James was only five years old and travelling home to Devon after holiday with his family in

Scotland in 1986, when tragedy struck. The car was involved in a serious accident just outside Bristol, leaving him fighting for survival on life support. When he emerged from his coma, doctors discovered that he was seriously brain damaged, leaving the left side paralysed. Within the blink of an eye James had been transformed from a gregarious, fun-loving little boy into a rag doll. But with a lot of loving support, he began the long and difficult road to recovery. His attitude was inspirational, and for years he threw himself into rehabilitation. As James grew up he began to feel misunderstood and not able to reach the level of normality he so yearned for. He felt that there was no longer any point to his life. When James asked his doctor for help, the reality of his situation suddenly struck. Suicide would be the ultimate failure. This is the story of James' life and how he fought tooth and nail to stay alive. It is both his autobiography and a guide to personal development. Since making the conscious decision not to give up hope, James has gone on to travel the world and teach English abroad. James is open and honest about the things in which he has found great solace during his darkest hours, and he credits the teachings of Kabbalah, an increasingly popular form of Jewish mysticism, for helping him refocus his life. The singer Madonna, a long term exponent of the spiritual teaching, has been an inspirational figure for James. James is now a picture of good health; despite continued weakness in his left side and a limp, he walks confidently and with a purpose.

Joe and Vera Bailey and their four daughters got caught up in a vicious and deadly civil war in Liberia in 1990. Their daughters were fifteen, twelve, ten, and two. At that time in Liberia, Charles Taylor was trying to take over the brutal regime of Samuel Doe by using even more brutal, dreadful methods. The country was in complete political, economic, and social chaos. Their very lives depended on escaping the country. Vera was allowed to escape first with the baby because little Nai Nai had been born in the United States. Vera eluded the shooting and looting to finally reach the American embassy, where she was able to get an American marine helicopter to Sierra Leone, and a flight to America. Joe and the other three girls had to wait for several agonizing months to escape, never knowing if they would ever see Vera and the baby again. Joe said that he got out of there with only *The Shirt on His Back!*

As a kid, Bernie Shakeshaft's mischievous and reckless behaviour led him to become known as the wild one of his devout Catholic family. It isn't surprising that his path led him to the Northern Territory, a place where people often go to either lose themselves or find themselves. Bernie, a searcher for his purpose in life, found himself. He had many jobs, firstly as a ringer on a cattle station owned by the Packer family, and later as a dingo trapper for the Parks and Wildlife Service. Throughout it all, he drank, he swore, he fought, and took chances with his own well-being. But, crucially, he also developed deep connections with the Indigenous people, and it was these connections that helped lay the foundations for what was to come. He worked for youth welfare organisations, and all the while he built up his knowledge about helping wayward youths, particularly those from Indigenous communities. Years later, Bernie was living in Armidale. He'd been visiting too many kids in prison and going to too many funerals. The usual methods weren't working so that reckless, mischievous kid inside him decided he could do better. He started a

youth program called BackTrack, with three aims: To keep them alive, out of jail and chasing their hopes and dreams. For most, this was their last chance. Combining life skills, education, job preparedness with rural work, Bernie threw in one other factor: dogs! And it works. With the help of these working dogs, the lost boys (and girls) find their way back on track. These days, Backtrack youth tour the country competing in dog-jumping trials. Bernie and the BackTrack team are now supporting other communities in Lake Cargelligo, Broken Hill, Dubbo and Grafton and have forged a new beginning for over 1000 young people. This one man is making a huge difference. In *Back on Track*, bestselling author James Knight tells Bernie's story and the stories of those whose lives he has saved. It is a powerful reminder that we should never give up on our kids. 'This fella Bernie, he's a good fella, a bit of a genius really. What a great story.' - Russell Crowe

