Urban Identities Yale
University Press
Richly illustrated with
rare period
photographs,

Houston's Hermann Park: A Century of Community provides a vivid history of Houston's oldest and most important urban park. Author and historian Barrie Scardino Bradley sets Hermann Park in both a local and a national context as this grand park celebrates its centennial at the culmination of a remarkable twenty-year rejuvenation. As Bradley shows, Houston's development as a major American city may be traced in the outlines of the park's history. During the early nineteenth century, Houston leaders were most interested in commercial development and connecting the city via water and rail to

markets beyond its immediate area. They apparently felt no need to set aside public recreational space, nor was there any city-owned property that could be so developed. By 1910, however, Houston leaders were well aware that almost every major American city had an urban park patterned after New York's Central Park. By the time the City Beautiful Movement and its overarching Progressive Movement reached the consciousness of Houstonians, Central Park's designer, Frederick Law Olmsted, had died, but his ideals had not. Local advocates of the City Beautiful Movement, like their counterparts elsewhere, hoped to utilize political and economic power to

create a beautiful, spacious, and orderly city. Subsequent planning by the renowned landscape architect and planner George Kessler envisioned a park that would anchor a system of open spaces in Houston. From that groundwork, in May 1914, George Hermann publicly announced his donation of 285 acres to the City of Houston for a municipal park. Bradley develops the events leading up to the establishment of Hermann Park, then charts how and why the park developed, including a discussion of institutions within the park such as the Houston Zoo, the Japanese Garden, and the Houston Museum of Natural Science. The book's illustrations include plans, maps,

and photographs both historic and recent that document the accomplishments of the Hermann Park Conservancy since its founding in 1992.

Royalties from sales will go to the Hermann Park Conservancy for stewardship of the park on behalf of the community.

Parks and recreation systems have evolved in remarkable ways over the past two decades. No longer just playgrounds and ballfields, parks and open spaces have become recognized as essential green infrastructure with the potential to contribute to community resiliency and sustainability. To capitalize on this potential, the parks and recreation system planning process must evolve as well. In *Parks and Recreation System Planning*, David Barth draws on real-world examples to provide a step-by-step approach to creating parks

systems that generate greater economic, social, and environmental benefits. Chapters outline each step--evaluating existing systems, implementing a carefully crafted plan, and more--necessary for creating a successful, adaptable system.

Incorporated

George Lucas's first Star Wars trilogy shows the influences of its era; Cold War tension is evident in its theme of rebellion against totalitarianism. Recent entries in the Star Wars saga—*The Phantom Menace* (1999) and *Attack of the Clones* (2002)—are much more concerned with evil corporations,

terrorists, and the corruption of the political process. Each film is influenced by the times in which it was released, but also by cultural subtexts and by other films that had direct and indirect effects on Lucas as writer, producer, and director. This work focuses on all six Star Wars films. The first topic of this multifaceted examination is how the films use the language of colonialism (“The” Rebellion, “The” Empire) to emphasize the idea of imperialism. Next the author looks at how Asian influences—including religious undertones from Taoism and Buddhism and the works of Kurosawa and other Asian filmmakers—provide a subtext for much of the

action. Next the discussion turns to the representation of people of color in the Star Wars universe, and how other ethnicities are represented overall, particularly through the literalization of the word “aliens.” These topics of discussion provide for penetrating conclusions about Lucas’s films and how they represent race, religion, and rebellion. *Write Your Life One Bite at a Time* Springer Science & Business Today, Boston is in a uniquely powerful position to make our city more affordable, equitable, connected, and resilient. We will seize this moment to guide our growth to support our dynamic economy, connect more residents to opportunity, create

vibrant neighborhoods, and continue our legacy as a thriving waterfront city. Mayor Martin J. Walsh's *Imagine Boston 2030* is the first citywide plan in more than 50 years. This vision was shaped by more than 15,000 Boston voices.

The EPA issued a notice on January 19, 1993, declaring that the agency will now use this 1987 Corps of Engineers manual to identify wetlands. The manual presents approaches and methods for identifying and delineating wetlands for the purposes of Section 404 of the Clean Water Act. It describes methods for applying a multiparameter approach. Separate sections are devoted to preliminary data gathering and analysis, method selection, routing determinations, atypical situations, and problem areas. Four appendices provide a glossary of wetland

terminology, example data forms, and useful information on vegetation and hydric soils.

LOS ANGELES TIMES
BESTSELLER People all over the world have seen Los Angeles's famed "Hollywood" sign and the iconic domed Griffith

Observatory. Both are part of Griffith Park, a place visited by more than 10 million people each year--more than Yosemite and Grand Canyon National Parks combined. Rugged and vast, the 4,511-acre Griffith Park encompasses a sprawling 70-mile long network of trails, ranging from paved paths through manicured landscapes to challenging ridgeline climbs, and is a destination for hikers, trail runners, cyclists, equestrians, picnickers, and museum-goers. It's a unique outdoor space in a city that is not well known for its outdoor amenities. Discovering Griffith Park uses the park's extensive trail network as an anchor to explore the park in full, whether on foot, wheel, or hoof. Readers

will also find out where the best views of the Hollywood sign are, where they can catch free Shakespeare on summer evenings, and how to attend one of the legendary Los Angeles Breakfast Club meetings for good food, good friends, and a bit of early morning learning.

