Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly

and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

I checked my rearview mirror for the thousandth time and released a slow breath. Nothing behind me. Seemed I was the only one foolish enough to brave the weather in an attempt to escape. With each blur past my driver side, it meant a new destination, a new start, only to end the same old way. Who am I? Have you ever had to ask yourself that question? Does the answer change often? It does for me. Today, I'm Naomi Perks. Funny. Just yesterday, I was Amber Perkins. A new town, a new name. Might seem strange to most, but it's become routine for me. Naomi Perks is young, vibrant, and sexy with "killer" moves, ready to snatch up the heart and money of the perfect man. But when she meets Ethan, a handsome jock with a good heart, she becomes conflicted in her desires. Has she finally met the one person who could change her life for the better? But Naomi's not the only one on the fence. Ethan's new friend, Jillian, a beautiful, nerdy, computer geek trying to find herself, has possibly stolen his heart as well. Caught in between, Ethan discovers all these two women have to offer, and he's forced to choose between his heart and his head... One path may lead to his untimely demise. Tarlin Saye's romantic thriller, full of love, passion, and blood, leaves readers with the question: Is seduction convincing someone to follow you? Or making them believe it was their idea to begin with? Find the answer in *Bloody Beautiful*.

Former AMA racing champion Reg Pridmore, known worldwide for his popular CLASS Motorcycle Schools, brings his decades of experience on the track, street and classroom, to the readers of this new riding skills book. After reviewing the basics, Pridmore shows advance students how to focus on control in cornering, braking, and acceleration. A long-time proponent of the value of body-steering, Pridmore's insightful text explains how this controversial technique helped him win championships and how it can help everyday riders and budding racers become smoother, better riders. Sections on street strategies and riding gear make this a comprehensive how-to riding skills book for anyone looking to improve their skills.

A motorcycle's electrical system can be daunting to even the most adept home mechanic. And yet, the more complex these systems become—and the more important to a motorcycle's function—the more useful, even critical, it will be to know something about them. That's where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin explains the principles behind motorcycle electrical systems and how they work. He details the various tools, such as multimeters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical problem. And in several hands-on projects, he takes readers on a guided tour of their vehicle's electrical system, along the way giving clear, step-by-step instructions for diagnosing specific problems.

Drawing upon the unique public and private papers of Ting Jih-ch'ang, Governor of Kiangsu, 1868-1870, this work examines the implementation of post-Taiping T'ung-chih Restoration programs in that province. The restoration of local order and rectification of society, judicial administration, fiscal affairs, and personnel problems are described against a background of continuous struggle for dominance in the countryside between local government on the one hand and the local elite on the other. Jonathan Ocko demonstrates that the declining quality of local officials resulted in an erosion of public capacity, in particular of the government's fiscal efficiency, and sharpened the moral dilemmas of office holding. Ocko's close look at the provincial and local levels of administration and at the day-to-day problems faced by Tingjih-ch'ang illuminates the frustrations and failures of the reform process.
