EVER GET THE
FEELING that
technology is
taking over
your life and

not asking you
first? When
you've mislaid
that important
file or can't
connect your
new camera,
do you just
want to hurl
your computer
out of the
window?
When your
kids/friends/gr
andparents
start talking
about
blogging,
podcasting
and RSS feeds
do you nod as
wisely as you
can while
wrestling with
the urge to
throw them
out of the
window too?
The bad news
is that

technology isn't going away. The good news is that, by picking up this book, you're halfway to making it work for you - not against you. Loose Wire is a compilation of Jeremy Wagstaff's most popular weekly columns on personal technology from The Wall Street Journal Asia and the Far Eastern Economic Review. An ordinary person's primer on technology, Loose Wire explains - in

jargon-free language and real sentences - what has happened over the past few years, from the rise of the mobile phone to phishing, to where we are heading, as well as hands-on, practical advice about how to enjoy the ride.

ABOUT THE AUTHOR

Jeremy Wagstaff has worked as a journalist since 1986 - for the BBC, Reuters, The Wall Street Journal and the Far Eastern Economic

Review. Most of that time has been spent in Asia, covering uprisings, wars, colonial retreats and the odd (sometimes very odd) press conference. No techie, his interest in technology grew out of a realization that it was changing the way journalists - and the world - work, and that following it would probably be a better idea than fighting it. Since 2000 he has been writing a

technology column and has since 2004 appeared regularly on the BBC World Service. He also keeps a blog at www.loosewireblog.com. **PC Mag World Scientific** This book includes a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the areas of Computing Sciences, Software Engineering and Systems. The book

presents selected papers from the conference proceedings of the International Conference on Systems, Computing Sciences and Software Engineering (SCSS 2006). All aspects of the conference were managed online. **PC Mag** John Wiley & Sons PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest

products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. **MacUser** Equinox Publishing InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects. *Technology Tools for Today's High-*

<p><i>Margin Practice</i> Kendall Hunt The ABA Journal serves the legal profession. Qualified recipients are lawyers and judges, law students, law librarians and associate members of the American Bar Association. <i>Software and CD-ROM Reviews on File Joy Life Books</i> From the individual to the largest organization, everyone today has to make investments in IT. Making a</p>	<p>smart investment that will best satisfy all the necessary decision- making criteria requires careful and inclusive analysis. This textbook provides an up-to-date, in- depth understanding of the methodologies available to aid in this complex process of multi-criteria decision- making. It guides readers on the process of technology acquisition ? what methods</p>	<p>to use to make IT investment decisions, how to choose the technology and justify its selection, and how the decision will impact the organization. U nique to this textbook are both financial investment models and more complex decision- making models from the field of management science so that readers can extend the analysis benefits to enhance and confirm their IT investment choices. The</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

wide range of methodologies featured in the book gives readers the opportunity to customize their best-fit solutions for their unique IT decision situation. This textbook is especially ideal for educators and students involved in programs dealing with technology management, operations management, applied finance, operations research, and industrial engineering. A complimentary copy of the

?Instructor's Manual and Test Bank? and the PowerPoint presentations of the text materials are available for all instructors who adopt this book as a course text. Please send your request to sales@wspc.com.

Proprietors of home and small offices will learn how to streamline their electronics budget and boost computer productivity in this step-by-step guide to buying and managing low-cost, high-yield computer systems. The guide describes in plain English the kinds of hardware and software to buy, where to purchase them for less money, how to

install and operate them, and how to integrate system components so that they work together as a seamless digital whole. With an enlightened understanding of their digital workspace, small business owners will boost business performance, save money, and free up time for more essential office tasks. *PC Mag* InfoWorld is targeted to Senior IT professionals. software user's guide for Windows Tired of spending more time with filing cabinets than with clients? Is overhead eating up margins? Now, two leading financial planners and columnists deliver the help advisers have been begging for. *Virtual-Office Tools for a High-Margin Practice* is a nontechnical trove of technology, clever workarounds, and procedural efficiencies

tailored to help financial advisers move toward a paperless office, while still complying with SEC record-keeping requirements. The authors show planners how to reduce the amount of paperwork in their offices by 99 percent, slash overhead, and find anything they need in one minute or less by adapting innovative software tools and shifting from on-site employees to remote assistants and

virtual work partners. Until now, creative ways of working this smart were hard to come by. With this book, they are available, ready to go, and easy to implement.
