Unexpected Nation Oxford  
University Press

Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph provides a survey and analysis of the rules concerning Regulation (EU) No

608/2013 Concerning Customs Enforcement of Intellectual Property Rights. It covers every type of intellectual property right in depth – copyright and neighbouring rights,

patents, utility models, trademarks, trade names, industrial designs, plant variety protection, chip protection, trade secrets, and confidential information. Particular attention is paid throughout to recent developments and trends. The analysis approaches each right in terms of its sources in law and in legislation, and proceeds to such legal issues as subject matter of protection, conditions of protection, ownership, transfer of rights, licences, scope of

exclusive rights, limitations, exemptions, duration of protection, infringement, available remedies, and overlapping with other intellectual property rights. The book provides a clear overview of intellectual property legislation and policy, and at the same time offers practical guidance on which sound preliminary decisions may be based. Lawyers representing parties with interests in Regulation (EU) No 608/2013 Concerning Customs Enforcement of

Intellectual Property Rights will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative intellectual property law. **Interpretation in International Law** International Monetary Fund This volume proposes the 'poetics of politics' as an analytic angle to interrogate contemporary cultural production in the United States. As recent scholarship has observed, American literature and

culture around the turn of the millennium, while still deeply informed by the textual self-consciousness of postmodernism, are marked by a rekindled interest in matters of social concern. This revived interest in politics is frequently read as a 'grand epochal transition.' Sidestepping such a logic of periodization, this book points to the interplay between the textual and the political as a dynamic - always locally specific - that affords unique insights into the characteristics of the

contemporary moment. The sixteen case studies in this book explore this interplay across a wide range of media, genres, and modes. Together, they make visible a broad cultural concern with negotiating social relevance and textual self-awareness that permeates and structures contemporary US (popular) culture. Reconceptualizing English Education in a Multilingual Society Springer  
Drawing on more than sixty on-the-record interviews with all the

major players, *Triumph and Demise* is full of remarkable disclosures. It is the inside account of the hopes, achievements and bitter failures of the Labor Government from 2007 to 2013. Kevin Rudd and Julia Gillard came together to defeat John Howard, formed a brilliant partnership and raised the hopes of the nation. Yet they fell into tension and then hostility under the pressures of politics and policy. Veteran journalist Paul Kelly probes the dynamics of the Rudd-Gillard partnership and

dissects what tore them apart. He tells the full story of Julia Gillard's tragedy as our first female prime minister—her character, Rudd's destabilisation, the carbon tax saga and how Gillard was finally pulled down on the eve of the 2013 election. Kelly documents the most misunderstood event in these years—the rise of Tony Abbott and the reason for his success. It was Abbott's performance that denied Rudd and Gillard the chance to recover. Labor misjudged Abbott and

paid the price. Kelly writes with a keen eye and fearless determination. His central theme is that Australian politics has entered a crisis of the system that, unless corrected, will diminish the lives of all Australians. *Europe's Treasure Ireland* Bloomsbury Publishing Economics for People and the Planet, a collection of essays by James K. Boyce on the environment, inequality and the economy, argues that there is not an inexorable trade-off between advancing human well-

being and having a clean and safe environment. The goal of economic policy should be to grow the good things that improve our well-being and environmental quality and reduce the bad things that harm humans and nature. To reorient the economy for these ends, we will need to achieve a more egalitarian distribution of wealth and power. Global climate change – the most pressing environmental challenge of our time – adds urgency to this task and creates historic

opportunities for moving towards a greener future. *Politics and Pan-Africanism* Kluwer Law International B.V. From bank bailouts to austerity, Europe's and Ireland's response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors, financiers, bankers and the privileged are protected. The authors expose the class-based nature of Ireland's crisis resolution. *Regulating Information*

*Asymmetry in the Residential Real Estate Market* OUP Oxford In the wake of Brexit, the Commonwealth has been identified as an important body for future British trade and diplomacy, but few know what it actually does. How is it organized and what has held it together for so long? How important is the Queen's role as Head of the Commonwealth? Most importantly, why has it had such a troubled recent past, and is it realistic to imagine that its fortunes might be

reversed? In *The Empire's New Clothes*,? Murphy strips away the gilded self-image of the Commonwealth to reveal an irrelevant institution afflicted by imperial amnesia. He offers a personal perspective on this complex and poorly understood institution, and asks if it can ever escape from the shadow of the British Empire to become an organization based on shared values, rather than a shared history. *Triumph and Demise* Melbourne Univ.

