Obligations: New Trajectories in Law provides a critical analysis of the role of obligations in contemporary legal and social practices. As rights have become the preeminent feature of modern political and legal discourse, the work of obligations has been overshadowed. Questioning and correcting this dominant image of our time, this book brings obligations back into view in a way that fits better with the realities of

contemporary social life. Following a historical account of the changing place and priorities of obligations in modernity, the book analyses how obligations and practices of obedience are core to understanding how law sustains conditions of inequality. But it also explores the enduring role obligations play in furthering individual and collective well-being, highlighting their significance in practices that prioritize human and environmental needs, common goods, and solidarity. In doing so, it also offers an alternative and cogent assessment of the force, and the potential, of obligations in contemporary societies. This original jurisprudential contribution will appeal to an academic and student readership in law, politics, and the social sciences.

Moral Principles and Political Obligations Cambridge University Press
Do citizens of a nation such as the United States have a moral duty to obey the law? Do officials, when interpreting the Constitution, have an obligation to follow what that text meant when ratified? To follow precedent? To follow what the Supreme Court today says the Constitution means? These are questions of political obligation (for citizens) and interpretive obligation (for anyone interpreting the Constitution, often officials). Abner Greene argues that such obligations do not exist. Although citizens should obey some laws entirely, and other laws in some instances, no one has put forth a successful argument that citizens should obey all laws all the time. Greene's case is not only "against"

obligation. It is also "for" an approach he calls "permeable sovereignty": all of our norms are on equal footing with the state's laws. Accordingly, the state should accommodate religious, philosophical, family, or tribal norms whenever possible. Greene shows that questions of interpretive obligation share many qualities with those of political obligation. In rejecting the view that constitutional interpreters must follow either prior or higher sources of constitutional meaning, Greene confronts and turns aside arguments similar to those offered for a moral duty of citizens to obey the law.

Getting Our Act Together Lulu Press, Inc
Traditionally, the public sector has been responsible for the provision of all public goods necessary to support sustainable

urban development, including public infrastructure such as roads, parks, social facilities, climate mitigation and adaptation, and affordable housing. With the shift in recent years towards public infrastructure being financed by private stakeholders, the demand for transparent guidance to ensure accountability for the responsibilities held by developers has risen. Within planning practice and urban development, the shift towards private financing of public infrastructure has translated into new tools being implemented to provide joint responsibility for upholding requirements. Developer obligations are contributions made by property developers and landowners towards public infrastructure in exchange for

decisions on land-use regulations which increase the economic value of their land. This book presents insight into the design and practical results of these obligations in different countries and their effects on municipal financial health, demonstrating the increasing importance of efficient bargaining processes and the institutional design of developer obligations in modern urban planning. Primarily written for academics in land-use planning, real estate, urban development, law, and economics, it will additionally be useful to policy makers and practitioners pursuing the improvement of public infrastructure financing.

The New German Law of Obligations

DIANE Publishing

An authoritative account of the German law of obligations after the reform legislation of 2002 and a critical assessment of the new law in historical and comparative perspective. The analysis covers the new regime concerning liability for general non-performance, non-conformity in sales law, the incorporation of a number of special statutes aimed at the protection of consumers, and examines how the reform has moved German contract law considerably closer to European thinking patterns.

Women and the Obligations of Citizenship Hill and Wang

What is expected of State authorities with regard to the obligation to safeguard the life of detainees? What obligations do State authorities have in relation to the investigation into deaths that occur during deprivation of liberty by the State? This book addresses these questions regarding death in State custody in view of the European Convention on Human Rights, in particular the right to life, the prohibition of torture and the right to respect for private life (including the right to self-determination). It also provides an analysis of whether the Dutch legal framework contains safeguards to meet the requirements that follow from the European Convention on Human Rights.

Matters that are discussed in detail are the obligation to provide healthcare to detainees and to take protective measures to safeguard the life of detainees. The ethical issues regarding end of life decisions of detainees, like refusal of medical treatment, hunger and/or thirst strike, suicide and euthanasia, and the conflicts that may arise in this regard considering the obligations of State authorities are addressed. This book is a must-have for all those who are involved in the (medical) treatment of detainees and who are confronted with death in State custody.

