 . . . the book is in a comprehensive,
 readable format. . . the book is logically
 organised, rich in data and statistics
 regarding the issues that it covers, as well
 as accessibly written such that its points
 would not be lost on the average upper-
 level undergraduate student with some
 preparation in Asian studies and the social
 sciences. Jane M. Ferguson, South East
 Asia Research . . . a serious academic
 work that should be on the official reading
 list of every media studies course. Chris
 Roberts, Presenter, Sky News Jonathan
 Woodier has written an excellent book on
 the politics of media control in Southeast
 Asia. He shows how political elites in the
 region are using major events such as the

1997 Asian Financial Crisis and the 2001
 September 11 terror attacks as well as
 innovations in media tools such as public
 relations and the internet to control
 information flow to their citizens. This
 book is a must read for anyone interested
 in an explanation why Southeast Asian
 models of authoritarian models are
 surviving. A brilliant analysis, it combines
 media theory with a critical discussion of
 contemporary developments in Asia.
 James Gomez, Keio University, Japan True
 to the old Chinese adage kill a chicken
 scare a monkey , the few who once
 challenged Southeast Asia s ruling elites
 disappeared and the majority were silent.
 Crude, but effective. Modern times,
 however, demand a more sophisticated
 approach. Ruling elites now strip cultures
 naked and micro manage people s minds.
 Their preferred tools of penetration and
 manipulation are a compliant media and a

money hungry PR industry. Jonathan
 Woodier s insights will ensure that you will
 never read a newspaper or watch TV news
 in quite the same way again. Trevor
 Watson, Professional Public Relations Pty
 Ltd, Australia This is an engaging and
 informative analysis of the media
 landscape in South East Asia. It uncovers
 the pervasive impact of the global media
 on the political process, and raises
 important academic and policy issues in
 the process. This book is timely, and will
 be a must read for policymakers,
 academics and students across
 communications, media studies, politics
 and democratization, as well as for
 everyone with an interest in current day
 developments in South East Asia. Joep
 Cornelissen, Leeds University Business
 School, UK Jonathan Woodier s latest work
 considers what impact the media has upon
 the democratization process in Southeast

Asia. Has the media had a liberalizing effect or become subject to elite control in Southeast Asia and, if so, why? What role does the global media play in this process, particularly given its conglomerization and commoditization? By examining the communications media and its relationship to political change in Southeast Asia, this fascinating study will endeavour to provide both a regional comparative analysis and a more balanced interpretation of the mass communication media in the wake of September 11, 2001. The book also investigates the durability of authoritarian regimes and the enduring capacity of the media-controlled state alongside the growing sophistication of political communications particularly the use of PR consultants. The author provides an insider's view with unique insights into the practice of political communication and its development throughout the strategically important region of Southeast Asia with its large Moslem states as well as much further afield to countries such as China and post-industrial Europe. As such the book will be warmly welcomed by academics of politics, international relations, media, communications and PR. It will also appeal to researchers interested in political change, the rise of the global media giants and the influence of authoritarian states such as China.

The Commanding Heights Columbia University Press

The Courteous Power seeks to provide a nuanced view of the current relationship between Japan and Southeast Asia. Much of the current scholarship on East-Southeast Asian engagement has focused on the multidimensional chess game playing out between China and Japan, as the dominant post-imperialist powers. Alternatively, there has been renewed attention on ASEAN and other Southeast Asian-centered initiatives, explicitly minimizing the influence of East Asia in the region. Given the urgency of understanding the careful balance in the Indo-Pacific region, this volume brings together scholars to examine the history and current engagement from a variety of perspectives, ranging from economic and political, to the cultural and technological, while also focusing more clearly on the specific relationship between the region and Japan.