Claire Dorotik grew up riding, training, and loving horses, and in many ways understood horses before she understood people. While at the time her equine companions provided her tremendous solace, it was not until she entered her graduate program for psychology, and suffered her own intense personal trauma that the amazing way in which horses heal people was actually realized. *ON THE BACK OF A HORSE: Harnessing The Healing Power Of The Human Equine Bond* is an entrance into the spiritual world of horses, the devastation of raw human trauma, and the equine facilitated psychotherapy that can help heal it. Using narrative interviews and case studies of equine experts and psychology researchers, the reader is given entrance into the world of equine facilitated psychotherapy, and in doing so, taken on an epic journey to discover how it is that these magical creatures understand so much more about human trauma than we ourselves do. Using dramatic scenes, *ON THE BACK OF A HORSE*, gives the reader an understanding of just how people experience trauma, and why. What also emerges is an understanding of what horses do that, in many ways, prevents them from experiencing trauma as people do. While human fallacies illuminate themselves, and the debilitating effects of trauma become evident, the reader is bolstered by examples of equine communication, bonding and emotional expression, providing a beautiful example of just how these amazing creatures can help people overcome trauma.

Funny and fearless, *Tales from the Back Row* is a keenly observed collection of personal essays about what it's really like to be a young woman working in the fashion industry. In *Tales from the Back Row*, Cosmopolitan.com editor Amy Odell takes readers behind the stage of New York's hottest fashion shows to meet the world's most influential models, designers, celebrities, editors, and photographers. But first, she has to push her way through the crowds outside, where we see the lengths people go to be noticed by the lurking paparazzi, and weave her way through the packed venue, from the very back row to the front. And as Amy climbs the ladder (with tips about how you can, too), she introduces an industry powered by larger-than-life characters: she meets the intimidating Anna Wintour and the surprisingly gracious Rachel Zoe, not to mention the hilarious Chelsea Handler, and more. As she describes the allure of Alexander Wang's ripped tights and Marchesa's Oscar-worthy dresses, Amy artfully layers in something else: ultimately this book is about how the fashion industry is an exaggerated mirror of human fallibility—reflecting our desperate desire to belong, to make a mark, to be included. For Amy is the first to admit that as much as she is embarrassed by the thrill she gets when she receives an invitation to an exclusive after-party, she can't help but RSVP “yes.”

Any problem can be made clearer with a picture, and any picture can be made using the same simple set of tools and rules. When Herb Kelleher was brainstorming about how to beat the traditional hub-and-spoke airlines, he grabbed a bar napkin and a pen. Three dots to represent Dallas, Houston, and San Antonio. Three arrows to show direct flights. Problem solved, and the picture made it easy to sell Southwest Airlines to investors and customers. Used properly, a simple drawing on a humble napkin is more powerful than Excel or PowerPoint. It can help us crystallize ideas, think outside the box, and communicate it in a way that other people simply 'get.' Dan Roam argues that everyone is born with a talent for visual thinking, even those who swear they can't draw. As a consultant, he's shown Microsoft, eBay, and Wells Fargo how to solve problems with pictures. Now, drawing on twenty years of visual problem solving combined with recent discoveries in vision science, he shows anyone how to clarify a problem or sell an idea by visually breaking it down using a simple set of visual-thinking tools. His strategies take advantage of everyone's innate ability to look, see, imagine, and show. The Back of the Napkin proves that thinking with pictures can help you discover and develop new ideas, solve problems in unexpected ways, and dramatically improve your ability to share your insights. This book will help you literally see the world in a new way. 'Inspiring! It teaches you a new way of thinking in a few hours - what more could you ask from a book?' Dan Health, author of *Made to Stick* 'As painful as it is for any writer to admit, a picture *is* sometimes worth a thousand words. That's why I learned so much from this book. With style and wit, Dan Roam has provided a smart, practical primer on the power of visual thinking.' Daniel H. Pink, author of *A Whole New Mind* 'This book is a must-read for managers and business leaders. Visual thinking frees your mind to solve problems in unique and effective ways.' Temple Grandin, author of *Thinking in Pictures* 'Visual information is much more interesting than verbal information. So if you want to make a point, do it with images, pictures or graphics.' Roger Black, media design leader, author of *Websites That Work* 'We all dread business meetings with their mountains of documents and the endless bulleted PowerPoints, Roam cuts through all that to demonstrate how simple drawings - executed while the audience watches - communicate infinitely better than those complex presentations.' Bill Yenne, author of *Guinness: The 250 Year Quest for the Perfect Pint* 'If you want to communicate in the global economy, you need only learn one new language: the language of visual thinking. Even if you have two left brains and no artistic talent, Dan Roam will have you running to the whiteboard, dazzling colleagues with your ability to summarize complicated concepts with simple pictures.' Chelsea Hardaway, author of *Why Business People Speak Like Idiots*