“A thoroughly upbeat and fully entertaining novel from cover to cover.” —Midwest Book Review
“*Brunch and Other Obligations* is women's fiction at its finest! A tender, witty, heartfelt novel that had me laughing out loud in one chapter and reaching for tissues in the

next. With humor, heart, and hope, Nugent reminds us that, once in a lifetime, if we're very, very lucky, we just might find a friend who knows us better than we know ourselves." —Lori Nelson Spielman, New York Times best-selling author of *The Life List* The only thing reclusive bookworm Nora, high-powered attorney Christina, and supermom-in-training Leanne ever had in common was their best friend, Molly. When Molly dies, she leaves mysterious gifts and cryptic notes for each of her grieving best friends, along with one final request: that these three mismatched frenemies have brunch together every month for a year. Filled with heartwrenching scenes and witty prose, *Brunch and Other Obligations* explores the intricate dynamics of girlhood

acquaintances who are forced to reconnect as women. This upbeat novel reminds readers that there's hope for getting through the hard times in life—with a lot of patience, humor, and a standing brunch date.

Death in State Custody Princeton University Press

In *The Edges of the Field* Harvard law professor Joseph William Singer offers a brilliant and cogent look at America's complex relation to property and ownership. Incorporating examples as far-reaching as the experience of Malden Mills owner and Polartec manufacturer Aaron Feuerstein, the Torah, and the musical *Rent*, Singer reminds us that ownership is a curious blend of security and vulnerability between owner and nonowner. He proposes that the manner

in which property shapes social relations of power is as important as ownership rights.

Many governments today are engaged in far-reaching programs of 'welfare reform'. But what would a just program of welfare reform consist in? Is the current emphasis on linking welfare 'rights' to 'responsibilities' justifiable? In this book, Stuart White reconsiders the principles of economic citizenship appropriate to a democratic society, and explores the radical implications of these

principles for public policy.

Comparative Law of Obligations Law Book Company for New South Wales Bar Association

This pioneering study redefines women's history in the United States by focusing on civic obligations rather than rights. Looking closely at thirty telling cases from the pages of American legal history, Kerber's analysis reaches from the Revolution, when married women did not have the same obligation as their husbands to be "patriots," up to the present, when men and women, regardless of their marital status, still have different obligations to serve in the Armed Forces. An original and compelling consideration of American law and culture, *No Constitutional Right to Be Ladies* emphasizes the dangers of

excluding women from other civic responsibilities as well, such as loyalty oaths and jury duty. Exploring the lives of the plaintiffs, the strategies of the lawyers, and the decisions of the courts, Kerber offers readers a convincing argument for equal treatment under the law.

An Essay on the Nature and Obligations of Virtue DIANE Publishing

Outlining the major competing theories in the history of political and moral philosophy--from Locke and Hume through Hart, Rawls, and Nozick--John Simmons attempts to understand and solve the ancient problem of political obligation. Under what conditions and for what reasons (if any), he asks, are we morally bound to obey the law and support the political institutions of our

countries?

[ob-li-gey-shuh n]: An obligation is a course of action that someone is required to take, whether legal or moral. At six years old, Myla was sent to a family her father and mother had chosen for her when they knew their time on earth was almost up. What they were unaware of was what they thought would be her safe haven would become her living hell. Kai has been watching Myla from afar since he took over the family business from his father and inherited the responsibility of keeping her safe. When word gets back to Kai that Myla is not only in danger, but that his assets are being compromised, he immediately jumps into action and does the only thing that can be done at the time by

marrying her. Neither Myla nor Kai would have thought that something that started off as a farce would become the most important thing either of them could've ever done.

In this collection of essays, Michael Walzer discusses how obligations are incurred, sustained, and (sometimes) abandoned by citizens of the modern state and members of political parties and movements as they respond to and participate in the most crucial and controversial aspects of citizenship: resistance, dissent, civil disobedience, war, and revolution. Walzer approaches these issues with insight and historical perspective, exhibiting an extraordinary understanding for rebels, radicals, and rational revolutionaries. The reader will not always agree with Walzer but he cannot help being stimulated, excited, challenged, and moved to thoughtful analysis.