Key Indicators for Asia and the Pacific 2013 Simon and Schuster

Colonial armies were the focal points for some of the most dramatic tensions inherent in Chinese, Japanese and Western clashes with Southeast Asia. The international team of scholars take the reader on a compelling exploration from

Ming China to the present day, examining their conquests, management and decolonization. The journey covers perennial themes such as the recruitment, loyalty, and varied impact of foreign-dominated forces. But it also ventures into uncharted waters by highlighting Asian use of 'colonial' forces to dominate other Asians. This sends the reader back in time to the fifteenth century Chinese expansion into Yunnan and Vietnam, and forwards to regional tensions in present-day Indonesia, and post-colonial issues in Malaysia and Singapore. Drawing these strands together, the book shows how colonial armies must be located within wider patterns of demography, and within bigger systems of imperial security and power - American, British, Chinese, Dutch, French, Indonesian, and Japanese - which in turn helped to shape modern Southeast Asia. Colonial Armies in Southeast Asia will interest scholars working on low intensity conflict, on the interaction between armed forces and society, on comparative imperialism, and on Southeast Asia. *The Economics of Climate Change in Southeast Asia* Metropolitan Museum of Art

The European Union (EU) is at the forefront of engaging in external trade relations outside of the World Trade Organization (WTO) with entire regions and economic powerhouses. Understanding why and how the EU engages in one of the most active fields of external relations is crucial. This book fills a gap in the literature by analysing motives on the modes - bilateralism, inter-regionalism, or multilateralism - of EU external trade relations towards regional organizations in Asia and Latin America outside of the WTO. In particular, it examines why the EU turned from interregional to bilateral external trade relations towards these world regions - a question that is, to date, under-researched. By developing and testing an original approach rooted in realist theorizing coined 'commercial realism', it examines systematically the explanatory power of commercial realism against liberal-institutionalist approaches dominant in the literature on EU external relations through five in-depth case studies. This book will be of key interest to scholars and students in EU Politics/Studies, EU external relations, inter-regionalism and more broadly to International Relations and International Political Economy.

The Routledge Handbook of Southeast Asian Economics offers new insights into the rapidly-developing economies of Southeast Asia. Despite widespread initial deprivation, Southeast Asia has achieved and sustained a remarkable rate of growth, in the course of which tens of millions have successfully escaped severe poverty. Though the economies of the region vary in many dimensions, integration into the wider East Asian network of production and trade is a notable common feature, one that continues a centuries-long history of engagement with global trade. A second striking feature is the pace and extent of transformation in the structure of production and in sources of household income in the region, which has undergone remarkably rapid industrialization and urban growth. However, the search for sustained and sustainable growth through and beyond middle-income continues to confront pressing economic and policy challenges. This Handbook offers a timely and comprehensive overview of Southeast Asian economic development. Organized according to the logic of chronological and thematic unity, it is structured in these sections: Growth and development over the long term Food, agriculture and natural resources Trade, investment and industrialization Population, labor, and human capital Poverty and political economy Twenty-first century challenges This original Handbook, written by experts in their fields, is unique in the breadth and depth of its coverage. Its forward-looking perspective renders it relevant both now and in the future. This advanced level reference work will be essential reading for students, researchers and scholars of Asian Studies, Economics and Southeast Asian studies.

The Mekong is the most controversial river in Southeast Asia, and increasingly the focus of international attention. It flows through 6 countries, China, Myanmar, Laos, Thailand, Cambodia and Viet Nam. The 4 downstream countries have formed the Mekong River Commission to promote sustainable development of the river and many of their people depend on it for their

subsistence? It has possibly the largest freshwater fishery in the world, and the Mekong waters support rice agriculture in the delta in Viet Nam (which produces about 40% of that country's food) as well as in Cambodia, Laos and Thailand. China is now building the first large mainstream dam on the river, and has proposals for several more. These dams are likely to affect the downstream countries. Several of the downstream countries also have plans for large scale hydropower and irrigation development which could also impact the river. This book will provide a solid overview of the biophysical environment of the Mekong together with a discussion of the possible impacts, biophysical, economic and social, of some possible development scenarios. It is intended to provide a technical basis which can inform the growing political and conservation debate about the future of the Mekong River, and those who depend on it. It is aimed at river ecologists, geographers, environmentalists and development specialists both in the basin and (especially) outside for whom access to this material is most difficult. This book will be the first comprehensive treatment of the Mekong system. The first comprehensive overview of all aspects of the Mekong River system Deals with a regionally critical ecosystem and one under threat The Mekong supports the world's largest freshwater fishery and provides water underpinning a major regional rice paddy system Presents the authoritative findings of the Mekong River Commission's research for a wider audience for the first time outside of limited distribution reports

