This book is an in-depth analysis of three  
of the most crucial years in twentieth-  
century Italian history, the years  
1943-46. After more than two decades of  
a Fascist regime and a disastrous war  
experience during which Italy changed  
sides, these years saw the laying of the  
political and cultural foundations for  
what has since become known as Italy's  
First Republic. Drawing on texts from the  
literature, film, journalism, and political  
debate of the period, Antifascisms offers  
a thorough survey of the personalities  
and positions that informed the  
decisions taken in this crucial phase of  
modern Italian history.

The first major French poet to  
disassociate lyric poetry from its musical  
setting, Eustache Deschamps gives  
poetry a value independent of music.

This work, Deschamps' ars poetica, examines many aspects of medieval attitudes towards poetry as well as the historical conditions of medieval life. Despite remaining incomplete, L'art de dictier is considered remarkable for its acceptance of the vernacular, its deemphasis of medieval setting, and its author's place in historical poetic tradition. In fact, Geoffrey Chaucer borrowed extensively from his French contemporary, and Deschamps returned the compliment, calling him "grand translateur" in his "Ballade adresse a Geoffrey Chaucer."

Surveying the clash of cultures in Ireland between the Gaelic, English, Anglo-Irish, and Ulster-Protestant, Lyons argues that such cultural diversity hinders the evolution of a homogenous society and thus functions as an agent of anarchy

In 1945, already known as a photographer of refined images verging on the abstract, Werner Bischof made his way by bicycle through war-torn Germany, documenting signs of human life emerging from the rubble. In luminous images - of little girls playing tag in the shell of a bombed cathedral, of a young man luxuriating in the sun smoking a cigar - Bischof captured the struggles of ordinary people incrementally resuming their daily lives in a devastated landscape.

*Separatism in Brittany* Four Courts Press  
From 1937 to 1950 the Irish government granted political asylum to a number of European minority nationalists, many of whom were wanted for crimes of collaboration with Axis forces during the Second World War. Bretons, Basques, Scots, Flemings even a high-ranking

Croat later dubbed the Yugoslav Himmler all found temporary or permanent refuge in Ireland. *Refuge Ireland* reveals for the first time why Dublin sheltered fugitives who had so disastrously regarded Nazi invasion as their nationalist opportunity. Employing unpublished sources and personal accounts, Daniel Leach explores the role of political asylum in asserting Irish sovereignty, Catholic anti-Communism and revolutionary heritage, and exposes a previously hidden and controversial chapter of Irish and European history one which, through the continued actions of postwar and even modern exiles, continues to affect Ireland's reputation to this day. "A well-researched, coherently argued and clearly written piece of work which combines scholarship with accessibility ... Leach has consulted an impressive range of original sources in a number of languages and has used them intelligently to develop a persuasive argument about the nature of Irish asylum policy". Eunan O'Halpin (author of *Defending Ireland*).

The unexpected recent discovery and synthesis of a new form of elemental carbon has initiated an abundance of papers on all aspects of the chemistry and physics of the carbon family. Carbon Molecules and Materials takes stock of the current understanding of these

various solid forms and, more particularly, of the diamond, graphite and fullerenes. After a historical background on the main properties of the element and on the latest discoveries in the field of fullerene, the chapters review the chemical and physical aspects of the allotropic forms. It describes the various properties such as thermodynamic, chemical, structural, electronic, electrical, optical and magnetic, and discusses current and potential applications. Written by scientists active in physical and chemical research on the various forms of carbon and closely related fields, the book presents a wealth of information on data and results for students and researchers interested in materials science and in the applications of advanced materials.

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider

the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Can she make organising her friend's wedding any harder?

*Abkhasians: the Long-living People of the Caucasus* CRC Press

There has always been argument about whether Pearse's leadership of the Easter Rising in 1916 represented a failure or a triumph. Pearse, who found himself on Easter Monday proclaimed President of the Provisional Government and Commander-in-Chief of the Army of the Republic, took on himself the most bitter of roles at the finish: he was the first to make the move to surrender - and he was the first to be executed. In

this re-issued major biography Ruth Dudley Edwards has placed Patrick Pearse in his historical, political and cultural context: she discusses his involvement with the Gaelic League, his role as a military leader in the nationalist movement and his claims as a socialist. Her account of his life does full justice to

the story, recording its irony, absurdity and courage. This book will do much to arouse fresh interest in Patrick Pearse; it is sympathetic, balanced, meticulously researched, and above all highly readable.
