The Pilgrim's Progress from This World, to That Which Is to Come is a 1678 Christian allegory written by John Bunyan. It is regarded as one of the works of religious, theological fiction in English literature. It has been translated into more than 200 languages, and has never been out of print. It has also been cited as the first novel written in English.

In a networked and globalized world of information the form of national bibliographies may have changed, however their major function remains unchanged: to inform about a country's publication landscape, its cultural and intellectual heritage. Subject access offers a major route into this landscape providing information about the dispersion of publications in specific fields of knowledge and topics contained in a particular national publishing output. The Guidelines for Subject Access in National Bibliographies give graded recommendations concerning subject indexing policies for national bibliographic agencies and illustrating various policies by providing best

practice examples.

"Remarkably upbeat, and imbued with wit, wisdom and a palpable sense of awe over our universe."—Tucson Weekly

Most of us are aware of our own mortality, but few among us know what science, with insights yielded from groundbreaking new research, has to say about endings on a larger scale. Enter astronomer Chris Impey, who chronicles the death of the whole shebang: individual, species, bio-sphere, Earth, Sun, Milky Way, and, finally, the entire universe. With a healthy dose of humor, *How It Ends* illuminates everything from the technologies of human life extension and the evolutionary arms race between microbes and men to the inescapable dimming of the Sun and the ultimate "big rip," giving us a rare glimpse into a universe without us.

The Globus Toolkit is a key technology in Grid Computing, the exciting new computing paradigm that allows users to share processing power, data, storage, and other computing resources across institutional and geographic boundaries. *Globus Toolkit 4: Programming Java Services* provides an introduction to the latest version of this widely acclaimed toolkit. Based on the popular web-based *The Globus Toolkit 4 Programmer's Tutorial*, this book far surpasses that document, providing greater detail, quick reference appendices, and many additional examples. If you're making the leap into Grid Computing using the Globus Toolkit, you'll want *Globus Toolkit 4: Programming Java Services* at your side as you take your first steps. Written for newcomers to Globus Toolkit, but filled with useful information for

experienced users. Clearly situates Globus application development within the context of Web Services and evolving Grid standards. Provides detailed coverage of Web Services programming with the Globus Toolkit's Java WS Core component. Covers basic aspects of developing secure services using the Grid Security Infrastructure (GSI). Uses simple, didactic examples throughout the book, but also includes a more elaborate example, the FileBuy application, that showcases common design patterns found in Globus applications. Concludes with useful reference appendices.

Higher Biology for CfE Scholastic Inc. Uses a simple A-Z format to separate the facts from the fiction, debunking the inaccuracies and controversial fiction distortions, and providing background information on all the mysteries in the novel.

The texts from ancient Ugarit are among the most important modern discoveries for understanding the Bible. For more than thirty years, *Stories from Ancient Canaan* has been recognized as a highly authoritative and readable presentation of the principal Canaanite myths and epics discovered at Ugarit. This fully revised edition takes into account advances in the reading, understanding, and interpretation of these stories since 1978. It also includes two additional texts, expanded introductions, and illustrations. Coogan and Smith have collaborated to bring this classic up to date in order to provide accessible and accurate translations of these texts for a new generation of students.

In The Immorality of Punishment Michael Zimmerman argues forcefully that not only our current practice but indeed any practice of legal punishment is deeply morally repugnant, no matter how vile the behaviour that is its target. Despite the fact that it may be difficult to imagine a state functioning at all, let alone well, without having recourse to punishing those who break its laws, Zimmerman makes a timely and compelling case for the view that we must seek and put into practice alternative means of preventing crime and promoting social stability.

This monograph was assembled to honor Professor Norman Bowery and his work on the 30th anniversary of his discovery of the GABA_B receptor. In the present volume, leading neuroscientists from academia and industry provide a perspective of current research, both basic and translational, in the discovery of drugs acting at the GABA_B receptor. The topics covered provide a comprehensive review of the field and the current state of research in this area. Included are chapters on the chemistry of GABA_B agonists and antagonists, on the genetics and molecular composition of the site, its regulation and trafficking, and its role in controlling cellular, autonomic, and behavioral function. There are also chapters describing the potential clinical utility of drugs regulating GABA_B activity receptor in the areas of hypertension, gastroesophageal reflux disease, Down syndrome, depression, and substance abuse. The information contained in this text will be of particular interest to neuroscientists in general and to neuropharmacologists in particular.  PROGRAM MANAGEMENT TECHNIQUES
 TO PUBLIC SECTOR PERFORMANCE
 MANAGEMENT Government Program
 Management examines ongoing global
 reforms in public-sector program design
 and management and explains how to
 deliver public-sector programs in
 response to these reforms. A new,
 generic program management model--
 essential for government executives,
 program managers, and legislative
 leaders--is presented. The new model
 addresses various dysfunctional forces,
 many of them global in scale, that inhibit
 public programs from achieving their
 intended benefits and outcomes. This in-
 depth resource discusses broad reforms
 that fundamentally alter government
 agency structure, performance reporting
 and budgeting, composition, and roles
 and functions. The book also looks at
 targeted reforms affecting individual
 programs, covering concept, planning,
 design, delivery, cost control, and
 performance reporting. Best practices
 from both the public and private sectors
 are covered in this pioneering guide.

Guidelines for Process Safety in Bioprocess Manufacturing Facilities Random House

This book helps advance process safety in a key area of interest. Currently, no literature exists which is solely dedicated to process safety for the bioprocessing industry. There are texts, guidelines, and standards on biosafety at the laboratory level and for industrial hygiene, but no guidelines for large-scale production facilities. In fact, biosafety is largely defined as a field that promotes safe laboratory practices, procedures and use of containment equipment and facilities. Additionally, biomedical engineers, biologists, or other professionals without chemical engineering training or knowledge of inherently safe design are designing many of these facilities.
