 What is Statistical Process Control (SPC) SPC is method of measuring and controlling quality by monitoring the

manufacturing process. Quality data is collected in the form of product or process measurements or readings from various machines or instrumentation.  
 SPC | Statistical Process Control | Quality-One  
 The concepts of Statistical Process Control (SPC) were initially developed by Dr. Walter Shewhart of Bell Laboratories in the 1920's, and were expanded upon by Dr. W. Edwards Deming, who introduced SPC to Japanese industry after WWII. After early successful adoption by Japanese firms, Statistical Process Control has now been incorporated by organizations around the world as a primary tool to improve product quality by reducing process variation.  
 Statistical Process Control (SPC) Tutorial  
 Statistical Process Control, part of IATF 16949 core tools, is an analytical decision-making tool that allows the organization to determine whether the process is performing correctly or not. SPC is a method of measuring and controlling quality by monitoring the manufacturing process.  
 IATF 16949: How to establish Statistical Process Control (SPC)  
 Statistical Process Control (SPC) Statistical Process Control (SPC) helps ensure that the solution created is maintained over time. By using these tools, your process can remain in control. Statistical Process Control and Stability of Process

 Statistical Process Control book is

one my best book. This book shows accuracy, and precision definitions of measurement on page 8. I like to go at the end of chapter quiz, because if I can not understand any concept, the book recomendate to get back to see once again the section and understand it.