This collection of essays focuses on law and the diaspora Chinese. They show us a variety of answers to such questions as: what are the laws of China outside China; what are the laws of the Chinese in Southeast Asia; what were/are the laws for the Chinese in Southeast Asia; and is there a "Confucian Chinese"? The answers in some cases are reasonably certain but in others they are tentative and debatable. The legal material raises these issues in a way which is fundamental to diaspora studies....

Long constrained as a security actor by constitutional as well as external factors, Japan now increasingly is called to play a greater role in stabilizing both the Asia-Pacific region and the entire international system. Japan's Security Agenda explores the country's diplomatic, political, military, and economic concerns and policies within this new context.

Competing for Economic Power in Asia and the Americas Oxford University Press

In the last few decades, Southeast Asia has become generally more peaceful and more prosperous, with progress in economic development, regional cooperation and integration. ASEAN in particular plays a leading role within and beyond the region in promoting multilateral cooperation in both security and economic matters. All these developments progress amid increasing hegemonic competition between the US and China for regional dominance in the Asia-Pacific region. According to the realist viewpoint of international politics, Southeast Asian states can do nothing but choose sides at the expense of international political autonomy in order to maintain their national interests. Tang argues, however, that in fact there exists an opportunity for Southeast Asian states to simultaneously reinforce their military security, economic development and international political autonomy in face of the US-China hegemonic competition. Drawing on the ideas of power transition theory and recent works of capitalist peace, Tang argues that small states can exploit the competition between great powers to make economic gains and ensure security while maintaining their autonomy. He outlines the necessity of cooperation among these small states and of economic liberalization for the effectiveness of this reinforcing dynamics, applying policy and econometric analyses to a wide range of qualitative and quantitative data.

The Struggle for Autonomy CRC Press
Highlighting the interconnections between Southeast Asia and the world through literature, this book calls for a different reading approach to the literatures of Southeast Asia by using translation as the main conceptual framework in the analyses and interpretation of the texts, languages, and cultures of the following

countries: Cambodia, Malaysia, Singapore, Indonesia, Brunei Darussalam, and the Philippines. Through the theme of "translational politics," the contributors critically examine not only the linguistic properties but also the metaphoric, symbolic, and semiotic meanings, images, and representations that have been translated across societies and cultures through local and global consumption and circulation of literature, (new) media, and other cultural forms. Using translation to unlock and decode multiple, different languages, narratives, histories, and worldviews emerging from Southeast Asian geo-literary contexts, this book builds on current scholarship and offers new approaches to the contestations of race, gender, and sexuality in literature, which often involve the politically charged discourses of identity, language, and representation. At the same time, this book provides new perspectives and future directions in the study of Southeast Asian literatures. Exploring a range of literary and cultural products, including written texts, performance, and cinema, this volume will be a key resource for students and researchers interested in translation and cultural studies, comparative and world literature, and Southeast Asian studies.

