The Texas Model for Comprehensive School Counseling Programs is a resource to develop effective and high quality comprehensive school counseling programs that align with Texas statutes and rules governing the work of school counselors. It outlines a process for tailoring school counseling programs to meet the varying needs of students across an array of school districts through implementation of the four components of school counseling programs, Guidance Curriculum, Responsive Services, Individual Planning, and System Support. With this resource, a school counselor will learn to use campus-specific data to identify the unique needs of a campus and design a comprehensive school counseling program to meet those needs.

Recognizing the important roles of the entire educational community, the Texas Model for Comprehensive School Counseling Programs provides examples of how parents, teachers, administrators, principals and school counselors can best contribute to implementation of each of the four components of comprehensive school counseling programs. It provides a developmental framework for a school counseling program curriculum that includes activities at each grade level to enhance students' educational, career, personal and social development.

As a united global economy evolves, economists and policymakers are forced to consider whether the current system of taxing income is inconsistent with the trend toward liberalized world financial flows and increased international competition. To help assess existing tax policies and incentives, this volume presents new research on how taxes affect the investment and financing decisions of multinationals today. The contributors examine the effects of taxation on decisions about international financial management, business investment, and international income shifting. They consider the influence of tax rules on dividend policy decisions within multinationals; the extent to which tax incentives affect the level and location of research and development across countries; and the fact that foreign-controlled companies operating in the United States pay lower taxes than do domestically controlled companies. The contributors to this volume are Rosanne Altshuler, Alan J. Auerbach, Neil Bruce, Timothy Goodspeed, Roger H. Gordon, Harry Grubert, Bronwyn H. Hall, David Harris, Kevin Hassett, James R. Hines Jr., Roy D. Hogg, Joosung Jun, Jeffrey K. Mackie-
