Every chess player needs to decide which openings he or she is going to play. But where do you start? The risk of drowning in the turbulent sea of chess opening theory is only too real for beginning amateurs. Often your goals and ambitions will be misguided. If you are trying to win in 20 moves, copy what's in fashion among top-GM's or memorize variations, you are wasting your time. Most likely you will never get to play your 'preparation' and end up aimlessly switching from one opening to the other. After the success of his volume for White, experienced French chess trainer Vincent Moret now provides a complete, ready-to-go chess opening repertoire for Black. It consists of a sound set of lines that do not outdate rapidly, do not require memorization and are easy to digest for beginners and post-beginners. To show the typical plans and the underlying ideas in the various lines of his repertoire, Moret not only selected games of Grandmasters. He also uses games of young, improving players to highlight the errors they tend to make.

It is not difficult to understand why the London System is such a popular chess opening with club players all over the world. Against virtually every Black defence after 1.d4 it offers White an easy-to-learn and reliable set of lines with interesting choices between strategic or more aggressive approaches, while avoiding tons of opening theory. Lately an increasing number of Grandmasters such as Alexander Grischuk, Gata Kamsky, Baadur Jobava, Richard Rapport and even World Champion Magnus Carlsen have played the London System. In this light it is surprising that so little has been published about this fascinating universal weapon. GM Alfonso Romero and FM Oscar de Prado have now filled this gap. In The Agile London System they present both historical material and recent top-level examples to provide a comprehensive overview. Romero and De Prado explain the typical plans and tactics using illustrative games with clear verbal explanations, and provide lots of tactical and strategic exercises. The authors reveal the secrets behind sharp ideas such as the Barry Attack and the Jobava Attack and have added an exciting chapter on the hyper-aggressive Pereyra Attack, developed by the Argentinean master Manuel Pereyra Puebla.

At the U.S. Championship in 1989, Stuart Rachels seemed bound for the cellar. Ranked last and holding no IM norms, the 20-year-old amateur from Alabama was expected to get waxed by the American top GMs of the day that included Seirawan, Gulko, Dzindzichashvili, deFirmian, Benjamin and Browne. Instead, Rachels pulled off a gigantic upset and became the youngest U.S. Champion since Bobby Fischer. Three years later he retired from competitive chess, but he never stopped following the game. In this wide-ranging, elegantly written, and highly personal memoir, Stuart Rachels passes on his knowledge of chess. Included are his duels against legends such as Kasparov, Anand, Spassky, Ivanchuk, Gelfand and Miles, but the heart of the book is the explanation of chess ideas interwoven with his captivating stories. There are chapters on tactics, endings, blunders,

middlegames, cheating incidents, and even on how to combat that rotten opening, the Réti. Rachels offers a complete and entertaining course in chess strategy. At the back are listed 110 principles of play—bits of wisdom that arise naturally in the book's 24 chapters. Every chess player will find it difficult to put this sparkling book down. As a bonus, it will make you a better player.

We live in a hierarchical world where experience has traditionally been the key to promotion. But that period is over! Straight, clear-cut career trajectories no longer exist. Industries disappear, job descriptions change, and people's interests and passions evolve. The key to riding this wave, entrepreneur James Altucher advises, is to constantly be curious about what's next, to be comfortable with uncertainty so you can keep navigating the rough waters ahead, and most important, to pursue the things that interest you. In Skip the Line, he reveals how he went from struggling and depressed to making his personal, financial, and creative dreams come true, despite—and perhaps due to—his many failures along the way. Altucher combines his personal story with concrete—and unorthodox—insights that work. But Skip the Line isn't about hacks and shortcuts—it's about transforming the way you think, work, and live, letting your interests guide your learning, time, and resources. It's about allowing yourself to do what comes naturally; the more you do what you love, the better you do it. In amateur chess games, the most popular opening move for White is 1.e4, and the most reliable reply for Black is 1...e5, says FIDE Master Or Cohen. In this book, Cohen has created a vibrant and robust opening repertoire for Black after 1...e5, based on the Petroff Defence. Cohen presents inventive ways for Black to fight for the initiative in this dependable opening. He covers the entire spectrum, the main variations as well as the most unexpected and bizarre sidelines. In case White does not allow the Petroff, Cohen offers a set of recommendations for Black that is no less important and principled; his repertoire against the Vienna and the King's Gambit, for example, is new and explosive. Most amateur White players faced with the Petroff will think that they will have an easy time, based on the peaceful reputation of this great opening among top grandmasters. Black players who have studied Or Cohen's book will make their life quite miserable. ,
