A Dictionary of Symbols Wiley-Blackwell

This is an expansion of the first dictionary of symbols to be based on literature, rather than on 'universal' psychological archetypes or myths. It explains and illustrates the literary symbols that we frequently encounter (such as swan, rose, moon, gold) and gives thousands of cross-references and quotations. The dictionary concentrates on English literature, but its entries range widely from the Bible and classical authors to the twentieth century, taking in American and European literatures. For this third edition, Michael Ferber has included some twenty completely new entries (such as birch, childbirth, grove, mill and railroad) and has added to many of the existing entries. Its rich references make this book an essential tool not only for literary and classical scholars but also for all students of literature.

The understanding and enjoyment of a work of art depends as much on the story it depicts as on the artist's execution of it. But what were once biblical or classical commonplaces are not so

readily recognizable today. This book relates in a succinct and readable way the themes, sacred and secular, on which the repertoire of Western art is based. Combined here in a single volume are religious, classical, and historical themes, figures of moral allegory, and characters from romantic poetry that appeared throughout paintings and sculpture in Western art before and after the Renaissance. More than just a dictionary, this text places these subjects in their narrative, historical, or mythological context and uses extensive cross-referencing to enhance and clarify the meanings of these themes for the reader. The definitive work by which others are compared, this volume has become an indispensable handbook for students and general appreciators alike. This wholly redesigned second edition includes a new insert of images chosen by the author, as well as a new preface and index to highlight the ideas, beliefs, and social and religious customs that form the background of much of this subject matter.

This dictionary supplies associations which have been evoked by plants, animals, gems, objects and concepts throughout the history of Western civilization, from the hieroglyphs of ancient Egypt to the poetry of Dylan Thomas. It supplies background information from fields which may not be everyone's specialty, such as biology and mythology. It gives not one, but several meanings which may apply simultaneously, since indefiniteness is the mark of symbols. No fine distinction is made between symbols, allegories, metaphors, signs, types or images, since such subtle distinctions, however sensible from a scientific point of view, are useless to a person struggling with the deeper comprehension, and thus appreciation, of a particular 'symbol'. Important general entries are listed such as archetypes, ass, binary, bull, calendar, eagle, elements, Great Goddess, Sacred King, sun, etc., which it is advisable to read first. Information was gathered from primary sources: both famous and obscure classical authors; the Bible; the medieval scholar and musician Hildegard von Bingen; but also Donne, Shakespeare and Eliot. Lists of primary and secondary literature are included. From the many notes left behind by the late Ad de Vries, his son has gathered enough new material to enlarge the original 1974 edition more than 20%. Included are many new entries taken from herbals and lapidaries as well as ancient books on medicine, architecture and dreams. This dictionary is an invaluable source of reference for students of many disciplines, as well as for writers and artists.

A classic encyclopedia of symbols by Catalan polymath Joan Cirlot that illuminates the symbolic underpinnings of myth, modern psychology, literature, and art. Juan Eduardo Cirlot's A Dictionary of Symbols is a feat of scholarship, an act of the imagination, and a tool for contemplation, as well as a work of literature, a reference book that is as indispensable as it is brilliant and learned. Cirlot was a composer, a poet, an art critic, and a champion of modern art whose interest in surrealism helped to bring him to the study of symbolism. Carl Jung, Mircea Eliade, René Guénon, Erich Fromm, and Gaston Bachelard also helped to shape his thinking in a book that explores the space between the world at large and the world within, where, as Cirlot sees it, nothing is meaningless, everything is significant, and everything is in some way related to something else. Running from "abandonment" to "zone" by way of "flute" and "whip," spanning the cultures of the world, and including a wealth of visual images to further bring the reality of the symbol home, A Dictionary of Symbols, here published for the first time in English in its original, significantly enlarged form, is a luminous and illuminating investigation of the works of eternity in time.