This guide offers a rare treasury of ideas and inspiration for environmental designers, city planners and other professionals involved with sign systems.

Urban Identities

profiles 49 finely crafted urban identity programs from around the world -- successful systems created for heritage trails, college campuses, public transit, riverwalks, streetscapes and more. Leslie Gallery Dilworth, the mind behind Direction Philadelphia and other model urban sign systems, provides deft insight on the issues of urban sign planning, including funding options and maintenance.

The Life and Art of Ursula Sternberg Brady Overton Park in Memphis, Tennessee, is a gem in the midst of a sprawling Southern city. In 1900, as Memphis emerged from bankruptcy and yellow fever epidemics, the Progressive movement encouraged Memphians to rely on

the government for a better quality of life. The Memphis Park Commission, chartered that year, purchased 342 acres of land at the eastern edge of the city. Landowner Overton Lea of Nashville earned \$110,000 from the sale. George Kessler was hired to build Overton Park, and the intervening years saw such amenities as the city's first zoo, the Brooks Museum of Art, the Overton Park Shell (the site of Elvis Presley's first public performance), Memphis College of Art, war memorials, and hiking trails through the world's only old-growth forest in an urban setting. [NADA Consumer Edition of the Recreation Vehicle Appraisal Guide 2001](#)

Palala Press
Fourteen years in the making, this is a chronicle of the nearly two-thousand-mile international line between the United States and Mexico. It is an historical account largely through the eyes and experiences of government agents, politicians, soldiers, revolutionaries, outlaws, Indians, engineers, immigrants, developers, illegal aliens, business people, and wayfarers looking for a job. It is essentially the untold story of lines drawn in water, sand, and blood, of an intrepid, durable people, of a civilization whose ebb and flow of history is as significant as any in the world. Award-winning historian Leon Metz takes the reader from America's early

westward expansion to today's awesome border problems of water rights, pollution, immigration, illegal aliens, and the massive effort of two nations attempting to pull together for a common cause.

Autocar Career Examination

Seattle's Commercial Aviation 1908-1941

Mountaineers Books

In preparation for statehood, fifty-six delegates from Florida's twenty counties assembled in

the Panhandle town of Saint Joseph (near Port St. Joe) to frame the 1838 Constitution (cover). The delegates were mainly planters and lawyers from thirteen of the nation's twenty-six states and four foreign countries; only three were native Floridians. Three delegates would later become U.S. Senators; two, governors; and five, members of the state supreme court. The convention was called to order on December 3, 1838 and elected Robert Raymond Reid of St. Augustine as president. The constitution divided the government into the traditional three branches - an executive headed by the governor elected to a single four year term, a bicameral legislature

that met annually, and a judiciary headed by a supreme court. It banned bank officers, clergymen, and duelists from election to the legislature and governorship; and declared free men equal while at the same time preserving slavery. The constitution was approved by popular vote in 1839 and served as Florida's constitution from statehood in 1845 until Florida seceded from the Union in 1861. The original 1838 Constitution, signed by forty-one delegates on January 11, 1839, has disappeared. The only surviving handwritten copy is a clerk's copy signed by Reid and Joshua Knowles, convention secretary, found by the William N. "Bill" Galphin family in

Fernandina Beach in 1982. The family inherited the copy from Galphin's grandfather William Thompson. Thompson married the niece of Judge John C. McGehee, a delegate to the 1838 convention and president of the Secession Convention of 1861. The 1838 Constitution is one of many historical documents that may be found at the Florida State Archives. Located in the R.A. Gray Building in Tallahassee, the Archives is mandated by law to collect and preserve documentation of Florida's past; including photographs, state records, and private papers of individuals and organizations. [General License Regulations](#) Interested in aviation as early as 1910,

William Boeing waited until 1914 for his first airplane ride. In 1916, he founded the airplane company that put Seattle on the aviation map. Before Boeing, Seattle featured aircraft builders like Eugene Romano, G. T. Takasou, Tom Hamilton, and Herb Munter. Boeing emerged during World War I and, by the beginning of World War II, had become a world leader. In those years, lesser known individuals like Eddie Hubbard, Percy Barnes,

Vern Gorst, the Becvar brothers, Elliott Merrill, Jim Galvin, and Lana Kurtzer influenced commercial aviation around Seattle.

Drawing on photographs from around the area, Seattle's Commercial Aviation: 1908-1941 illustrates the early days beginning with dirigible flights, recognizes the arrival of commercial airmail and the airlines, salutes the local operators, and marks Seattle's emergence as the aviation gateway to Alaska.
