Structural Analysis Solved Problems This problem has also been solved by the moment distribution method (example 10.2) treating the moment at B as unknown. However, in the slope-deflection method, the slope or rotations are taken as unknowns, and due to this the problem involves three unknown rotations q_A , q_B and q_C . Hence the method of slope deflection is not recommended ... Solved Problems: Slope Deflection Method- Structural Analysis solving Problems of Structural Analysis 1 (cover page) ...
