[Ontology \(information science\) - Wikipedia](#)

In computer science and information science, an ontology encompasses a representation, formal naming and definition of the categories, properties and relations between the concepts, data and entities that substantiate one, many or all domains of discourse.

Ontological Framework for representation of Tractable Flavor: Food Phenotype, Sensation, Perception. Tarini Naravane Biological and Agricultural Systems Engineering UC Davis Davis, California,US tnaravane@ucdavis.ed Matthew Lange Food Science and Technology UC Davis Davis, California, US mclange@ucdavis.edu Abstract.

[An Ontological Framework For Representing](#)

The IGIPI framework deals with time and the changes that occur over time in a biological system. It is necessary to represent processes that cause a change in the state of a biological system - both natural processes such as DNA transcription and experimental processes such as mixing7.

### An ontological context model for representing a situation ...

An ontological framework for representing and exploiting medical knowledge Torralba-Rodríguez, Francisco Jesús; Fernández-Breis, Jesualdo Tomás; García, Rafael Valencia; Ruíz-Sánchez, Juana María; Martínez-Béjar, Rodrigo; Gómez-Rubí Juan Antonio 2003-08-01 00:00:00 Patients on Intensive Care Units (ICUs) need continuous attention and monitoring. The patient may be connected to an alarm system, so that an alarm is triggered when

the state of the patient changes.

#### **Chapter 10. An Ontological Framework for Understanding the ...**

The ontological framework described here is for the enhancement of civil information management, especially where it is concerned with nodal and link analysis for complex social systems.

#### **Computable visually observed phenotype ontological ...**

This paper presents MachineProse (MP), an ontological framework for encoding knowledge that has the potential to radically transform the way in which we report, search for, and analyze the results accruing from biomedical research.
