Understanding Regression Analysis by Michael Patrick Allen ...Regression analysis is a process of finding the mathematical model that best fits the data. This is an applied course that emphasizes data analysis and interpretation using the statistical software package Stata. The course begins with a (very) brief review of the necessary ingredients from probability and statistics.

There are two key terms that are important in reporting regression analysis: (1) regression coefficients symbolized by the Greek letter beta ( $\beta$  or  $\beta$ ) and (2) the R<sup>2</sup>coefficient. First lets cover the regression coefficients. These coefficients refer to the size of the unique association between the predictors and the outcome.
