Airmetrics: MiniVol Calibration and Auditing Procedures

Minivol Portable Air Sampler Operation While not a reference method sampler, the MiniVol™ TAS gives results that closely approximate data from Federal Reference Method samplers. Lightweight and portable, the MiniVol™ TAS is ideal for remote areas or locations where no permanent site has been established. Basic Operation & Technical Specifications Airmetrics: Products & Services - MiniVol Portable Air Sampler The MiniVol™ portable air sampler can be configured to collect either PM2.5, PM10, or TSP samples - but only one type at a time. The MiniVol's pump draws air at 5 liters/minute through a particle size separator (impactor) and then through a 47mm filter. Airmetrics: MiniVol Basic Operation Principles of Operation The MiniVol Portable Air Sampler is basically a pump controlled by a programmable timer which can be set to make up to six "runs" within 24 hours or throughout a week. When used outdoors it may be hung from a bracket mounted on a variety of structures—utility poles, trees, fence posts, etc. MiniVol Portable Air Sampler Operation Manual The MiniVol™ Tactical Air Sampler (TAS) is a portable ambient air sampler for particulate matter that can also be configured for sampling various air toxics. The patented low flow technology used in the MiniVol™ TAS was developed jointly with the U. S. Environmental Protection Agency (EPA) in an effort to address the need for Operation Manual The MiniVol® Tactical Air Sampler (TAS) is based on the original MiniVol® air sampler, developed jointly by Airmetrics and the United States Environmental Protection Agency (EPA) in 1990. Implementing patented low-flow technology, the TAS delivers precise and accurate results in a lightweight compact device. The MiniVol® TAS is a versatile The MiniVol® Tactical Air Sampler (TAS) The MiniVol portable air sampler can be configured to collect either PM2.5, PM10, or TSP samples - but only one type at a time.
