 Esta obra contribuye al homenaje que la Universitat de València rindió al profesor Amartya Kumar Sen con motivo de su investidura como Doctor Honoris Causa. La cuidada selección de artículos preparada por el profesor Casas Pardo, precedida de un estudio introductorio sobre su obra, recoge las aportaciones más importantes, originales y creativas del Dr. Sen a la economía, la ética y al pensamiento social en general.

Decision Making Systems in Business Administration Springer Nature

Aquesta col·lecció de problemes constitueix un material de suport per a una assignatura de Principis d'Economia, en el marc d'un grau de Turisme, destinada a apropar als estudiants els principals conceptes utilitzats en economia. Aquesta assignatura pretén proporcionar als alumnes mecanismes que permetin la comprensió dels conceptes i fenòmens econòmics més habituals del món contemporani, de manera que puguin entendre millor la realitat econòmica que els envolta. En definitiva, persegueix fer l'economia més propera.

Understanding 'Classical' Economics Univ. Autònoma de Barcelona

El presente libro está destinado a los alumnos que cursan la asignatura de Matemáticas correspondiente al primer curso de los estudios de Económicas y Empresariales. El libro se divide en las partes: Álgebra y Cálculo en una y dos variables. Las instrucciones necesarias del programa Scientific Workplace (válidas para cualquier versión del programa), tanto para las matemáticas como para el procesador de texto, se detallan en la primera parte del libro, antes de empezar la asignatura de matemáticas.

Advances in Artificial Intelligence, Software and Systems Engineering Springer Science & Business Media

Este libro, aunque teórico e introductorio de la ciencia económica, pretende despertar el interés de los lectores y estudiosos no especializados en economía, con objeto de que sirva de fundamento a un posterior análisis crítico y propositivo acerca de la realidad económica nacional e internacional. En la actualidad, el conocimiento se ha convertido en un factor de producción fundamental para incrementar la productividad, rentabilidad y competitividad de empresas, ramas económicas, sectores y países, por lo que es necesario fomentar su crecimiento y desarrollo, en

busca de la sociedad del conocimiento.

Compendium of Applied Economics (Global Capitalism) Eliane Ceccon

This book analyzes some of the most recent advances in the field of decision making and fuzzy systems applied to business and economics presented at the International Conference on Modeling and Simulation (MS'12 Rio de Janeiro), 10–13 December, 2012. In this conference, a special focus is given to the fundamental concept of sustainable development. Other key applications in business, economics and finance are also considered. In general, it is very useful for graduate students and researchers interested in pursuing research that combines quantitative techniques such as modeling and simulation and decision making with business and economic problems. This is especially useful when dealing with complex environments where the information is very uncertain and additional mathematical and statistical techniques are needed in order to understand the specific situations considered.

Crisis of Capitalism Brookings Institution Press

Esta obra se centra en la programación de la asignatura Economía de la Educación, materia que pretende acercar al alumno a los enfoques, los métodos y las herramientas del análisis económico aplicados a la educación.

Economía. Batxillerat UNAM

The book presents a rigorous reconstruction of Ricardo's contribution to economic theory and a unifying interpretation of the key issues of Ricardo's research. Part One deals primarily with the problems of value and distribution Part Two deals specifically with the issues of distribution and growth. * Contemporary economic literature in the fields of value, distribution and growth is witnessing a renewed interest in the approach of the classical school, notably in the work of David Ricardo.

Publicaciones Selectas Sobre Economía Agrícola Springer

This book contains the refereed proceedings of the International Conference on Modeling and Simulation in Engineering, Economics, and Management, MS 2013, held in Castellón de la Plana, Spain, in June 2013. The event was co-organized by the AMSE Association and the SoGReS Research Group of the Jaume I University. This edition of the conference paid special attention to modeling and simulation in diverse fields of business management. The 28 full papers in this book were carefully reviewed and selected from 65 submissions. They are organized in topical sections on: modeling and simulation in CSR and sustainable development; modeling and simulation in finance and accounting; modeling and simulation in management and marketing; modeling and simulation in economics and politics; knowledge-based expert and decision support systems; and modeling and simulation in engineering.

Journal of the Latin American and Caribbean Economic Association Servicio Publicaciones UCA

This text presents a clear and accurate introduction to economics. This edition features material on the economics of the information age, has a revised treatment of international economics and uses real-world examples to discuss concepts.

A Handbook of Industrial Districts Routledge

CONTENIDO: Ecuaciones - Aplicaciones de ecuaciones y desigualdades - Funciones y gráficas - Rectas, parábolas y sistemas de ecuaciones - Funciones exponencial y logarítmica - Álgebra de matrices - Programación lineal - Matemáticas financieras - Límites y continuidad - Diferenciación - Temas adicionales de diferenciación - Trazado de curvas - Aplicaciones de la diferenciación - Integración - Métodos y aplicaciones de integración - Cálculo de varias variables.

