(Dravyaguna Vigyan) Pearson Education India

This book discusses the various aspects of sustainable packaging edibles in food industry. It is divided into five main parts. The first section of the book addresses details of edible films, various sources, origin, scope and functions. Second section covers different sustainable alternatives such as seed gums, fruits and vegetable peels, sea weeds, fruits wastes, dairy by products & anti-oxidant edible packaging. This book also discusses about methods of improvements of mechanical properties of packaging edibles & their food applications, testing methods, innovations, limitations, challenges and nano edibles. It provides insights

about the large quantity of wastes and by-products generated by food processing industries. Disposal of these wastes is a big problem due to their high biochemical oxygen demand (BOD) & chemical oxygen demand (COD) which causes severe problem of pollution to the environment. These wastes contain large amounts of proteins, carbohydrates, lipids, minerals, various bioactive compounds and have eco-friendly packaging potential. The book emphasizes on the fact that recycling these wastes as packaging edibles are sustainable and economical. As a world foreseeing food technology revolution, this book explores the unique topics in food packaging which possesses mammoth commercial applications and environmental potential. Due to its immense scope, this book is highly useful for researchers, food scientists, students and food packaging industry experts.

Competition Science Vision Sura Books

Increasingly, modern medicine relies on so called traditional or ancient medical knowledge. Holistic practices such as adhering to proper diet, observing rules for appropriate behavior, and administering medical preparations are coupled with the latest technology and methods to treat the whole patient. In light of this trend, there is much to be gained from understanding of one of the oldest medical systems still in existence. Tibetan Medicinal Plants provides you a detailed analysis of how Tibetan plants are used in this centuries old system. The book opens with a summary of Tibetan medicine and covers the various habitats in which the plants are found. The main part of this volume encompasses 60 monographs listed by the Tibetan plant name. Each monograph consists of several chapters addressing different topics related either to the Tibetan or the Western approach. Most of the monographs contain a description of the macroscopic and microscopic characteristics of the used plant parts, and anatomical features of 76 plants are provided. Each monograph presents an overview of the known chemical constituents and pharmacological properties of each plant and describes their use in Tibetan medicine. In contrast to other publications on Tibetan medicine, where translations of the Tibetan terms are given in other languages, this book treats the Tibetan word as a technical term, keeps the Tibetan term and explains its meaning, lessening confusion by reducing the number of translations. Traditional Tibetan medicine has been in existence for centuries. Curative practices existed in the pre-buddhist era, and the art of healing developed more than 2500 years ago. Tibetan Medicinal Plants provides a comprehensive overview of all plant types, thus making it easier to grasp the Tibetan concept. It gives you a comprehensive look at this centuries old science.

14 Years Solved Papers NEET 2022 Partridge Publishing

We all have, many a times, experienced this happening like thinking about an old friend in the morning and suddenly meeting him on the railway station the same evening or getting his phone call. Many such things do happen around us that cannot be explained by the laws of science. If we collect the tales of such unexplained events, we will realize that there are much more things for science to discover about nature than what it has already achieved. I am writing some of my own experiences with the unknown. I know that it will remind you of the many experiences that you had yourself. I am hopeful that this chain reaction will lead to a thought process that will finally culminate into scientific research projects in the fields of unknown powers.
