Network Analysis & Synth S. Chand
Publishing

This book provides a strong foundation in Quantitative Methods for management students who come from different disciplines. It has been designed

according to the latest syllabi of the Bharathiar University and Anna University. The book is prepared with utmost care and rules out the necessity of referring any other book as it is self-contained. This book will surely prove to be a good reference book for both the students and teachers.

Logistics and Supply Chain Management
Sultan Chand & Sons

Data Structures and Object-Oriented

Programming with C++ has been

specifically designed and written to meet

the requirements of the engineering

students. This is a core subject in the

curriculum of all Computer Science

programs. The aim of this book is to help

the students develop programming and

analytical skills simultaneously such that

they are able to design programs with

maximum efficiency. C language has

been used in the book to permit the

execution of basic data structures in a

variety of ways. This book also provides

an in-depth coverage of object-oriented

concepts, such as encapsulation,

abstraction, inheritance, polymorphism,

message passing and dynamic binding,

templates, exception handling, streams

and standard template library (STL) in

C++.

Professional Ethics and Human Values Vikas Publishing House

Engineering Chemistry-I

Theory, Analysis, and Design Sultan

Chand & Sons

The book presents comprehensive

coverage of fundamental computer

graphics concepts in a simple, lucid, and

systematic way. It uses C programming language to implement various algorithms explained in the book. It also introduces the popular OpenGL programming language with illustrative examples of the multiple primitive functions in OpenGL. The book teaches you a wide range of exciting topics such as graphics devices, scan conversion, polygons, segments, 2D and 3D transformations, windowing and clipping, 3D object representation, illumination models and shading algorithms, colour models, visible surface detection algorithms, curves, grammar-based models, turtle graphics, ray tracing, and fractals. The book also explains concepts in animation.

The book is written for an undergraduate course on the 8085 microprocessor and 8051 microcontroller. It provides comprehensive coverage of the hardware and software aspects of 8085 microprocessor and 8051 microcontroller. The book is divided into two parts. The first part focuses on 8085 microprocessor. It teaches you the 8085 architecture, instruction set, Assembly Language Programming (ALP), interfacing 8085 with support chips, memory and peripheral ICs - 8251, 8253, 8255, 8259, 8237 and 8279. It also explains the interfacing of 8085 with data converters - ADC and DAC - and introduces a temperature control system and data acquisition system design. The second part focuses on 8051 microcontroller. It teaches you the 8051

architecture, instruction set, programming 8051 with ALP and C and interfacing 8051 with external memory. It also explains timers/counters, serial port and interrupts of 8051 and their programming in ALP and C. It also covers the interfacing 8051 with data converters - ADC and DAC, keyboards, LCDs, LEDs, stepper motors, servo motors and introduces the washing machine control system design.

Learning to communicate Technical Publications

PREFACE This text book is an outcome of more than 22 years of teaching experience of the authors through classroom lectures, faculty feedback, student's expectations and university demands. It is designed to cover all the units of third semester, Anna University, Chennai, as per the new regulations. The authors have calculated more than thirteen years past question papers and prepared a very comprehensive material that help the students directly to handle all types of questions in the examinations. Salient features 100 % syllabus coverage. More examples with step-by-step explanation. Complicated problems are simplified. Supported by clear illustrations. Anna University Q & A are solved. Each and every step is explained very clear. Related formulas are given in each problem. Easy to understand solutions. Diagrams are given wherever necessary. Each unit is added with solved PART A questions.

Operating System (For Anna) Vikas Publishing House

The book is written for an undergraduate course on the 8086 microprocessor and 8051 microcontroller. It provides comprehensive coverage of the hardware and software aspects of 8086 microprocessor and 8051

microcontroller. The book is divided into three parts. The first part focuses on 8086 microprocessor. It teaches you the 8086 architecture, instruction set, Assembly Language Programming (ALP), interfacing 8086 with support chips, memory, and peripherals such as 8251, 8253, 8255, 8259, 8237 and 8279. It also explains the interfacing of 8086 with data converters - ADC and DAC and introduces a traffic light control system. The second part focuses on multiprogramming and multiprocessor configurations, numeric processor 8087, I/O processor 8089 and introduces features of advanced processors such as 80286, 80386, 80486 and Pentium processors. The third part focuses on 8051 microcontroller. It teaches you the 8051 architecture, instruction set, programming 8051 and interfacing 8051 with external memory. It explains timers/counters, serial port, interrupts of 8051 and their programming. It also describes the interfacing 8051 with data converters - ADC and DAC, keyboards, LCDs, LEDs, stepper motors, and sensors.

