capitalism along the southern seaboard, tying the creation of overdeveloped, unsustainable coastlines to the unmaking of black communities and cultures along the shore. The result is a skillful appraisal of the ambiguous legacy of racial progress in the Sunbelt.

**The Rights and Wrongs of Land Restitution** Verso Books

A leading environmental thinker explores how people might begin to heal their fractured and contentious relationship with the land and with each other. From the coalfields of Appalachia and the tobacco fields of the Carolinas to the public lands of the West, Purdy shows how the land has always united and divided Americans.

**America this Land of Ours** Princeton University Press

A vivid character-driven narrative, fused with important new economic and political reporting and research, that busts the myths about middle class decline and points the way to its revival. For over a decade, Jim Tankersley has been on a journey to understand what the hell happened to the world’s greatest middle-class success story -- the post-World-War-II boom that faded into decades of stagnation and frustration for American workers. In The Riches of This Land, Tankersley fuses the story of forgotten Americans—struggling women and men who he met on his journey into the travails of the middle class— with important new economic and political research, providing fresh understanding how to create a more widespread prosperity. He begins by unraveling the real mystery of the American economy since the 1970s - not where did the jobs go, but why haven't new and better ones been created to replace them. His analysis begins with the revelation that women and minorities played a far more crucial role in building the post-war middle class than today's politicians typically acknowledge, and policies that have done nothing to address the structural shifts of the American economy have enabled a privileged few to capture nearly all the benefits of America's growing prosperity. Meanwhile, the "angry white men of Ohio" have been sold by Trump and his ilk a theory of the economy that is dangerously backward, one that pits them against immigrants, minorities, and women who should be their allies. At the culmination of his journey, Tankersley lays out specific policy prescriptions and social undertakings that can begin moving the needle in the effort to make new and better jobs appear. By fostering an economy that opens new pathways for all workers to reach their full potential -- men and women, immigrant or native-born, regardless of race -- America can once again restore the upward flow of talent that can power growth and prosperity.

**Enterprising Communities** Haymarket Books

The coasts of today's American South feature luxury condominiums, resorts, and gated communities, yet just a century ago, a surprising amount of beachfront property in the Chesapeake, along the Carolina shores, and around the Gulf of Mexico was owned and populated by African Americans. Blending social and environmental history, Andrew W. Kahrl tells the story of African American-owned beaches in the twentieth century. By reconstructing African American life along the coast, Kahrl demonstrates just how important these properties were for African American
communities and leisure, as well as for economic empowerment, especially during the era of the Jim Crow South. However, in the wake of the civil rights movement and amid the growing prosperity of the Sunbelt, many African Americans fell victim to effective campaigns to dispossess black landowners of their properties and beaches. Kahrl makes a signal contribution to our understanding of African American landowners and real-estate developers, as well as the development of coastal capitalism along the southern seaboard, tying the creation of overdeveloped, unsustainable coastlines to the unmaking of black communities and cultures along the shore. The result is a skillful appraisal of the ambiguous legacy of racial progress in the Sunbelt.

A landmark collection by New York Times journalist Dan Barry, selected from a decade of his distinctive "This Land" columns and presenting a powerful but rarely seen portrait of America. In the wake of Hurricane Katrina and on the eve of a national recession, New York Times writer Dan Barry launched a column about America: not the one populated only by cable-news pundits, but the America defined and redefined by those who clean the hotel rooms, tend the beet fields, endure disasters both natural and manmade. As the name of the president changed from Bush to Obama to Trump, Barry was crisscrossing the country, filing deeply moving stories from the tiniest dot on the American map to the city that calls itself the Capital of the World. Complemented by the select images of award-winning Times photographers, these narrative and visual snapshots of American life create a majestic tapestry of our shared experience, capturing how our nation is at once flawed and exceptional, paralysed and ascendant, as cruel and violent as it can be gentle and benevolent.

Land Matters
The Rights and Wrongs of Land Restitution: 'Restoring What Was Ours' offers a critical, comparative ethnographic, examination of land restitution programs. Drawing on memories and histories of past dispossession, governments, NGOs, informal movements and individual claimants worldwide have attempted to restore and reclaim rights in land. Land restitution programs link the past and the present, and may allow former landholders to reclaim lands which provided the basis of earlier identities and livelihoods. Restitution also has a moral weight that holds broad appeal; it is represented as righting injustice and healing the injuries of colonialism. Restitution may have unofficial purposes, like establishing the legitimacy of a new regime, quelling popular discontent, or attracting donor funds. It may produce unintended consequences, transforming notions of property and ownership, entrenching local bureaucracies, or replicating segregated patterns of land use. It may also constitute new relations between states and their subjects. Land-claiming communities may make new claims on the state, but they may also find the state making unexpected claims on their land and livelihoods. Restitution may become a route to citizenship, but it may engender new or neo-traditional forms of subjection. This volume explores these possibilities and pitfalls by examining cases from the Americas, Eastern Europe, Australia and South Africa. Addressing the practical and theoretical questions that arise, The Rights and Wrongs of Land Restitution thereby offers a critical rethinking of the links between land restitution and property, social transition, injustice, citizenship, the state and the market.