Economía - Spring 2011 Pearson Educación

This book invites us to reflect on the restoration of terrestrial ecosystems in the context of a region whose identity is still under construction, Latin America and the Caribbean, immersed in a social, economic, ecological and political crisis, whose roots originate historically and politically in colonialism and in the prevailing model of capital accumulation. For the first time, insights and practical experiences on restoration are gathered from most Latin-American and Caribbean countries. Furthermore, this book offers a social approach to restoration, which will likely become preponderant in this field and in this region. The authors claim that a Latin-American knowledge of restoration is under construction and that this discipline can be a significant tool to empower local populations, which might, in turn, lead to a collective action of change. Case studies from 11 countries of the region were compiled, involving multiple voices that emerge beyond generalist principles and with a bottom-up approach. The main idea of the book is to open a debate about the identity of ecological and social restoration in this region. This book is targeted to restoration specialists, volunteers, environmental managers, researchers, politicians and NGOs working on the complexity of socioecological restoration in a region with unavoidable social problems. It is intended for people with similar concerns to those of the chapters' authors. This work tries to integrate a movement on the rise,

almost silent, born with its own narratives of successes and failures that do not hinder its development. Finally, the determination and commitment of Latin-American and Caribbean social actors to restore not only natural values but also social, ethical and cultural ones is remarkable.

Economía Latinoamericana. Inter-American Review of Economics. Revista Interamericana de Economía Editorial UOC

En las escuelas de ingenieros se imparten, tradicionalmente, asignaturas bajo muy diversas denominaciones, tales como: Introducción a la Economía, Economía Industrial, Organización de Empresas, Administración y Dirección de Empresas. En la actualidad, debido a la inclusión de los nuevos grados, se observa una mayor uniformidad de contenidos asignados a ambos campos; así, los de economía lo tratan comúnmente en las asignaturas de fundamentación básica de Economía Industrial, y en cuanto al desarrollo empresarial en Organización Industrial y Administración de Empresas. A veces el temario puede ser adaptado en cada centro y, con la la entrada en funcionamiento de los nuevos grados, se brinda la oportunidad de ofrecer algunos materiales sobre la disciplina que sirvan de base y apoyo a la materia a estudiar. No cabe duda de que los conocimientos de economía industrial son para el ingeniero un complemento formativo indispensable para su formación económica, que le ayudará a desenvolverse en el mundo empresarial. El ingeniero con una buena preparación en este ámbito incrementará las posibilidades de empleo en campos más amplios que por regla general estaban reservados a otros titulados y/o graduados. El libro es un texto que se estudia en algunos Grados de Ingeniero Industrial. Es un libro de gran ayuda para el lector o estudiante sin conocimientos previos en la materia.

Matemáticas, Economía y Scientific Workplace EUDEBA

'A Handbook of Industrial Districts is a very well-organized and structured collection of scientific works on the theory of industrial districts.' - Roberta Capello, Regional Studies In this comprehensive original reference work, the editors have brought together an unrivalled group of distinguished scholars and practitioners to comment on the historical and contemporary role of industrial districts.

The Need for Systematic Approaches EUNED

This book addresses emerging issues concerning the integration of artificial intelligence systems in our daily lives. It focuses on the cognitive, visual, social and analytical aspects of computing and intelligent technologies, and highlights ways to improve the acceptance, effectiveness, and efficiency of said technologies. Topics such as responsibility, integration and training are discussed throughout. The book also reports on the latest advances in systems engineering, with a focus on societal challenges and next-generation systems and applications for meeting them. Further, it covers some cutting-edge issues in energy, including intelligent control systems for power plant, and technology acceptance models. Based on the AHFE 2021 Conferences on Human Factors in Software and Systems Engineering, Artificial Intelligence and Social Computing, and Energy, held virtually on 25–29 July, 2021, from USA, this book provides readers with extensive information on current research and future challenges in these fields, together with practical insights into the development of innovative services for various purposes.

Economía 1Economía 1 BachilleratoMoneda, banca y política monetariaEUNEDEconomía 1[Bachillerato] : Andalucía. SolucionarioMathematical tools for Economics and Finance with Mathematica softwareUniversitas Studiorum

Universitat de València

The book aims at providing an overview of the main economic issues related to tourism activities. While tourism is an important sector, contributing to more than 10% of the European Union's GDP, research and teaching at the university level has only recently grown to a considerable level, and the field still lacks a firm research methodology. This book approaches tourism economics as an applied field of study in which tourism markets are represented as imperfect markets, with asymmetric and incomplete information among agents, bounded rationality, and with a strong presence of externalities and public goods. The economic issues studied in the book are approached both intuitively, largely using examples and case studies, and formally, with mathematical formalizations in text boxes.

Networking, Innovation, Institutions and Cities Grupo Editorial Patria

The beginning of the twenty first century has been characterized by the expansion of economics, politics and institutional relations. Using international case studies, this book illustrates the local answer to the challenge of increasing competition. The book introduces the idea of endogenous development, identifying the theoretical roots and defining its main features. It then goes on to indicate how this concept can be used to understand economic dynamics, and to show how the concept is relevant in economic analysis and policy implementation in times of globalization. This work will be of essential interest to academics and policy-makers in planning and development economics.

World Scientific

This book provides a comprehensive methodological and philosophical inquiry into, and a comprehensive scientific analysis of, the fundamental economic dynamics of capitalism as a world system.
