[The Treasure of the Oxus](#) Routledge

This volume is an inquiry into the complex relationship of the prophetic texts and Israelite history. Taken as a whole, the book provides a "round-table" discussion that examines the thesis that the study of prophetic literature (i.e., Isaiah, Jeremiah, Ezekiel, and the Twelve) and the history of Israel are best undertaken in interaction with one another. This topic appropriately honors John Hayes's long-standing scholarly contributions in prophetic interpretation and historical research, as well as his interest in the possibilities of the intersection of these two areas. The volume also promises to contribute to the body of knowledge about prophets and Israel's past in general by affording twenty-four historians and prophetic scholars the opportunity to explore their areas of interest in fresh ways while in dialogue with a central thesis. All twenty-four contributors have engaged John's ideas about prophets and/or history as students, colleagues, or in their research and publications. Thus, the question of what impact the fields of prophetic research and Israelite history can and should have on one another unites the articles. The book's individual parts, however, are contributions of historians and prophetic scholars who enter the discussion from their own perspectives and examine the possibilities and problems of the intersection of these two topics. The articles from historians will focus on questions about the usefulness of prophetic texts for reconstructing Israel's history, and will also branch out and address topics such as the social location of the prophets and the benefits of other ancient texts, as well as archaeology, to understanding the prophets. Scholars coming from the prophetic

"side" will offer different perspectives on prophetic identity, experience, and rhetoric, and their possible correlations with historical contexts. These articles will engage broad issues such as how history may form the "context of prophets' thought" (to quote contributor J. Gordon McConville), and will explore specific texts and issues drawn from Isaiah, Jeremiah, Ezekiel, Hosea, Amos, Zechariah, along with Daniel and Deuteronomy. [Administration of National Security](#) University of Hawaii Press This projected ten-volume edition of Mao Zedong's writings provides abundant documentation in his own words regarding his life and thought. It has been compiled from all available Chinese sources, including the many new texts that appeared in 1993, Mao's centenary.

Between 300 and 600 C.E., Chinese writers compiled thousands of accounts of the strange and the extraordinary. Some described weird spirits, customs, and flora and fauna in distant lands. Some depicted individuals of unusual spiritual or moral achievement. But most told of ordinary people's encounters with ghosts, demons, or gods; sojourns in the land of the dead; eerily significant dreams; and uncannily accurate premonitions. The selection of such stories presented here provides an alluring introduction to early medieval Chinese storytelling and opens a doorway to the enchanted world of thought, culture, and religious belief of that era. Known as zhiguai, or "accounts of anomalies," they convey a great deal about how people saw the cosmos and their place in it. The tales were circulated because they were entertaining but also because their compilers meant to document the mysterious workings of spirits, the wonders of exotic places, and the nature of the afterlife. A collection of more than two hundred tales, [A Garden of Marvels](#) offers an authoritative yet accessible introduction to zhiguai writings, particularly those never before translated or adequately researched. This volume will likely find its way to bedside tables as well as into classrooms and libraries, just as collections of zhiguai did in early medieval times.

125,000 men volunteer, 75,000 become casualties, 55,000 are killed. During World War II, the most dangerous place to be as a member of the British and Commonwealth forces was in an aircraft of RAF Bomber Command. Before war broke out in 1939, those who fought were ordinary husbands, sons, fathers and brothers. Unbeknown to them, they would soon become extraordinary men. Describing what life was like for thousands of brave airmen, [Bombing Hitler](#) tells the true story of one such unsung hero from the outbreak of war, following each stage of his training to his 33 operational missions over enemy territory, each of which is recreated in detail. Detailing the life of Bernard Steel and his comrades, this story reflects on all aspects of Bomber Command life, from the dangers of training, to being an instructor, as well as the effects six years of war had on his family and ultimately himself. Providing a full and detailed story of World War II from one man's perspective, [Bombing Hitler](#) is inspired by the work of authors such as Patrick Bishop, Kevin Wilson and John Sweetman, and will appeal to those who enjoy reading about the military, in particular World War II.
