*International Conference on Digital
Libraries (ICDL) 2013* Chandos Publishing
While the digital revolution has touched
every aspect of law librarianship,
perhaps nowhere has the effect been
more profound than in the area of
collection development. Many of the
materials law libraries traditionally
collected in print form are now available

in electronic format. Digital technology
has affected the way we select, order,
and process legal materials. The World
Wide Web has created an explosion of
both commercial and private online
publishing. The cost of electronic
publishing has caused many traditional
law book publishers to sell their
companies rather than invest in the
needed technologies to compete in the
21st century. Small publishers and book
jobbers have been forced to reinvent
themselves. The amount of legal

information available and its costs continue to soar. Law Library Collection Development in the Digital Age deals with these and other issues related to law library collection development. Chapters range from the theoretical to the practical. Inspired by Penny Hazleton's seminal paper "How Much of Your Print Collection is Really on Lexis or Westlaw?" the editors and chapter authors of Law Library Collection Development in the Digital Age endeavor to expand on professor Hazleton's work, with examinations of: the role of law libraries in strategic planning for distance learning Web mirror sites trust vs. antitrust issues access vs. ownership issues how law libraries deal with electronic court records, dockets, and filings the growth

of e-journals as they relate to legal publishing how the Hein Greenslips and Blackwell North America's Bookservice cover legal materials past, present, and future roles of specialized book jobbers and more! Anyone interested in law librarianship or the information industry will find this book informative and useful. Make it a part of your professional collection today.

Law Library Collection Development in the Digital Age Springer

While online learning was an existing practice, the COVID-19 pandemic greatly accelerated its capabilities and forced educational organizations to swiftly introduce online learning for all units. Though schools will not always be faced with forced online learning, it is apparent that there are clear advantages and

disadvantages to this teaching method, with its usage in the future cemented. As such, it is imperative that methods for measuring and assessing the effectiveness of online and blended learning are examined in order to improve outcomes and future practices. *Measurement Methodologies to Assess the Effectiveness of Global Online Learning* aims to assess the effectiveness of online teaching and learning in normal and pandemic situations by addressing challenges and opportunities of adoption of online platforms as well as effective learning strategies, investigating the best pedagogical practices in digital learning, questioning how to improve student motivation and performance, and managing and measuring academic

workloads online. Covering a wide range of topics such as the future of education and digital literacy, it is ideal for teachers, instructional designers, curriculum developers, educational software developers, academics, researchers, and students.

A practical guide for achieving equitable outcomes *From Equity Talk to Equity Walk* offers practical guidance on the design and application of campus change strategies for achieving equitable outcomes. Drawing from campus-based research projects sponsored by the Association of American Colleges and Universities and the Center for Urban Education at the

University of Southern California, this invaluable resource provides real-world steps that reinforce primary elements for examining equity in student achievement, while challenging educators to specifically focus on racial equity as a critical lens for institutional and systemic change. Colleges and universities have placed greater emphasis on education equity in recent years. Acknowledging the changing realities and increasing demands placed on contemporary postsecondary education, this book meets educators where they are and offers an effective design framework for what it means to move beyond equity being a buzzword in higher education. Central concepts and key points are illustrated through campus examples. This indispensable

guide presents academic administrators and staff with advice on building an equity-minded campus culture, aligning strategic priorities and institutional missions to advance equity, understanding equity-minded data analysis, developing campus strategies for making excellence inclusive, and moving from a first-generation equity educator to an equity-minded practitioner. *From Equity Talk to Equity Walk: A Guide for Campus-Based Leadership and Practice* is a vital wealth of information for college and university presidents and provosts, academic and student affairs professionals, faculty, and practitioners who seek to dismantle institutional barriers that stand in the way of achieving equity, specifically racial equity to achieve equitable

outcomes in higher education.

New Scientist Routledge

The latest edition of an established reference work for the physics community, presenting comprehensive details of research and development work in physics undertaken at universities in Britain and Ireland. The entry for each institution/department outlines the research programmes and lists the senior staff involved.

Comprehensively cross-referenced by a subject index, this directory facilitates channels of communication between research groups and is particularly useful to overseas physicists and to those working in industrial or government research laboratories. It also serves as a useful guide to postgraduate, postdoctoral and

sabbatical opportunities.

Routledge

The 11th International Conference on Cyber Warfare and Security (ICCWS 2016) is being held at Boston University, Boston, USA on the 17-18th March 2016. The Conference Chair is Dr Tanya Zlateva and the Programme Chair is Professor Virginia Greiman, both from Boston University. ICCWS is a recognised Cyber Security event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual and empirical advances in the area of Cyber

Warfare and Cyber Security. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of Cyberwar and Cyber Security research available to them. The keynote speakers for the conference are Daryl Haegley from the Department of Defense (DoD), who will address the topic Control Systems Networks...What's in Your Building? and Neal Ziring from the National Security Agency who will be providing some insight to the issue of Is Security Achievable? A Practical Perspective. ICCWS received 125 abstract submissions this year. After the double blind, peer review process there are 43 Academic Research Papers 8 PhD papers Research papers, 7 Masters and

1 work-in-progress papers published in these Conference Proceedings. These papers represent work from around the world, including: Australia, Canada, China, Czech Republic, District of Columbia, Finland, France, Israel, Japan, Lebanon, Netherlands, Pakistan, Russian Federation, Saudi Arabia, South Africa, Turkey, United Arab Emirates, UK, USA.

Changing Cultures in Higher Education

John Wiley & Sons

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society

and culture.

