Twelfth Planet Press

Recipient of the

Independent Publishers

Award for Historical

Fiction (Gold Medal), the

Foreword Book of the Year

Award for Historical

Fiction (Bronze Medal),

and an honorable mention

in the category of General

Fiction for the Eric Hoffer

Award. Luis de Santánel,

chancellor to the court

and longtime friend of the

lusty King Ferdinand, has

had enough of the

Spanish Inquisition. As the

power of Inquisitor

General Tomás de

Torquemada grows, so

does the brutality of the

Spanish church and the

suspicion and paranoia it

inspires. When a dear

friend's demise brings the

violence close to home,

Santánel is enraged and

takes retribution into his

own hands. But he is from

a family of conversos, and

his Jewish heritage makes him an easy target. As Santánel witnesses the horrific persecution of his loved ones, he begins slowly to reconnect with the Jewish faith his family left behind. Feeding his curiosity about his past is his growing love for Judith Migdal, a clever and beautiful Jewish woman navigating the mounting tensions in Granada.

While he struggles to decide what his reputation is worth and what he can sacrifice, one man offers him a chance he thought he'd lost...the chance to hope for a better world. Christopher Columbus has plans to discover a route to paradise, and only Luis de Santánel can help him. Within the dramatic story lies a subtle, insightful examination of the crisis of faith at the heart of the Spanish Inquisition. Irresolvable conflict rages within the conversos in *By Fire, By Water*, torn between the religion they left behind and the conversion meant to ensure their safety. In this story of love, God, faith, and torture, fifteenth-century Spain comes to dazzling, engrossing life.

Where is God in the

universe if anywhere?

Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book

attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider that

During the muscle car wars of the 1960s, Holley carburetors emerged as the carbs to have because of their easy-to-tune design, abundance of parts, and wide range of sizes. The legendary Double Pumper, the universal 600-cfm 1850 models, the Dominator, and now the Avenger have stood the test of time and are the leading carburetors in the high-performance engine market. To many enthusiasts, the operation, components, and rebuilding procedures remain a mystery. Yet, many carburetors need to be rebuilt and properly set up for a particular engine package. Veteran engine building expert and automotive author Mike Mavrigian guides you through each important stage of the rebuilding process, so you have the best operating carburetor for a particular engine and application. In addition, he explains carb identification as well as idle, mid-range and high-

speed circuit operation, specialty tools, and available parts. You often need to replace gaskets, worn parts, and jets for the prevailing weather/altitude conditions or a different engine setup. Mavrigian details how to select parts then disassemble, assemble, and calibrate all of the major Holley carburetors. In an easy-to-follow step-by-step format, he shows you each critical stage for cleaning sensitive components and installing parts, including idle screws, idle air jets, primary/secondary main jets, accelerator pumps, emulsion tubes, and float bowls. He also includes the techniques for getting all of the details right so you have a smooth-running engine. Holley carburetor owners need a rebuilding guide for understanding, disassembling, selecting parts, and reassembling their carbs, so the carb then delivers exceptional acceleration, quick response, and superior fuel economy. With *Holley Carburetors: How to Rebuild* you can get the carb set up and performing at its best. And, if desired, you can move to advanced levels of tuning and modifying

these carbs. If you're looking for the one complete book that helps you quickly and expertly rebuild your Holley and get back on the road, this book is a vital addition to your performance library.

Affectionately known as 'Koss', Paul Kossoff's playing touched people. It still does today, more than forty years after his sad and untimely death at the age of twenty-five. This authorised biography pays fitting tribute to a much-loved and widely admired musician whose influence and inspiration is still very evident. It's all here: Kossoff's musical childhood, his formative years with Black Cat Bones, forming Free at seventeen, that group's dizzying success, breakup, reforming and dissolution, the solo years, Back Street Crawler - the sessions, the tours and big concerts, the triumphs, the tragedies and the heartbreak - J.P. James takes the reader right there. Over four distinct sections, Kossoff's many guitars and the equipment he used to make them sing are fully documented; a brand-new detailed analysis of

Kossoff's distinctive playing style and technique is presented for the first time; a broad overview of Kossoff's creative life draws on the voices of family, friends and fellow musicians; and finally, Kossoff's musical influences, approach to playing and his wider musical interests, hopes and dreams are explored - all drawn from his own words. Cramming so much into his short years, Paul Kossoff left a rich musical legacy, and he is indeed All Right Now. Thoroughly researched and sensitively written, given often in Kossoff's own words and packed with anecdotes from those who were there, musicians and fans alike will enjoy this authoritative and comprehensive biography.

Tissue Engineering
CarTech Inc

Teens form an all-girl band in the face of an impending comet. A woman faces giant spiders to collect silk and protect her family. New friends take their radio show on the road in search of plague survivors. A man seeks love in a fading world. How would you survive the apocalypse? Defying Doomsday is an anthology of apocalypse fiction

featuring disabled and chronically ill protagonists, proving it's not always the "fittest" who survive - it's the most tenacious, stubborn, enduring and innovative characters who have the best chance of adapting when everything is lost. In stories of fear, hope and survival, this anthology gives new perspectives on the end of the world, from authors Corinne Duyvis, Janet Edwards, Seanan McGuire, Tansy Rayner Roberts, Stephanie Gunn, Elinor Caiman Sands, Rivqa Rafael, Bogi Takács, John Chu, Maree Kimberley, Octavia Cade, Lauren E Mitchell, Thoraiya Dyer, Samantha Rich, and K L Evangelista.

