Act of Faith: America's longest running criminal conspiracy perpetrated against children By: Stephen Rubino
www.actoffaithbook.com About the Book
In his debut novel, trial attorney Stephen Rubino takes the reader on an electrifying journey of deceit, intrigue, tragedy, passion and ultimate redemption. At the intersection of the sacred and the profane, Act of Faith dissects the Vatican's complicity in

America's longest criminal conspiracy perpetrated against children. This multi-generational family saga is richly portrayed through an ensemble cast of unforgettable characters, revealing the secret world of the Vatican's sheltering of sexual predators to avoid bringing scandal to the faithful. Act of Faith offers an unflinching account of the still emerging sexual abuse scandal plaguing the Catholic Church and its impact on the survivors and their families across America. The story chronicles the lives of siblings Francis and Elizabeth Natale, who suffer unspeakable psychological damage after being sexually abused by their trusted parish priest. As adults, Francis and Elizabeth become estranged, each hiding their secrets in dangerous double lives. He as a gifted pianist and sexually conflicted Catholic priest, she as a reckless but highly successful trial attorney. After resigning her partnership in a major New York City law firm, Elizabeth sets out to uncover the roots of the abuse scandal and to exact her personal revenge. On a serendipitous road trip across the country, Elizabeth confronts her lifelong demons and forms an unlikely alliance with Father Thomas Atkinson, her long lost high school love who has become a Vatican whistleblower. After a tense reunion with Francis, the trio enters the super-charged environment of high stakes litigation, exposing the Church's centuries old practice of hiding sexual predators in plain sight from the religious faithful and law enforcement. Together, the trio brings to the courthouse steps the first Federal Civil Racketeering lawsuit against the Catholic Church.

Twenty years ago, there were 2500 lawyers in China, basically no legal system, and law schools and law

libraries had either been closed or destroyed. It was one of the poorest countries in the world with an adult literacy rate of one-third. Today, illiteracy has dropped to below 10 per cent, consumption has more than doubled, and China has exploded as a major economic force in the global community, with the USA alone investing billions of dollars, aside from pursuing an increasing number of untapped markets. Now with more than 100,000 lawyers and mandated Rule of Law, China has enacted a multitude of new laws, regulations, and orders that must be understood if one wants to do any kind of foreign investment or trade in that country. This work is a guide to the complex laws of China. It opens with a survey of the historical development of China's contemporary legal system, and provides a summary of Chinese legislative and regulatory institutions and their functions. It also gives an overview of the judiciary and the many forces affecting China's evolving legal system.

America's largest city generates garbage in torrents—11,000 tons from households each day on average. But New Yorkers don't give it much attention. They leave their trash on the curb or drop it in a litter basket, and promptly forget about it. And why not? On a schedule so regular you could almost set your watch by it, someone always comes to take it away. But who, exactly, is that someone? And why is he—or she—so unknown? In *Picking Up*, the anthropologist Robin Nagle introduces us to the men and women of New York City's Department of Sanitation and makes clear why this small army of uniformed workers is the most important labor force on the streets. Seeking to understand every aspect of the Department's mission, Nagle accompanied crews on their routes, questioned supervisors and commissioners, and listened to story after story about blizzards, hazardous wastes, and the insults of everyday New Yorkers. But the more time she spent with the DSNY, the more Nagle realized that observing wasn't quite enough—so she joined the force herself. Driving the hulking trucks, she obtained an insider's perspective on the complex kinships, arcane rules, and obscure lingo unique to the realm of sanitation workers. Nagle chronicles New York City's four-hundred-year struggle with trash, and traces the city's waste-management efforts from a time when filth overwhelmed the streets to the far more rigorous practices of today, when the Big Apple is as clean as

it's ever been. Throughout, Nagle reveals the many unexpected ways in which sanitation workers stand between our seemingly well-ordered lives and the sea of refuse that would otherwise overwhelm us. In the process, she changes the way we understand cities—and ourselves within them.

The topic is of particular interest for insurers as compensation for loss of housekeeping capacity is one of the main heads of damages awarded for personal injury. Naturally it also has considerable importance for accident victims. Yet it has received relatively little scholarly attention, at least from a comparative perspective. The aim of this study is to examine national approaches to the award of damages under the head of loss of housekeeping capacity, and to compare the levels of damages so awarded. The research will therefore address both the concepts employed in different national systems and, by means of practical case studies, the compensation actually paid in individual cases. The results of the research comprise ten country reports (Austria, England and Wales, France, Germany, Italy, The Netherlands, Norway, Poland,

Spain and Switzerland) based on a Questionnaire (Part I: General Part and Doctrine, Part II: Concrete Assessment Examples) and a concluding Comparative Report. This project, "Loss of Housekeeping Capacity", was undertaken at the request of the Swiss Insurance Association.