Michael Davitt was born in Straise, County Mayo, Ireland in 1846 at the height of the "Great Hunger". Overcoming many hardships, he rose to become an international figure and one of Ireland's most beloved patriots. This fictionalized biography brings back to life the beginning of the fight for Irish independence. Travel the journey with Michael Davitt as he struggles to break the power of the landlords and take Ireland out of the feudal system imposed upon the country by the British aristocracy.

Our Lady of the Yellow 뜨
Little, Brown Books for Young Readers
A "fascinating" history of immigration in America with extensive photos and illustrations (Kirkus Reviews). American attitudes toward immigrants are paradoxical. On the one hand, we see our country as a haven for the poor and oppressed; anyone, no matter his or her background, can find freedom here and achieve the "American Dream." On the other hand, depending on prevailing economic conditions, fluctuating feelings about race and ethnicity, and fear of foreign political and labor agitation, we set boundaries and restrictions on who may come to this country and whether they may stay as citizens. This fact-filled, illustrated book explores the way government policy and popular responses to immigrant groups evolved throughout U.S. history, particularly between 1800 and 1965—and concludes with a summary of events up to contemporary times, as immigration again becomes a hot-button issue. "[An] exceptional work." —School Library Journal (starred review)

The Land Was Ours Oxford University Press, USA

From Kennebunkport to Kauai, from the Rio Grande to the Northern Rockies, ours is a vast republic. While we may be united under one Constitution, separate and distinct states remain, each with its own constitution and culture. Geographic idiosyncrasies add more than just local character. Regional understandings of law and justice have shaped and reshaped our nation throughout history. America’s Constitution, our founding and unifying document, looks slightly different in California than it does in Kansas. In The Law of the Land, renowned legal scholar Akhil Reed Amar illustrates how geography, federalism, and regionalism have influenced some of the biggest questions in American constitutional law. Writing about Illinois, “the land of Lincoln,” Amar shows how our sixteenth president’s ideas about secession were influenced by his Midwestern upbringing and outlook. All of today’s Supreme Court justices, Amar notes, learned their law in the Northeast, and New Yorkers of various sorts dominate the judiciary as never before. The curious Bush v. Gore decision, Amar insists, must be assessed with careful attention to Florida law and the Florida Constitution. The second amendment appears in a particularly interesting light, he argues, when viewed from the perspective of Rocky Mountain cowboys and cowgirls. Propelled by Amar’s distinctively smart, lucid, and engaging prose, these essays allow general readers to see the historical roots of, and contemporary solutions to, many important constitutional questions. The Law of the Land illuminates our nation’s history and politics, and shows how America’s various local parts fit together to form a grand federal framework.

#1 NEW YORK TIMES BESTSELLER • OPRAH’S BOOK CLUB PICK • NATIONAL BOOK AWARD LONGLIST • “An instant American classic and almost certainly the keynote nonfiction book of the American century thus far.”—Dwight Garner, The New York Times Times The Pulitzer Prize-winning, bestselling author of The Warmth of Other Suns examines the unspoken caste system that has shaped America and shows how our lives today are still defined by a hierarchy of human divisions. The hierarchy of caste is not about feelings or morality. It is about power—which groups have it and which do not.” In this brilliant book, Isabel Wilkerson gives us a masterful portrait of an unseen phenomenon in America as she explores, through an immersive, deeply researched narrative and stories about real people, how America today and throughout its history has been shaped by a hidden caste system, a rigid hierarchy of human rankings. Beyond race, class, or other factors, there is a powerful caste system that influences people’s lives and behavior and the nation’s fate. Linking the caste systems of America, India, and Nazi Germany, Wilkerson explores eight pillars that underlie caste systems across civilizations, including divine will, bloodlines, stigma, and more. Using riveting stories about people—including Martin Luther King, Jr., baseball’s Satchel Paige, a single father and his toddler son, Wilkerson herself, and many others—she shows the ways that the insidious undertow of caste is experienced every day. She documents how the Nazis studied the racial systems in America to plan their out-cast of the Jews; she discusses why the cruel logic of caste requires that there be a bottom rung for those in the middle to measure themselves against; she writes about the surprising health costs of caste, in depression and life expectancy, and the effects of this hierarchy on our culture and politics. Finally, she points forward to ways America can move beyond the artificial and destructive separations of human divisions, toward hope in our common humanity. Beautifully written, original, and revealing, Caste: The Origins of Our Discontents is an eye-opening story of people and history, and a reexamination of what lies under the surface of ordinary lives and of American life today.