Designing and Tuning High-Performance Fuel Injection Systems Hirmer Verlag GmbH

In How to Super Tune and Modify Holley Carburetors, best selling author Vizard explains the science, the function, and most importantly, the tuning expertise required to get your Holley carburetor to perform its best for your performance application.

CIA Lock Picking Greg Egan

"This new volume on applications and advances in tissue engineering presents significant, state-of-the-art developments

in this exciting area of research. It highlights some of the most important applied research on the applications of tissue engineering along with its different components, specifically different types of biomaterials. It looks at the various issues involved in tissue engineering, including smart polymeric biomaterials, gene therapy, tissue engineering in reconstruction and regeneration of visceral organs, skin tissue engineering, bone and muscle regeneration, and applications in tropical medicines. Covering a wide range of issues in tissue engineering, the volume Provides an overview of the efficacy of the different biomaterials employed in tissue engineering (such as skin regeneration, nerve regeneration, artificial blood vessels, bone regeneration). Looks at smart polymeric biomaterials in tissue engineering Discusses the hybrid approach of tissue engineering in conjunction with gene therapy Explores using tissue engineering in the management of tropical diseases Considers various skin tissue

engineering applications, including wound healing methods, skin substitutes and other materials
 Reports on the use of various biomaterials in bone and muscle regeneration
 Describes the use of tissue engineering in reconstruction and regeneration of visceral organs
 Covers polysaccharides and proteins-based hydrogels for tissue engineering applications
 Providing an abundance of advanced research and information,
Tissue Engineering: Applications and Advancements will be a valuable resource for medical researchers, pharmaceutical manufacturers, healthcare personnel, and academicians"--
By Fire, By Water CarTech Inc
 Looks at the combustion basics of fuel injection engines and offers information on such topics as VE equation, airflow estimation, setups and calibration, creating timing maps, and auxiliary output controls.
Competition Engine Building IDW Publishing
 There has been much opinion and little fact written on the subject of lock picking. It is the purpose of this book to

clarify the facts about this delicate process, and at the same time to train you in proper procedure.
 Reading this book is certainly enough to get you started picking simple locks, but remember: a great deal of time and patience are needed to become a truly proficient locksmith. In this volume, you will learn the fundamental theories of lock picking in addition to proper terminology, the importance of tool design (i.e. how to select and use the right tool for a given job), the effects of tolerances, and finally the techniques most commonly used by locksmiths to successfully pick the vast majority of standard pin and wafer tumbler locks. Lock picking is a useful, engaging, and satisfying skill; with this book and a little determination, you'll be off to a great start.

 With the increasing popularity of GM's LS-series engine family, many enthusiasts are ready to rebuild. The first of its kind, *How to Rebuild GM LS-Series Engines*, tells you exactly how to do that. The book explains variations between the various LS-series engines and elaborates up on the features that make this engine family such an excellent design. As with all Workbench titles, this book details and highlights special components, tools, chemicals, and other accessories needed to get the job done right, the first time. Appendices are packed full of valuable reference information, and the book includes a Work-Along Sheet to help you record vital statistics

and measurements along the way.

In honor of First Contact Day, IDW is thrilled to present a special digital edition of Star Trek: First Contact, the official comic tie-in to the beloved movie. When the Borg attempt to alter the history of the universe by traveling back in time to stop Earth's first encounter with alien life, it's up to Captain Jean-Luc Picard and the crew of the Enterprise to stop them... if they aren't assimilated first! Adapted by writer

John Vornholt and artists Rod Whigham and Terry Pallot from the story written by Rick Berman, Brannon Braga & Roland D. Moore.

GM Automatic Overdrive Transmission Builder's and Swapper's Guide
Giorgio Nada Editore Srl
Containing 26 selected and thoroughly rewritten essays and articles (all written by Janssen and published previously between 1976 and 2002 in yearbooks and periodicals) all dedicated to the history of printing and book production, this work draws systematically attention to the typogtaphical design of the book. The articles are mainly divided into two fields of attention: the analytical bibliography of the printed book (book production, studies of the technical aspects of type-setting and printing, type founding, printing presses, paper etc.) and the typographical design of books (its functions and its influence on how texts are read).

Fiat's first agricultural tractor was presented to the civil and military authorities of Turin in 1918 and marketed the following year by the Federation of Agricultural Consortia. This book uses original photographic documentation to illustrate the origins and development of the company's agricultural products, tackling the technical and human aspects of a story that has seen the introduction of over 500 models since 1918. This is the first comprehensive study of the Turin-based firm's history in the agricultural sector. This updated edition includes all the new Holland new series presented from 2008 up to 2011.
