Born in Connecticut in 1811, Harriet Beecher Stowe was an abolitionist, author, and playwright. Slavery was a major industry in the American South, and Stowe worked with the Underground Railroad to help escaped slaves head north towards freedom. The publication of her book, *Uncle Tom's Cabin*, a scathing anti-slavery novel, fanned the flames that started the Civil War. The book's emotional portrayal of the impact of slavery captured the nation's attention. This book is dedicated to improving healthcare through reducing delays experienced by patients. With an interdisciplinary approach, this new edition, divided into five sections, begins by examining healthcare as an integrated system. Chapter 1 provides a hierarchical model of healthcare, rising from departments, to centers, regions and the "macro system." A new chapter demonstrates how to use simulation to assess the interaction of system components to achieve performance goals, and Chapter 3 provides hands-on methods for developing process models to identify and remove bottlenecks, and for developing facility plans. Section 2 addresses crowding and the consequences of delay. Two new chapters (4 and 5) focus on delays in emergency departments, and Chapter 6 then examines medical outcomes that result from waits for surgeries. Section 3 concentrates on management of demand. Chapter 7 presents breakthrough strategies that use real-time monitoring systems for continuous improvement. Chapter 8 looks at the patient appointment system, particularly through the approach of advanced access. Chapter 9 concentrates on managing waiting lists for surgeries, and Chapter 10 examines triage outside of emergency departments, with a focus on allied health programs Section 4 offers analytical tools and models to support analysis of patient flows. Chapter 11 offers techniques for scheduling staff to match patterns in patient demand. Chapter 12 surveys the literature on simulation modeling, which is widely used for both healthcare design and process improvement. Chapter 13 is new and demonstrates the use of process mapping to represent a complex regional trauma system. Chapter 14 provides methods for forecasting demand for healthcare on a region-wide basis. Chapter 15 presents queueing theory as a method for modeling waits in healthcare, and Chapter 16 focuses on rapid delivery of medication in the event of a catastrophic event. Section 5 focuses on achieving change. Chapter 17 provides a diagnostic for assessing the state of a hospital and using the state assessment to select improvement strategies. Chapter 18 demonstrates the importance of optimizing care as patients transition from one care setting to the next. Chapter 19 is new and shows how to implement programs that improve patient satisfaction while also improving flow. Chapter 20 illustrates how to evaluate the

overall portfolio of patient diagnostic groups to guide system changes, and Chapter 21 provides project management tools to guide the execution of patient flow projects.

The June 2019 OMB Circular No. A-11 provides guidance on preparing the FY 2021 Budget and instructions on budget execution. Released in June 2019, it's printed in two volumes. This is Volume I. Your budget submission to OMB should build on the President's commitment to advance the vision of a Federal Government that spends taxpayer dollars more efficiently and effectively and to provide necessary services in support of key National priorities while reducing deficits. OMB looks forward to working closely with you in the coming months to develop a budget request that supports the President's vision. Most of the changes in this update are technical revisions and clarifications, and the policy requirements are largely unchanged. The summary of changes to the Circular highlights the changes made since last year. This Circular supersedes all previous versions. We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-

pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Throughout the past two years, Trans World Airlines, Midway Airlines, and R.H. Macy Company, as well as over 46,000 other corporations, have filed petitions for relief under Chapter 11 of the United States Bankruptcy Code. Of the firms that have filed Chapter 11 reorganization petitions, over eighty percent will never reorganize successfully and will not avoid a subsequent conversion to a Chapter 7 liquidation proceeding. The effects of these "misfilings" are enormous. Most fundamentally, an attempted reorganization, when liquidation is the more efficient solution, can unnecessarily increase the overall costs of bankruptcy significantly. In response to these costs, some scholars have called for the repeal of Chapter 11, while others have advocated merely a new approach to Chapter 11 reorganization proceedings. Still others defend the present Chapter 11 system. This Article contends that reducing bankruptcy costs requires a revised Chapter 11 reorganization structure. This Article posits a two-part revision to the present Chapter 11 system: (1) replacing corporate managers acting as debtors in possession with trustees; and (2) establishing a methodology to guide these

new decision makers in determining whether a reorganization or a liquidation is the proper course of action in a given case.

We are living in a culture still defined by unrealistic gender stereotypes and expectations. Despite much progress being made, women are still not, on the whole, treated as equals to men. Gender pay gaps, invisible labour, and outdated attitudes towards women (especially around sex and relationships) mean that many of us grow into adulthood shackled to our need to be nice, liked, and to please, at the detriment of our happiness and wellbeing. In *Ditch the People Pleaser*, you are going to explore four of the areas where you may find yourself people pleasing: life, relationships (including love and sex), work, and business and leadership. This book will help you to:

- 1) Undo the effects of people pleasing in your life so you ARE free from expectations + boxes.
- 2) Release the need to please so you are able to achieve deep connection, a sense of purpose + guidance from your inner knowing.
- 3) Break the cycle for your personal + spiritual growth AND for the young people in your life. You will be able to model and pass on a healthier way of being for the next generation.
- 4) Use techniques and practices that will transform the way you feel about being nice and acceptable.
- 5) Strengthen your relationship to yourself and the people in your life, expand into your work and contribute to compassionate change. Not only will you discover what the antidote is to people pleasing you will be supported with practical techniques and supportive resources to ditch the need to please right away.