<p>Publishing The concept of compliance of World Trade Organization (WTO) law as part of international economic law is examined in this discerning book. The issue of compliance is examined through a broad perspective, considering the key conceptual issues which continue</p> <p><i>More Balanced, Less Isolated, Increasingly Diversified</i> Springer This book conducts a detailed examination of the current form of the</p>	<p>Hong Kong residential property regulatory system: the 2013 Residential Properties (Firsthand Sales) Ordinance (Cap 621). The author sheds light on how the new legislation promotes a number of values including information symmetry, consumer protection, the free market and business efficacy. It provides a detailed account of how the regulatory mechanism has evolved over the past three decades to catch unconscionable sales tactics (such as selective</p>	<p>information and/or misrepresentation of location, size, completion date and past transactions) and monitor sales practices in order to protect the interests of stakeholders in this ever-changing first-hand residential property market. This book breaks down this complicated subject matter by focusing a number of chapters each on a specific attribute of the residential property on sale. It then examines the various channels through which the information is</p>
---	---	---

communicated to the prospective buyer and discusses misrepresentation of the key information in sales of residential properties as criminal liability. The tension between consumer's rights on one hand and the pursuit of free market principles on the other is but one example of the conflicting values thoroughly discussed in the book, others include superstition vs. modernization and clarity vs. flexibility. Aimed at those with an interest in

consumer protection and transparency-orientated legislation in commercialized real estate transactions, this book seeks to provide an in-depth discussion of the latest trends and directions of travel. United Republic of Tanzania Universitätsverlag Winter Online auctions have undergone many transformations and continue to attract millions of customers worldwide. However these popular platforms remain understudied by legal

scholars and misunderstood by legislators. This book explores the legal classification of online auction sites across a range of countries in Europe. Including empirical studies conducted on 28 online auction websites in the UK, the research focusses on the protection of consumers' economic rights and highlights the shortcomings that the law struggles to control. With examinations into important developments, including the Consumer

Rights Directive and the latest case law from the CJEU on the liability of intermediaries, Riefa anticipates changes in the law, and points out further changes that are needed to create a safe legal environment for consumers, whilst preserving the varied business model adopted by online auction sites. The study provides insights into how technical measures as well as a tighter legislative framework or enforcement pattern could provide consumers

with better protection, in turn reinforcing trust, and ultimately benefiting the online auction platforms themselves.

*English in the Philippines*  
Linde Verlag GmbH  
Data, in its raw or unstructured form, has become an important and valuable economic asset, lending it the sobriquet of ‘the oil of the twenty-first century’. Clearly, as intellectual property, raw data must be legally defined if not somehow protected to ensure that its access and re-use can be subject to legal

relations. As legislators struggle to develop a settled legal regime in this complex area, this indispensable handbook will offer a careful and dedicated analysis of the legal instruments and remedies, both existing and potential, that provide such protection across a wide variety of national legal systems. Produced under the auspices of the International Association for the Protection of International Property (AIPPI), more than forty of the association’s

specialists from twenty-three countries worldwide contribute national chapters on the relevant law in their respective jurisdictions. The contributions thoroughly explain how each country approaches such crucial matters as the following: if there is any intellectual property right available to protect raw data; the nature of such intellectual property rights that exist in unstructured data; contracts on data and which legal boundaries stand in the way of contract drafting; liability

for data products or services; and questions of international private law and cross-border portability. Each country's rules concerning specific forms of data – such as data embedded in household appliances and consumer goods, criminal offence data, data relating to human genetics, tax and bank secrecy, medical records, and clinical trial data – are described, drawing on legislation, regulation, and case law. A matchless legal resource on one of the most important raw

materials of the twenty-first century, this book provides corporate counsel, practitioners and policymakers working in the field of intellectual property rights, and concerned academics with both a broad-based global overview on emerging legal strategies in the protection of unstructured data and the latest information on existing legislation and regulation in the area.

CrisisEurope's Treasure Ireland

While conventional warfare has an established body of legal precedence, the legality of drone strikes by the United States in Pakistan and elsewhere remains ambiguous. This book explores the legal and political issues surrounding the use of drones in Pakistan.

Drawing from international treaty law, customary international law, and statistical data on the impact of the strikes, Sikander Ahmed

Shah asks whether drone strikes by the United States in Pakistan are in compliance with international humanitarian law. The book questions how international law views the giving of consent between States for military action, and explores what this means for the interaction between sovereignty and consent. The book goes on to look at the socio-political realities of drone strikes in Pakistan, scrutinizing the impact of drone strikes on both

Pakistani politics and US-Pakistan relationships.

Topics include the Pakistan army-government relationship, the evolution of international institutions as a result of drone strikes, and the geopolitical dynamics affecting the region. As a detailed and critical examination of the legal and political challenges presented by drone strikes, this book will be essential to scholars and students of the law of armed conflict, security studies, political science

and international relations.

**The G20 and the Future of International Economic Governance**

John Wiley & Sons

This paper aims to discuss the economic reform program in Jamaica that focuses on reducing macroeconomic vulnerabilities, fostering growth, creating conditions for financial deepening and inclusion, reallocating public resources to maximize economic returns, and improving competitiveness. After

three years of difficult economic reforms, inflation is at historical lows, current account deficit has more than halved, net international reserves have doubled, and access to domestic and international financial markets has been restored, supported by upgrades in credit ratings and historically high business confidence indicators. Comprehensive reforms in tax policy and administration have been undertaken, while strict

adherence to fiscal discipline have helped place debt on a downward trajectory.