The eclectic stories in this collection are bound by the threads of desire in its many forms, above all, the desire for love and a place of safety in a world where being Black and gay can thwart the fulfillment of that longing. The characters are complex, driven, difficult, and even, at times, unsympathetic, but always compelling. In other words: fully rounded human beings living complicated lives. A proud Black woman who escaped her rural, impoverished town returns after the collapse of her marriage and faces the scorn of those she left behind. A middle-aged gay man finds his loneliness temporarily relieved by the arrival of a stray cat. An unhappily married woman becomes enmeshed in her bisexual husband's attempt to create a ménage à trois with a much younger man. A 16-year-old boy discovers the power of his sexuality when he embarks upon a dangerous seduction. Two Black men, one mature and rich, the other young and struggling, are drawn into a contentious affair by their shared love of opera. The legendary blues singer Gladys Bentley crashes up against the barriers of race and gender when she gets caught up in a police raid. *Kiss the Scars on the Back of My Neck* is a masterful collection of stories by a gifted writer who has fully hit his stride.

The triumph of foot reflexology began with the discovery of the system by the American physician

William Fitzgerald at end of the 19th Century . Eunice Ingham developed the concept further . Meanwhile, the effectiveness of foot reflexology has been documented in many scientific studies worldwide. In reflexology on the feet we get a glimpse of the state of the connective tissue in the relevant organs and the treatments allow us to solve inner conflicts both physically as well as mentally . We can also clear energy blockages and it is even possible to adjust vertebrae shifts back by foot reflexology . Going one step further there are measures which allow an influence to the human energy field, the "aura". In this way, the emotional and spiritual areas are addressed. Dear friends of reflexology, thank you for your interest in my reflexology charts which have proven their effectiveness in nearly three decades. The charts of the »maps of health« represent the organs as icons. This offers a symbolic language which allows an orientation at a glance in all reflexology systems. The reflexology charts with their descriptive illustrations provide you with a useful aid for your treatments. Additionally you can use the result sheets for documentation of your experiences Joy and success with reflexology ! Ewald Kliegel

Imagine what it would be like to go back in time to the 15th century Venice. And imagine what it would be like to meet your lifelong hero, Michelangelo. And imagine what it would be like if, on first meeting, you spill a tray of pasta and wine on that very same hero. Well, that's what happens to serious young artist Mark Breen. As the result of a drunken bet, Mark knocks out a painting of a toilet bowl. Much to his amazement, he sells it. In short order he's hailed as the new Andy Warhol and becomes an overnight sensation-and a very wealthy man. Soon, images of his toilet bowls are on more t-shirts, mugs, and calendars than Edvard Munch's *The Scream*. His friend and mentor, Hugh Connelly, afraid that Mark is in danger of losing his "artistic soul," advises him to go back to Italy and acquaint himself with the "old masters." In Venice, Mark falls in love with Alexandra, a beautiful art restorer, but it's a one-sided affair. One night, hoping to win her over, he climbs up on a roof to find out who painted her favorite fresco. He falls off the roof and wakes up in 15th century Venice where he meets an innkeeper named Francesca, who looks exactly like Alexandra. And it gets curiously and curiously from there. During his stay-which is sometimes zany and sometimes frightening-he meet his hero, Michelangelo, who teaches him the true meaning of art.
