Principles of Macroeconomics

Macmillan Higher Education

With this edition, Eric Chiang continues to link economics concepts to topics of personal interest to students. The new edition is a thoroughly contemporary, fully integrated print/technology resource that adapts to the way you want to teach. As always, this concise book focuses on the topics most often covered in the principles course, but with this edition, it offers a stronger emphasis than ever on helping students apply an economic way of thinking to the overwhelming flow of data we face every day. Economics: Principles for a Changing World is fully informed by Eric Chiang's experiences teaching thousands of students worldwide, both in person and online. Developing the text, art, media, homework, and ancillaries simultaneously, Chiang translates these experiences into a cohesive approach that embodies the book's founding principles: To use technology as a tool for learning--before lectures, during class, when doing homework, and at exam time. To help students harness the data literacy they'll need as consumers of economic information.

With an accessible approach, the third European edition of Principles of Economics provides students with the tools to analyze current economic issues. The book is underpinned by a focus on seven Core Principles, which help students to make the link between economic theory and practice. The 'economic naturalist' approach,

supported by exercises, problems and examples, encourages students to employ economics principles to understand and explain the world around them. Developed from the well-regarded US textbook by Frank and Bernanke, it presents an intuitive approach to economics and is suitable for all students taking a Principles of Economics course.

Principles of Microeconomics: A Streamlined Approach seeks to promote a deeper understanding of economics by focusing on core concepts to produce economic naturalists through active learning. By eliminating overwhelming detail and focusing on core principles, students from all backgrounds are able to grasp a deeper understanding of economics. Instead of quantitative detail, the focus is on helping students become "economic naturalists," people who employ basic economic principles to understand and explain the world around them. COVID-19 pandemic content, analysis, and examples further engage students. Fewer themes, less math rigor, and a new suite of video resources allow instructors the flexibility to teach the course they want to teach, whether it's adopting a flipped classroom format, administering a course online, or just bringing more engaging, digital content into their lectures. Students benefit from more repetition of basic concepts and support through the interactive resources in Connect, resulting in a greater mastery and retention of core economic ideas. With new videos and engagement tools in Connect, like Application-Based Activities, alongside SmartBook's adaptive reading experience, the 4th

edition enables instructors to spend class time engaging, facilitating, and answering questions instead of lecturing on the basics. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.