In recent years, the academy has undergone significant changes: a more competitive and volatile job market has led to widespread precarity, teaching and service loads have become more burdensome, and higher education is becoming increasingly corporatized. In this revised and expanded edition of *The Academic's Handbook*, more than fifty contributors from a wide range of disciplines and backgrounds offer practical advice for academics at every

career stage, whether they are first entering the job market or negotiating the post-tenure challenges of leadership and administrative roles. Contributors affirm what is exciting and fulfilling about academic work while advising readers about how to set and protect boundaries around their energy and labor. In addition, the contributors tackle topics such as debates regarding technology, social media, and free speech on campus; publishing and grant writing; attending to the many kinds of diversity among students, staff, and faculty; and how to balance work and personal responsibilities. A passionate and compassionate volume, *The Academic's Handbook* is an essential guide to navigating life in the academy. Contributors. Luis Alvarez, Steven

Alvarez, Eladio Bobadilla, Genevieve Carpio, Marcia Chatelain, Ernesto Chávez, Miroslava Chávez-García, Nathan D. B. Connolly, Jeremy V. Cruz, Cathy N. Davidson, Sarah Deutsch, Brenda Elsey, Sylvanna M. Falcón, Michelle Falkoff, Kelly Fayard, Matthew W. Finkin, Lori A. Flores, Kathryn J. Fox, Frederico Freitas, Neil Garg, Nanibaa' A. A comprehensive expansion to the essential higher education assessment text This second edition of Assessment Essentials updates the bestselling first edition, the go-to resource on outcomes assessment in higher education. In this thoroughly revised edition, you will find, in a familiar framework, nearly all new material, examples from more than 100 campuses, and indispensable descriptions of direct and indirect assessment methods that have helped to educate faculty, staff, and students about assessment. Outcomes assessment is of increasing importance in higher education, especially as new technologies and policy proposals spotlight performance-based

success measures. Leading authorities Trudy Banta and Catherine Palomba draw on research, standards, and best practices to address the timeless and timeliest issues in higher education accountability. New topics include: Using electronic portfolios in assessment Rubrics and course-embedded assessment Assessment in student affairs Assessing institutional effectiveness As always, the step-by-step approach of *Assessment Essentials* will guide you through the process of developing an assessment program, from the research and planning phase to implementation and beyond, with more than 100 examples along the way. Assessment data are increasingly being used to guide everything from funding to hiring to curriculum decisions, and

all faculty and staff will need to know how to use them effectively. Perfect for anyone new to the assessment process, as well as for the growing number of assessment professionals, this expanded edition of *Assessment Essentials* will be an essential resource on every college campus.

Demystifying the Institutional Repository for Success Springer Science & Business Media

ICDL conferences are recognized on of the most important platform in the world where noted expert share their experiences. Many DL experts have

contributed thought provoking papers in ICDL 2013. These important papers are reviewed and conceptualized into ICDL on different areas of DL proceedings. The Proceedings have two volumes and has over 1100 pages.

The Wireless World Routledge

This book constitutes the refereed proceedings of the 19th International Conference on Asia-Pacific Digital Libraries, ICADL 2017, held in Bangkok, Thailand, in November 2017. The 21 full papers and 6 short papers presented in this book were carefully reviewed and selected from 51 submissions. The paper topics of ICADL 2017 covered a wide spectrum from various areas, including information visualization, data mining/extraction, cultural heritage preservation, personalized service and

user modeling, novel library content and use environments, electronic publishing, preservation systems and algorithms, social networking and information systems, Internet of things, cloud computing and applications, mobile services, interoperability issues, open source tools and systems, security and privacy, multi-language support, metadata and cataloguing, search, retrieval and browsing interfaces to all forms of digital content, e-Science/e-Research data and knowledge management, and cooperative service and community service.

Institutional repositories remain key to data storage on campus, fulfilling the academic needs of various stakeholders. Demystifying the Institutional Repository

for Success is a practical guide to creating and sustaining an institutional repository through marketing, partnering, and understanding the academic needs of all stakeholders on campus. This title is divided into seven chapters, covering: traditional scholarly communication and open access publishing; the academic shift towards open access; what the successful institutional repository looks like; institutional repository collaborations and building campus relationships; building internal and external campus institutional repository relationships; the impact and value proposition of institutional repositories; and looking ahead to open access opportunities. Presents successful and creative marketing techniques of open access

benefits and repositories useful to administrators, faculty, staff, and students Strategic campus and off-campus partnerships for garnering and archiving content, including metadata specialists, off-campus librarians, local/state collaborations, including case studies Specific tools for overall success of users in locating repository research (search engine optimization (SEO), analyzing Google Analytics), and more Occupational Outlook Handbook CRC Press

Digital Libraries: Data, Information, and Knowledge for Digital Lives John Wiley & Sons

The world-class National Palace Museum (NPM) in Taiwan possesses a repository of the largest collection of Chinese cultural treasures of outstanding quality. Through implementing a two-organizational restructuring, and shifting its operational focus from being object-oriented to public-centered, it aims to capture the attention of people and promote awareness of the culture and traditions of China. In this vein, the NPM combines its expertise in museum service with the possibilities afforded by Information Technology (IT). This book

analyses the research results of a team sponsored by the National Science Council in Taiwan to observe the development processes and accomplishments, and to conduct scientific researches covering not only the technology and management disciplines, but also the humanities and social science disciplines. The development process of new digital content and IT-enabled services of NPM would be a useful benchmark for museums, cultural and creative organizations and traditional organizations in Taiwan and around the world.
