CARLEE TANYA

Fighting for Honor Springer

A radical reassessment of the importance of women in East-Central African society during the precolonial period.

Rice Farmers in West Africa and the African Diaspora Boydell & Brewer

This landmark publication in comparative linguistics is the first comprehensive work to address the general issue of what kinds of words tend to be borrowed from other

languages. The authors have assembled a unique database of over 70,000 words from 40 languages from around the world, 18,000 of which are loanwords. This database (<http://loanwords.info>) allows the authors to make empirically founded generalizations about general tendencies of word exchange among languages. *Cloth in West African History* Vintage
Throughout history, fashion has emerged as one of the most powerful driving forces determining the political, economic and social ramifications of the production, distribution and circulation of goods.

Indeed fashion, especially in relation to clothing and textiles, shapes the relationship between self and society in unique ways. In this light, the collected papers in this volume position fashion as the lens - the critical mediating force - through which to analyse and understand cultural, economic and political shifts within a broad spectrum of societies in Europe, Asia, Africa and America from the seventeenth to twenty-first centuries. Topics include a seventeenth-century failing fashion region, the material politics of marketing American abolitionist

fashions, the construction of a fashionable ethos for French perfumes, and the use and meanings of clothing and textiles in the politics of Nigerian silk robes and early modern domestic décor in Europe. This volume represents an important shift in scholarship towards a more in-depth understanding of the role of fashion in early modern and modern times and will appeal to international readers interested in material culture, fashion, consumer studies and cultural anthropology, among other areas.

New Directions and Global Contexts

Libraries Unlimited

A bestselling modern classic—both poignant and funny—about a boy with autism who sets out to solve the murder of a neighbor's dog and discovers unexpected truths about himself and the world. Nominated as one of America's best-loved novels by PBS's The Great American Read Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. He relates well to animals but has no understanding of human emotions. He cannot stand to be touched. And he detests the color yellow. This improbable

story of Christopher's quest to investigate the suspicious death of a neighborhood dog makes for one of the most captivating, unusual, and widely heralded novels in recent years.

A Comparative Handbook Cambridge Scholars Publishing

In this holistic approach to the study of textiles and their makers, Colleen Kriger charts the role cotton has played in commercial, community, and labor settings. She pays close attention the details of how people made, exchanged, and wore cotton cloth from before industrialization in Europe to the twentieth century. Closely tracing this history in Nigeria, *Cloth in West African History* offers a fresh perspective on the history of the region and on the local, regional, and global processes that shaped it.

Houghton-mifflin Social Studies World Cultures And Geography Rowman Altamira
The Western Christian Presence in the Russias and Qājār Persia, c.1760-c.1870 recalls two long neglected European and North American missionary ventures in the Caucasus and Imperial Persia. It investigates the activities of Protestant and Catholic missionaries and provides

valuable insights on the social and political backdrop of their experiences.

The presence of African influence and tradition in the Americas has long been recognized in art, music, language, agriculture, and religion. T. J. Desch-Obi explores another cultural continuity that is as old as eighteenth-century slave settlements in South America and as contemporary as hip-hop culture. In this thorough survey of the history of African martial arts techniques, Desch-Obi maps the translation of numerous physical combat techniques across three continents and several centuries to illustrate how these practices evolved over time and are still recognizable in American culture today. Some of these art traditions were part of African military training while

others were for self-defense and spiritual discipline. Grounded in historical and cultural anthropological methodologies, Desch-Obi's investigation traces the influence of well-delineated African traditions on long-observed but misunderstood African and African American cultural activities in North America, Brazil, and the Caribbean. He links the Brazilian martial art capoeira to reports of slave activities recorded in colonial and antebellum North America. Likewise Desch-Obi connects images of the kalenda African stick-fighting techniques to the Haitian Revolution. Throughout the study Desch-Obi examines the ties between physical mastery of these arts and changing perceptions of honor. Including forty-five illustrations, this rich history of the arrival and dissemination of African martial arts in the Atlantic world offers a new vantage for furthering our understanding of the powerful influence of enslaved populations on our collective social history.

Tangut Language and Manuscripts: An Introduction BRILL

This book examines the radical changes in social and political landscape of the Upper

Guinea Coast region over the past 30 years as a result of civil wars, post-war interventions by international, humanitarian agencies and peacekeeping missions, as well as a regional public health crisis (Ebola epidemic). The emphasis on 'crises' in this book draws attention to the intense socio-transformations in the region over the last three decades. Contemporary crises and changes in the region provoke a challenge to accepted ways of understanding and imagining socio-political life in the region – whether at the level of subnational and national communities, or international and regional structures of interest, such as refugees, weapon trafficking, cross-border military incursions, regional security, and transnational epidemics. This book explores and transcends the central explanatory tropes that have oriented research on the region and re-evaluates them in the light of the contemporary structural dynamics of crises, changes and continuities.

Five Days at Memorial Indiana University Press

The first global history of African linguistics as an emerging autonomous

academic discipline, covering Africa, the Americas, Asia, Australia, and Europe. *Teaching the Critical Vocabulary of the Common Core* Prestwick House Inc
This document is a response to teachers' requests for practical assistance in implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history and social science, enliven instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups and women in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4) African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7) Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units

delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A presentation of activities to introduce and continue the sample topic are suggested to encourage students to apply what they have studied through projects. Each unit ends with an extensive annotated list of sample resources. (DK)

This annotated bibliography describes a

variety of print and electronic reference sources published in the past two decades about Northern Africa, including the Maghreb, the Sahel Region, and the Horn of Africa. The book is organized in three sections. The first part covers general reference works, the second part addresses area studies references by subject, and the third section covers reference sources by region and country. Each citation includes all bibliographic information except price.

Change and Continuity John Benjamins Publishing Company

Your students may recognize words like determine, analyze, and distinguish, but do they understand these words well enough to quickly and completely answer a standardized test question? For example, can they respond to a question that says "determine the point of view of John Adams in his Letter on Thomas Jefferson" and analyze how he distinguishes his position from an alternative approach articulated by Thomas Jefferson"? Students from kindergarten to 12th grade can learn to compare and contrast, to describe and explain, if they are taught these words

explicitly. Marilee Sprenger has curated a list of the critical words students must know to be successful with the Common Core State Standards and any other standardized assessment they encounter. Fun strategies such as jingles, movements, and graphic organizers will engage students and make learning these critical words enjoyable and effective. Learning the critical vocabulary will help your students with testing and college and career readiness, and will equip them with confidence in reading, writing, and

speaking. Marilee Sprenger is also the author of *How to Teach So Students Remember, Learning and Memory*, and *Brain-Based Teaching in the Digital Age*. [Ohio Experience](#) University Rochester Press
