"You can't really know anything if you just remember isolated facts. If the facts don't hang together on a latticework of theory, you don't have them in a usable form. You've got to have models in your head." - Charlie Munger, investor, vice chairman of Berkshire Hathaway The world's greatest problem-solvers, forecasters, and decision-makers all rely on a set of frameworks and shortcuts that help them cut through complexity and separate good ideas from bad ones. They're

called mental models, and you can find them in dense textbooks on psychology, physics, economics, and more. Or, you can just read *Super Thinking*, a fun, illustrated guide to every mental model you could possibly need. How can mental models help you? Well, here are just a few examples...

- If you've ever been overwhelmed by a to-do list that's grown too long, maybe you need the Eisenhower Decision Matrix to help you prioritize.
- Use the 5 Whys model to better understand people's motivations or get to the root cause of a problem.
- Before concluding that your colleague who messes up your projects is out to sabotage you, consider Hanlon's Razor for an alternative

explanation.

- Ever sat through a bad movie just because you paid a lot for the ticket? You might be falling prey to Sunk Cost Fallacy.
- Set up Forcing Functions, like standing meeting or deadlines, to help grease the wheels for changes you want to occur. So, the next time you find yourself faced with a difficult decision or just trying to understand a complex situation, let *Super Thinking* upgrade your brain with mental models.

"Riveting." -Publishers Weekly
Ron Archer is an overcomer. Ron Archer's story will inspire you to trust God with the impediments facing you, whether big or small. Born to a biracial teenage mother forced by poverty to become a call girl, he survived an abortion his mother's

pimp forced her to have. Abused by some, bullied by others, and rejected by a stepfather, Ron was a stutterer, a bed-wetter, and an overweight kid who banged his head against the wall to knock himself to sleep at night. At age ten, he decided to take his own life. The gun did not fire. Afterward, a schoolteacher and a widowed neighbor stepped in and shared the love of God with him—forever changing his life. In this message-driven memoir, Archer shows readers how regardless of background and experiences, God can transform your pain into power and your misery into ministry. In *What Belief Can Do*, readers will discover:

- Everything we go through in life is a

down payment on our destiny.

- We are conceived and born with a divine design.
- Loving, caring people who mentor a child can change his or her life.
- Sometimes our greatest blessings are contained in our greatest challenges.

"In *Teaching the Best Practice Way*, Harvey Daniels and Marilyn Bizar present seven basic teaching structures that make classrooms more

active, experiential, collaborative, democratic, and cognitive, while simultaneously meeting best practice standards across subject areas and throughout the grades. Each chapter begins with an essay outlining one key method, providing its historical background and research results, and then describing the structure's vital features. Next, several teachers representing different grade levels and school communities explain how they adopted the basic model, adapted it to their students' needs, and made it their own."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
