 Markings Of Messerschmitt
 MeMesserschmitt Me 109K-4/R-3, Stab,
 III. Gruppe, JG27, Germany, Late 1944
 This 109K shows the brown and green
 style of camouflaging over various
 undersurface colours used by many
 Luftwaffe fighters closer to the end of
 the war; in a way it shows graphically
 the reversal of fortunes since 1940 when
 the RAF used such colours whilst
 German aircraft were using shades of
 grey. Camouflage and markings of

 109F-4/Trop 6. Staffel, II. Gruppe, JG3
 Sicily, Spring 1942. The above Me
 109F-4/Trop shows a fairly typical
 Luftwaffe desert colour scheme and
 markings. The basic camouflage is of
 RLM79 Sandgelb on top with RLM78
 Himmelblau underneath. The sides are
 slightly mottled with RLM80 Olivgrün.

The metre wide white band on the fuselage was standard on Luftwaffe aircraft operating in North Africa, Sicily, and Italy as it matched the similar marking of the Reggia Aeronautica; on ...Camouflage & Markings of Messerschmitt Me 109Me-262's of Kommando Nowotny had a very distinctive camouflage, particularly on the vertical tail surfaces. On the Eastern front, aircraft of several units (i.e., JG 54) appeared in greens and browns as early as 1943. A good example of a "field modification" is Messerschmitt Me-163B-0 Komet (Comet) work number (Werke Nummer) V41.