Our ability to generate and collect data has been increasing rapidly. Not only are all of our business, scientific, and government transactions now computerized, but the widespread use of digital cameras, publication tools, and bar codes also generate data. On the collection side, scanned text and image platforms, satellite remote sensing systems, and the World Wide Web have flooded us with a tremendous amount of data. This explosive growth has generated an even more urgent need for new techniques and automated tools that can help us transform this data into useful information and knowledge. Like the first edition, voted the most popular data mining book by KD Nuggets readers, this book explores concepts and techniques for the discovery of patterns hidden in large data sets, focusing on issues relating to their feasibility, usefulness, effectiveness, and scalability. However, since the publication of the first edition, great progress has been made in the development of new data mining methods, systems, and applications. This new edition substantially enhances the first edition, and new chapters have been added to address recent developments on

mining complex types of data— including stream data, sequence data, graph structured data, social network data, and multi-relational data. A comprehensive, practical look at the concepts and techniques you need to know to get the most out of real business data Updates that incorporate input from readers, changes in the field, and more material on statistics and machine learning Dozens of algorithms and implementation examples, all in easily understood pseudo-code and suitable for use in real-world, large-scale data mining projects Complete classroom support for instructors at www.mkp.com/datamining2e companion site

Commercial Realism and EU Trade Policy Oxford University Press on Demand Indonesia, the world's fourth most populous country, is undergoing a profound transformation that could lead to a variety of outcomes, from the consolidation of democracy to return to authoritarianism or military rule, to radical Islamic rule, or to violent disintegration. The stakes are high, for Indonesia is the key to Southeast Asian security. The authors examine the trends and dynamics that are driving Indonesia's transformation, outline possible strategic futures and their implications for regional stability, and identify options the United States might pursue in the critical challenge of influencing Indonesia's future course. Steps the United States might take now include support for Indonesia's stability and territorial integrity, reestablishment of Indonesian-U.S. military cooperation and interaction, aid in rebuilding a constructive Indonesian role in regional security, and support for development of a regional crisis reaction force. A continued strong U.S. presence in the Asia-Pacific region will reinforce the U.S. role as regional balancer.

B. Alan Wallace introduces a natural

theory of human consciousness that has its roots in contemporary physics and Buddhism. Wallace's "special theory of ontological relativity" suggests that mental phenomena are conditioned by the brain, but do not emerge from it. Rather, the entire natural world of mind and matter, subjects and objects, arises from a unitary dimension of reality. Wallace employs the Buddhist meditative practice of samatha to test his hypothesis, creating a kind of telescope to examine the space of the mind. He then proposes a more general theory in which the participatory nature of reality is envisioned as a self-excited circuit. In comparing these ideas to the Buddhist theory known as the Middle Way philosophy, Wallace explores further aspects of his "general theory of ontological relativity," which can be investigated through vipasyana, or insight, meditation. He then focuses on the theme of symmetry in quantum cosmology and the "problem of frozen time," relating these issues to the theory and practices of the Great Perfection school of Tibetan Buddhism. He concludes with a discussion of complementarity as it relates to science and religion.

"Eleven historians bring their knowledge and insights to bear on the long Braudelian sweep of Southeast Asian history. In doing so they seek both to debunk simplistic assumptions about fragile traditions and transformational modernities, and to identify real repeating patterns in Southeast Asia's past: clientelistic political structures, periodic tectonic and climatic disasters, ethnic occupational specializations, long cycles of economic globalization and deglobalization. Their contributions range across many centuries: from the Austronesian expansion to the Aceh tsunami, and from the Sanskrit cosmopolis

to the Asian financial crisis. The book is inspired by, and dedicated to, Peter Boomgaard, a scholar whose work has embodied the Braudelian spirit in Southeast Asian historiography"--
A Longue Durée Perspective Routledge
Jonathan Ping's volume establishes a unifying theory for the concept of middle power (MP). MPs are states which have an innate form of statecraft and perceived power as a result of their size. The book presents hybridization theory as a basis for analysis, policy development and prediction of MP statecraft and perceived power. A prerequisite to the founding of hybridization theory is the new statistical method of definition which identifies sixteen MPs of Asia and the Pacific. The volume takes a comparative focus on Indonesia and Malaysia to inform and test hybridization theory, as well as to provide a historical analysis of Southeast Asia from a statecraft and perceived power perspective. It offers researchers and scholars of international relations and international political economy a theory that can be applied to the practical study of all middle sized states, while middle sized states can apply the same theory to enhance their own ability to (re)create their state.
