The coastal and

archipelago areas in the
Baltic Sea are popular
destinations for a number
of tourists. An important
group of tourists is
boaters, who visit the
coastal areas during a
short summer period.
Boat owners are
sometimes pictured as
having a great interest for
the nature and a
willingness to do right.
Pollution from pleasure
boats such as discharges
of oil and fuel, antifouling
paints and cleaning
agents have a negative
impact on the coastal
environment.

Environmentally sound
alternatives exist to some
extent, but are not very
common. Sustainable
alternatives for boaters
are lacking behind. One of
the underlying purposes
of this study was to
understand how we can
help boat owners change
their behaviour and
decrease the negative
impact on the marine
environment. The survey
among boaters has been
conducted in Finland,
Sweden and Denmark
with a web based survey
ordered by the Keep
Sweden Tidy Foundation
together with Keep the
Archipelago Tidy
Association in Finland and
the Danish Outdoor
Council. The research was
performed by SIFO

Research International.

House, Inc.

More and more sailors
and powerboaters are
buying and relying on
electronic and electric
devices aboard their
boats, but few are aware
of proper installation
procedures or how to
safely troubleshoot these
devices if they go on the
blink.

Jane's High-speed Marine
Craft Nordic Council of
Ministers

Describes and illustrates
the navies of over 170
nations of the world.

Marine Engineers Review
Macmillan

Author Vizard covers
blending the bowls, basic
porting procedures, as
well as pocket porting,
porting the intake
runners, and many
advanced procedures.

Advanced procedures
include unshrouding
valves and developing the
ideal port area and angle.

Asian Shipping Naval Inst
Press

Provides extensive
information on state-of
the art diesel fuel
injection technology.
