

Transaction editions of Milton Friedman's *Price Theory*, Frank Knight's *The Economic Organization*, and Gary Becker's *Economic Theory*, Viner's lectures provide the reader with important insights into the formative period of Chicago price theory. These recently discovered notes from Viner's class will be important for historians of economic thought and anyone interested in the origins of the Chicago School of Economics.
Jacob Viner Routledge

Roger E. Backhouse and Keith Tribe present a broad introduction to the history of economic thought that provides much-needed context behind the development of ideas and a guide through the original writings of major economists. They seek to emphasize a diversity that is sometimes suppressed in more conventional textbooks.

Competing Schools of Economic Thought M.E.

Sharpe
This book presents, for the first time, a detailed

transcription of Jacob Viner's Economics 301 class as taught in 1930. These lecture notes provide insight into the legacy of Jacob Viner, whose seminal contributions to fields such as international economics and the history of economics are well known, but whose impact in sparking the revival of Marshallian microeconomics in the United States via his classroom teaching has been less appreciated. Generations of graduate students at the University

of Chicago have taken Economics 301. This demanding and rigorous course first became famous in the 1930s when it was taught by Jacob Viner. When read in tandem with the Transaction editions of Milton Friedman's Price Theory, Frank Knight's

The Economic Organization, and Gary Becker's Economic Theory, Viner's lectures provide the reader with important insights into the formative period of Chicago price theory. These recently discovered notes from Viner's class will be important for historians of economic thought and anyone interested in the origins of the Chicago School of Economics. *A Dynamic Approach to Economic Theory* Routledge Trends in Foreign Trade

Ratios -- Lecture VI -- The Tasks of Theory -- Knowledge and Policy
Jacob Viner Springer Science & Business Media
 Four documents pertinent to the history of economic thought are published for the first time: a list of references in economics dating from 1880; a syllabus of lectures on the history of economics given by C.H. Hull in Cornell University in 1895; the outlines for Walton H. Hamilton's Principles-of Economics course in the University of Michigan, 1911; and notes taken in

James S. Earley's course on the Development of Economics, 1954-1955, by Warren J. Samuels. *British and American Economic Essays* Emerald Group Publishing
 This ground-breaking new textbook takes a thematic approach to the history of economic thought, introducing current economic issues and examining the relevant arguments of key economists. By taking this innovative approach, the book sets these pivotal ideas in a contemporary context, helping readers

to engage with the material and see the applications to today's society and economy. Based on courses developed by the authors, the text introduces a range of perspectives and encourages critical reflection upon neoclassical economics. Through exposure to a broader spectrum of sometimes conflicting propositions, readers are able to evaluate the strengths, weaknesses and relevance of different economic theories. Recharting the History of

Economic Thought is an invaluable companion for those taking courses in the History of Economic Thought, the Development of Economic Ideas, Developing Economic Thinking or Economic Thought and Policy. It will also appeal to anyone looking for an introduction to pluralist approaches to economics. *A History of Economic Thought* Routledge
 This book contains two groups of archival materials. The first group includes an early critique of economics by Eli

Ginzberg; The second contains lecture notes taken by F. Taylor Ostrander in courses given by David Taggart Clark (Williams College), Redvers Opie (Oxford), and Frank H. Knight (Chicago) on the history of economics.
Early Histories of Economic Thought, 1824-1914: View of the progress of political economy in Europe since the sixteenth century Routledge
 "one of the best contributions to the history of economic

thought during recent years" P. M. Rosenstein-Rodan Nassau Senior is one of the most significant economists in the classical tradition. This study is based both on his unpublished and published lectures and writings. Part 1 illustrates Senior's outstanding contribution in synthesizing the various developments of Adam Smith's theories that took place during the first part of the nineteenth century. Part 2 examines Senior's opinions and influence on social and economic

policy, in particular his connection with the passing of the Poor Law Amendment Act of 1834.

Wisconsin

"Government and Business" and the History of Heterodox Economic Thought

Cambridge University Press

Contains two groups of archival materials. One group includes lecture notes from courses given at the University of Wisconsin by Edwin E. Witte and Robert Lampman on the

economic role of government. The second group includes papers from a conference on the history of 20th century heterodox economics.

Documents on Modern History of Economic Thought Routledge

First Published in 2005.

Routledge is an imprint of Taylor & Francis, an informa company.

Expectations Elsevier
Stemming from the idea that economics is a social science that tends to forget its own history, this

refreshing book reflects on the role of teaching with historical perspectives. It offers novel ways of integrating the history of economics into the curriculum, both in history of economic thought modules and in other sub-disciplines. Coming from a wide diversity of experiences, the chapters share the idea that studying the history of thought exposes students to pluralism and is therefore an essential pedagogical tool.