*Competition Law* Oxford University Press

This book brings together chapters that describe, investigate, and analyze the place of English in education in multilingual Philippines. Unlike most studies on languages in education, which take a neutral, de-contextualized stance, this volume take a pluricentric view of the English language by positioning it in relation to its varieties, as well as to

other languages in the country. Because of the changing realities of English in the Philippines, traditional assumptions about the language as monolithic and unchanging, as well as about how it should be taught and learned, need to be revisited and re-conceptualized.

Historical and Policy Aspects of Supplementing Wages in Britian and Beyond International Monetary Fund

Time to discuss anti-BEPS measures around digitalization In the course

of the BEPS Report on Action 1, it was concluded that there was no instantaneous need for specific rules to address base erosion and profit shifting (BEPS) made possible by the digitalization of enterprises and new digital businesses. At the same time, it was acknowledged that general measures may not suffice with the assessment of results to begin in 2020. While awaiting possible fundamental reforms of the tax framework, it is

time to discuss anti-BEPS measures bearing in mind the peculiar features of the digital economy such as increased mobility, no need for physical presence, and dematerialization. The Book focuses on five key areas of interest: International Tax Policy Tax Treaty Law Transfer Pricing Indirect Taxation Issues EU Law "Taxation in a Global Digital Economy" analyses the issues and addresses the five key areas of interest from various viewpoints.

Cambridge University Press

Offering an examination of the diplomatic and economic regional power structures in Africa and their relationships with each other, Dawn Nagar discusses the potential and future of pan-Africanism. The three primary regional economic communities (RECs) that are recognised by the African Union as the key building blocks of a united Africa are examined - these are the Common Market for Eastern and Southern

Africa (COMESA), the East African Community (EAC) and the Southern African Development Community (SADC). These RECS include Africa's major economies - Egypt, South Africa, and Kenya but are also home to Africa's most conflict prone and volatile states - the Democratic Republic of the Congo (DRC), Burundi, South Sudan, Somalia and Lesotho. Providing a detailed overview of the current relationship between these power blocs, this book provides insight into the current

state of diplomatic and economic relations within Africa and shows how far there is to go for a future of Pan-Africanism.

In a dispute, governments

weigh up their options when selecting between various dispute settlement mechanisms. By scrutinising the interaction of institutional design with state interests, this book analyses why particular forums are selected in maritime boundary disputes.

*Studies in Intelligence*

Linde Verlag GmbH

International investment law is in transition.

Whereas the prevailing mindset has always been the protection of the economic interests of

individual investors, new developments in international investment law have brought about a paradigm shift. There is now more than ever before an interest in a more inclusive, transparent, and public regime. *Shifting Paradigms in International Investment Law* addresses these changes against the background of the UNCTAD framework to reform investment treaties. The book analyses how the investment treaty regime has changed and how it

ought to be changing to reconcile private property interests and the state's duty to regulate in the public interest. In doing so, the volume tracks attempts in international investment law to recalibrate itself towards a more balanced, less isolated, and increasingly diversified regime. The individual chapters of this edited volume address the contents of investment agreements, the system of dispute settlement, the interrelation of investment agreements

with other areas of public international law, constitutional questions, and new regional perspectives from Europe, South Africa, the Pacific Rim Region, and Latin America. Together they provide an invaluable resource for scholars, practitioners, and policymakers. The individual chapters of this edited volume address the contents of investment agreements, the system of dispute settlement, the interrelation of investment agreements

with other areas of public international law, constitutional questions, and new regional perspectives from Europe, South Africa, the Pacific Rim Region, and Latin America. Together they provide an invaluable resource for scholars, practitioners, and policymakers. *Living on the Edge* Routledge The US in the 1950s and 1960s wanted to prevent a new communist regime in the Western hemisphere at any cost. Under President

Eisenhower the US pursued a policy of support for dictators, the economic shoring up of regimes that impoverished their own people and sanctioned direct interventions such as the overthrow of the Guatemalan government in 1954. When John F. Kennedy came to power, he promised a reset of relations and set about pouring aid into Latin America. Yet in 1961 Kennedy also attempted to intervene in Central American domestic politics with the Bay of

Pigs operation. How far was each of the approaches pursued by the two administrations responsible for increasing tensions and encouraging radicalism on the continent? In answering this question Bevan Sewell shows how Eisenhower's strategic stance on the Cold War became increasingly detrimental to Latin America over time, and shows how similar policies were continued by the Kennedy administration. The US and Latin America provides a new lens

through which to assess US policy towards Latin America at an important time in inter-American relations.

*Market Manipulation and Insider Trading* Springer

This paper focuses on Uganda's 2013 Article IV Consultation and Sixth Review Under the Policy Support Instrument, Request for a Three-Year Policy Support Instrument and cancellation of Current Policy Support Instrument. Driven mainly by investment and trade, growth has recovered to about 5 percent, a

stronger than expected rebound from the low 3 1/2 percent expansion registered last year. Fast implementation of road construction, the start of operations of the Bujagali hydropower plant, and a good harvest boosted aggregate demand. Envisaged public finance management reforms are set to address the problems of persistent under budgeting, arrears accumulation, and failure to sanction financial irregularities.