- Some benefits of studying from Oswaal JEE (Main)' Solved Papers (Question Bank) 2022 are: • Chapter-wise and Topic-wise • Trend Analysis:Chapter-wise • Latest JEE (Main) Question Papers (Four shifts) 2021- Fully solved • Previous Years' (2019-2021)Exam Questions to facilitate focused study • Mind Maps:A single page snapshot of the entire chapter for longer retention • Mnemonicsto boost memory and confidence • Oswaal QR Codes:Easy to scan QR codes for online concept based content • Two SQPsbased on the latest pattern • Tips to crack JEE (Main)

Engineering Chemistry-I (For 2nd

Semester of Anna University) Vikas Publishing House

Electronic Devices is designed specifically to cater to the needs of second semester ECE students of Anna University. The book has a perfect blend of focused content and complete coverage. Solved Anna University question papers, which are tagged with specific topics, will be extremely helpful to students from the examination point of view. Simple, easy-to-understand and difficult-jargon-free text elucidates the fundamentals of electronics. Several solved examples, circuit diagrams and adequate questions further helps students to understand and apply the concepts

Firewall Media

The book covers all the aspects of theory, analysis, and design of Electronic Circuits for the undergraduate course. The concepts of feedback amplifiers and oscillators, tuned amplifiers, wave shaping and multivibrator circuits, power amplifiers, and DC converters are explained in a comprehensive manner. The former part of the book focuses on the fundamental concepts of feedback amplifiers and oscillators. It explains the analysis of series-shunt, series-series, shunt-shunt, and shunt-series feedback amplifiers, stability and frequency compensation in feedback amplifiers. The concepts of the Barkhausen criterion for oscillations and the detailed analysis of various oscillator circuits including phase shift, Wien bridge, Hartley, Colpitt's, Clapp, ring, and crystal oscillators are included in the book. The oscillator amplitude stabilization is explained in support. Then the book focuses on the fundamental concept of tuned amplifiers. It explains topics such as coil losses, unloaded and loaded Q of tank circuits, analysis of single and

double tuned amplifiers, the effect of cascading single tuned and double tuned amplifiers on bandwidth, stagger tuned amplifiers, stability of tuned amplifiers, and neutralization methods. The later part of the book incorporates the detailed analysis of various wave shaping circuits, including high pass and low pass RC and RL circuits, clipper and clamper circuits, bistable, monostable, and astable multivibrator circuits. The discussion of Schmitt trigger circuits and UJT is also included in the book. Finally, the book explains the class A, B, and C types of power amplifiers along with the discussion of the elimination of cross-over distortion. The book also covers the concepts of power amplifiers using power MOSFET and various types of d.c. to d.c. converters. The book uses plain and lucid language to explain each topic. The variety of solved examples is the feature of this book. The book explains the philosophy of the subject, which makes the understanding of the concepts very clear and makes the subject more interesting.

Transforms and Partial Differential Equations S. Chand Publishing

Throughout the book, emphasis has been laid on developing the concepts, clarifying the units to be used in final equations and neatly presenting solutions for the numerical problems. The features of this 'one-stop' book will help the students to prepare themselves for taking up the design papers taught in higher classes. Key Features

1. Use of SI units
2. Summary of important concepts and formulae at the end of the book
3. Large number of solved problems, presented systematically
4. Large number of exercise problems
5. Simple and clear explanation of concepts
6. Generous use of diagrams for better understanding
7. Includes University

question papers

Applied Geology (For Anna) Oswaal Books and Learning Private Limited

The textbook on microprocessors and microcontrollers has been developed as per the latest syllabus requirements of ECE, CSE & IT branches of engineering. Its lucid explanation and strong features such as design-based exercises, ample examples, review questions and assembly language programming examples lay a solid foundation for the subject.

Computer Graphics Vikas Publishing House

Operating System is an insightful work that elaborates on fundamentals as well as advanced topics of the discipline. It offers an in-depth coverage of concepts, design and functions of an operating system irrespective of the hardware used. With neat illustrations and examples and presentation of difficult concepts in the simplest form, the aim is to make the subject crystal clear to the students, and the book extremely student-friendly.

Quantitative Methods in Management Sree kamalamani Publications private limited

The book has all the assessment tools like assessment exercise, short questions with answers, fill in the blanks and multiple choice questions (MCQ).

Electronic Devices S. Chand Publishing

Question Bank - Financial Management is a book designed to assist the readers to develop an understanding of the rapidly evolving and existing theory of finance. Questions are framed in such a way that the readers will be able to quickly connect with the contents. The appropriate answers to the questions will lessen the burden of the students trying to navigate for answers like in conventional means. It is a ready

reckoner of short and long answer questions along with past question papers

Question Bank: Financial

Management Oswaal Books and Learning Private Limited

Applied Geology is a multidisciplinary subject that interacts with other disciplines, such as mineralogy, petrology, structural geology, hydrogeology, seismic engineering, rock engineering, soil mechanics, geophysics, remote sensing (RS-GIS-GPS), environmental geology, etc. This book, entitled Applied Geology, is the only one of its kind in the Indian market that caters to the needs of all these subjects. This book covers all aspects of Applied Geology and is intended to serve BTech

students. A plethora of examples and case studies relevant to the Indian context have been included for better understanding of the geological challenges faced by engineers.
