Volume 5: Breast Elsevier Health Sciences

Oral, Head and Neck Oncology and Reconstructive Surgery is the first multidisciplinary text to provide readers with a system for managing adult head and neck cancers based upon stage. Using an evidence-based approach to the management and treatment of a wide variety of clinical conditions, the extensive experience of the author and contributors in head and neck surgery and oncology are highlighted throughout the text. This includes computer aided surgical simulation, intraoperative navigation, robotic surgery, endoscopic surgery, microvascular reconstructive surgery, molecular science, and tumor immunology. In addition, high quality photos and illustrations are included, which are easily accessible on mobile devices. Management protocols and outcomes assessment provide clear guidelines for managing problems related to adult head and neck oncology and reconstructive surgery. State-of-the art guidance by recognized experts details current techniques as well as technological advances in head and neck/cranio-maxillofacial surgery and oncology. Evidence-based content details the latest diagnostic and therapeutic options for treating a wide-variety of clinical problems with an emphasis on surgical technique and outcomes. Multidisciplinary approach reflects best practices in managing head and neck oncology and cranio-maxillofacial surgery. 900 highly detailed images clearly demonstrate pathologies and procedures. Designed for the modern classroom which lets you access important information anywhere through mobile tablets and smart phones.

Volume 6: Hand and Upper Limb (Expert Consult - Online) Elsevier Health Sciences

Employed for both cosmetic and reconstructive purposes, breast implants are one of the most widely-used and controversial prostheses available. The development of safe, reliable products is vital to the future of this important field of surgery. Biomaterials in plastic surgery reviews the history, materials and safety issues associated with breast implants. Beginning with an introduction to

the history of biomaterials used for breast augmentation, Biomaterials in plastic surgery goes on to discuss development issues. It then discusses the chemistry and physical properties of biomedical silicones before reviewing cohesive gel and polyurethane foam implants. The book concludes by analysing the epidemiological evidence on the safety issues relating to breast implants, followed by a review of retrieval and analysis of breast implants emphasizing strength, durability and failure mechanisms. With its distinguished editors and international team of expert contributors, Biomaterials in plastic surgery is an important guide for surgeons, manufacturers and all those researching this important field. Comprehensively examines the history, materials and safety issues associated with breast implants Provides an overview of the history of biomaterials used for breast augmentation and goes on to discuss the development and chemical and physical properties of biomedical silicones Reviews cohesive gel breast implants and polyurethane foam breast implants

"This textbook is aimed at the trainee and young plastic surgeon, but it is extremely comprehensive and sufficiently detailed for any practitioner. The information is succinct, yet complete and up to date. . . . For a single-volume book, the detailed knowledge presented is impressive. . . . I think this is a great book. It is packed with good and up-to-date information, and I think it will be an invaluable resource for trainees but also for all plastic surgeons. The editors are to be congratulated on achieving a very difficult task with such success." —from a review by Peter C. Neligan, MB, in *Plastic and Reconstructive Surgery* "This is exactly what the editors of *Plastic and reconstructive surgery:*

Approaches and Techniques set out to achieve in producing this excellent textbook. . . . It is truly an international effort at all levels, as the editors, from Australia (Ross D. Farhadieh), the UK (Neil W. Bulstrode) and Canada (Sabrina Cugno), have joined forces to recruit over 130 international contributors and produce a resource of over 1100 pages that provides a well-organized and thorough, yet succinct, text of the essentials of current plastic surgery. . . . Many of the contributors are world-renowned experts; however, there is also a new generation of young rising stars whose contributions are equally good, providing a new, fresh and contemporary feel." —from the Foreword by Julian J. Pribaz, Professor of Surgery, Harvard Medical School "The authors here have concentrated all this useful information into their chapters in a quite outstanding manner. Any plastic surgeon of whatever maturity will find this an excellent purchase which he/she will have no reason to regret." —from a review by Douglas H. Harrison in *Journal of Plastic, Reconstructive & Aesthetic Surgery*

Plastic Surgery E-Book Elsevier Health Sciences

The attraction of plastic surgery is its tremendous scope, and the multitude of approaches for every clinical situation. Yet it is precisely these aspects of plastic surgery that make its study and teaching especially challenging. Although there exist several excellent atlases and texts on this topic, there are few references that are compact, affo

The Art of Aesthetic Surgery Elsevier Health Sciences

The Oxford Textbook of Plastic and Reconstructive Surgery is a comprehensive reference text detailing all aspects of plastic surgery pertinent to a surgeon in training for specialisation and suitable to use in preparation for the Intercollegiate Examination as all aspects of the curriculum are covered. It is part of the Oxford Textbooks in Surgery series, edited by Professor Sir Peter Morris. This volume is also the perfect resource for practicing plastic surgeons; summarising contemporary trial knowledge as well as discussing anatomy, examination and techniques. Chapters are divided into those that detail basic principles and technique, and those that, on a regional basis, describe the conditions and their treatments that form the wide spectrum of reconstructive and aesthetic plastic surgery. The book is split into 13 comprehensive sections; these include General Principles, Burns, Nerve, Limbs, Facial Trauma, Cosmetic surgery, and Ethics among other key areas in the field. This highly illustrated full colour textbook has an innovative and user-friendly style, including over 1000 photographs, clinical images, and line drawings. Bringing together the expertise of almost 200 specialist contributors in the field, the Oxford Textbook of Plastic and Reconstructive Surgery is a highly valuable source of information. *Plastic Surgery - E-Book* Elsevier Health Sciences *Aesthetic Plastic Surgery in Asians: Principles and Techniques* offers a comprehensive guide to all aspects of cosmetic surgery in Asians, focusing on the differences in surgical techniques and general principles when treating these patients. With special emphasis on minimally invasive techniques and minimization of scars, the book features contributions from surgeons in Asian regions who share their signature procedures and describe the latest innovations. The book is divided into ten parts. It begins with general principles and discusses the cultural and societal

influence on Asian patients for cosmetic surgery as well as psychological and psychiatric considerations for Asian cosmetic patients. Next, the book covers facial rejuvenation with chapters on treatment for acne scars, laser skin resurfacing, fat grafting, and Botox. The book discusses the various approaches to face lift, including the classic face-lift and the short-scar method. A section on cosmetic surgery of the eyelid examines the special considerations in Asian eyelid surgery. It discusses upper and lower blepharoplasty, management of the sunken eyelid, and periorbital rejuvenation. A section on rhinoplasty covers alloplastic implants, autologous cartilage grafts, and primary open and closed rhinoplasty. The book also discusses cosmetic surgery of the ear and of the facial skeleton. The next chapters cover breast augmentation with implants, focusing on the transaxillary approach as well as the inframammary approach. The contributors discuss augmentation with conventional fat grafting and cell-assisted lipotransfer. Also covered are mastopexy, breast reduction, and breast reconstruction with pedicled TRAM flap. The final chapters cover abdominoplasty, liposuction of the trunk, buttock augmentation, calf reduction, and other procedures such as hair transplantation, penile enhancement, correction of

varicose veins with endovascular laser, and correction of osmidrosis. Illustrated with over 2500 top-quality full-color drawings and photographs, and with three DVDs showcasing supplementary surgical techniques videos, this title is an absolutely indispensable resource for anyone involved in the aesthetic treatment of Asian patients.
