Easy to manage. As in the

dissection course, the Atlas is organized by body regions - this corresponds to the topics for course attendance certificates. Simple new introductory schemes and general overviews help you to understand the more complex figures and connections - step by step. Learning for clinical practice from the beginning. To facilitate the transfer of anatomical knowledge into clinical practice, the new SOBOTTA is equipped with even more clinical figures, including those made by new imaging techniques (X-ray, MRT, CT etc.), endoscopic image
