Basic Radio New Harbinger Publications

A practical handbook for programming directors, this guide focuses on achieving specific objectives in today's modern, competitive environment. Radio Programming is designed to convey underlying principles and to assist the programmer in accomplishing specific objectives, without mandating exact implementation methods. Instead, it empowers station management and the PD to implement strategies that will work for the particular format and market niche. Radio Programming will be helpful for neophytes in programming, experienced programmers seeking further growth, air talent seeking to develop skills, and general managers trying to understand programming and effectively manage program directors without stifling creativity. It will also help general managers hire effective programmers. Eric Norberg is the editor and publisher of the

Adult Contemporary Music Research Letter and a radio consultant. He has worked as a program director at several radio stations, as on-air talent and general manager, and has also operated a radio production company. For fourteen years he has written a weekly column on radio programming for The Gavin Report, a radio trade publication.

Radio Programming: Tactics and Strategy Independently Published

This book is a practical guide to all aspects of modern journalism for anyone seeking to study for the National Council for the Training of Journalists (NCTJ) Diploma in Journalism and become a qualified journalist in the UK. Written in collaboration with the NCTJ, *Essential Journalism* outlines everything you need to know about the journalism industry today, from its ethical framework to its practice across print, television, radio, online and social media. It looks at the core principles and the skills that are required of journalists across all platforms, helping students develop an overall understanding of the business and examining the application and adaptation of traditional best practice to the demands of the digital age. This is a unique one-stop shop for anyone who wants to understand the nature and purpose of journalism, and how it is changing and evolving in today's digital newsrooms. This book is a core resource for journalism trainees and undergraduates, as well as for seasoned practitioners and lecturers.

The ideal text for a one-semester course in radio astronomy
Essential Radio Astronomy is the only textbook on the subject specifically designed for a one-semester introductory course for advanced undergraduates or graduate students in astronomy and astrophysics. It starts from first principles in order to fill gaps in students' backgrounds, make teaching easier for professors who are not expert radio astronomers, and provide a useful reference to the essential equations used by practitioners. This unique textbook reflects the fact that students of multiwavelength astronomy typically can afford to spend only one semester studying the observational techniques particular to each wavelength band. *Essential Radio Astronomy* presents only the most crucial concepts—succinctly and accessibly. It covers the general principles behind radio telescopes, receivers, and digital backends without getting bogged down in engineering details. Emphasizing the physical processes in radio sources, the book's approach is shaped by the view that radio astrophysics owes more to thermodynamics than electromagnetism. Proven in the classroom and generously illustrated throughout, *Essential Radio Astronomy* is an invaluable resource for students and researchers alike. The only textbook specifically designed for a one-semester course in radio astronomy
Starts from first principles
Makes teaching easier for astronomy professors who are not expert radio astronomers
Emphasizes the physical processes in radio sources
Covers the principles behind radio telescopes and receivers
Provides the essential equations and fundamental constants used by practitioners
Supplementary website includes lecture notes, problem sets, exams, and links to interactive demonstrations
An online illustration package is available to professors

If you're a highly sensitive person (HSP), you're in good company. HSP's make up some 20 percent of the population, individuals like you who both enjoy and wrestle with a finely tuned nervous system. You often sense things that others ignore such as strong smells, bright lights, and the crush of crowds. Even the presence of strangers in your immediate vicinity can cause you considerable distraction. You already know that this condition can be a gift, but, until you learn to master your sensitive nervous system, you might be operating in a constant state of overstimulation. As an HSP, the most important thing you can learn is how to manage your increased sensitivity to both physical and emotional stimulation. This accessible, practical guide contains strategies to help you master this critical skill. Build your coping skills by exploring the books engaging exercises. Then, keep the book by your side, a constant companion as you make your way through your vibrant and highly stimulating world. •Find out what it means to be a highly sensitive person •Take the self-examination quiz and find out whether you are highly sensitive •Learn coping techniques indispensable to HSP's •Discover how to manage distractions like noise and time pressure at home and at work •Reduce sensory-provoked tension with meditation and deep relaxation techniques •Navigate the challenges of interacting with others in social and intimate relationships

There is no such thing as perfect radio - and therein lies its delicious unpredictability. In fact, so charming is this quality that 90 per cent of UK adults tune into the medium every week. Like many things, radio done well sounds effortless. It is not. Producing great radio is partly down to instinct and partly down to learning then mastering the basics. Drawing upon his thirty years spent working with some of the finest talents in British radio, David Lloyd shares a plethora of valuable tips and tricks of the trade in this unique and authoritative guide to broadcasting success. Covering speech and music formats, local and national stations, technical and artistic skills, content and style considerations, and much, much more, this how-to is essential and accessible reading for all - whether you are taking your tentative first steps in radio or refreshing your existing industry knowledge. Lloyd's hugely entertaining selection of anecdotes, examples, research, insight and pointers sets out to bottle the very essence of memorable radio, determining the factors that

differentiate a truly great broadcaster from a distinctly average one, and helping budding hopefuls achieve their radio goals.

Is it worth doing a podcast if nobody listens? You started your podcast because you want to: - Spread an important message - Share your passion - Make money But your podcast hasn't quite taken off like you thought it would. What happened? This book is for podcasters who can't quite figure out what they're doing wrong (and are ready to do things right). You'll learn: - Why your "natural personality" may be repelling to people and how to make it attract listeners to your podcast like a magnet (See p198) - What to do when a company tries to "lowball" you on advertising fees (do nothing, except send them the email on p424) - It's easy to screw up an interview. To be sure you don't run into any problems, use my "guest contract" on p311. - A six-word "trick" (learned from a 20-year radio veteran) that will instantly make you a better host (it's on p210) - 9 reasons to kill an interview before it happens - ignore these "red flags" and you'll be sorry (p299) - What Victoria's Secret models know about podcasting (even though you never hear them talk) - this lesson starts on p208! - Nervous on the mic? You have lots of company - 75% of podcasters to be exact. I give you a 5-step way to cure your "stage fright" on p229. - If you're scared of getting bad reviews, don't worry - I have three simple ways to handle critics on p236 (two of which can turn critics into fans) - Why copying top podcasters may be killing your podcast (I share the story on p116) and how to develop a podcasting style that works for you (and will attract more listeners) - My 3-step "episode teaser" formula - it's boring, but it works (get it on p110) - Thinking of doing a "daily" podcast? You must read p103 before you start. - Want to impress a guest? See the chapter starting on p321 for my 3-step followup "ritual" that will make being on your podcast unforgettable (and encourage guests to promote your episodes) And that's just the start ... This book contains my complete system on how to attract listeners, deliver your message effectively, and build a big podcast. You can't build a big podcast on "hope." But you can build a big podcast. And if you're ready to do just that, read this book.
