This book focuses on social and cultural trends in present-day Hadrami Arab societies in Eastern and Central Indonesia, and the history of the Hadrami Arab people, which demonstrates an early form of globalization. For centuries migration has played a vital part in Hadrami adaptation. External forces, such as the expanding powers of the Portugese in the Indian Ocean and the Turkish conquering Yemen, and internal forces like poverty, droughts and political unrest as well as trading opportunities and missionary work instigated migration movements. While some Hadrami Arabs sought work in North America and Europe, other waves of Hadrami migration have followed the monsoon winds of the Indian Ocean to the Zanzibar coast, India, Malaysia and Indonesia. The story of Hadramis in Indonesia has largely been a story of success, in terms of trade, politics, education and religious activities. Despite continual debate regarding what constitutes Indonesian Hadrami identity, the author argues that they are still "an Indonesia-oriented group with an Arab signature". This book will be of interest to Southeast Asian and Middle East specialists and scholars in Anthropology and Migration Studies.

Although the details of tax law are literally endless—differing not only from jurisdiction to jurisdiction but also from day-to-day—structures and patterns exist across tax systems that can be understood with relative ease. This book, now in an updated new edition, focuses on these essential patterns. It provides an immensely useful introduction to the core common knowledge that any well-informed tax lawyer or policy maker should have about comparative tax law in our times. The busy reader will welcome the compact nature of this work, which is shorter than the first edition and can be read in a weekend if one skips footnotes. The authors elucidate the commonalities and

differences across countries in areas including (much of the detail new to the second edition): • general anti-avoidance rules; • court decisions striking down tax laws as violating constitutional rules against retroactivity, unequal treatment of equals, confiscation, and undue vagueness; • statutory interpretation; • inflation adjustment rules and the allowance for corporate equity; • value added tax systems; • concepts such as “tax”, “capital gain”, “tax avoidance”, and “partnership”; • corporate-shareholder tax systems; • the relationship between tax and financial accounting; • taxation of investment income; • tax authorities’ ability to obtain and process information about taxpayers; and • systems of appeals from tax assessments. The information and analysis pull together valuable material which is scattered over a disparate literature, much of it not available in English. Especially considering the dynamic nature of tax law, whose rate of change exceeds that of any other field of law, the authors’ clear identification of the underlying patterns and fundamental structures that all tax systems have in common—as well as where the differences lie—guides the reader and offers resources for further research.

Japanese foreign direct investment has played a leading role in Asian economies for more than two decades. This book, describing the changing industrial dynamics after the Asian currency crisis in 1997, focuses on corporate strategies of Japanese automobile and electronics companies in Asian nations, with detailed analysis of management issues and strategies from the viewpoint of both the home economy and the recipient host economies. Among the cases presented are the global restructuring of the Korean automobile industry and the transfer of automotive technology to China via Taiwan. Other studies, from the electronics industry, look at production sites in Malaysia, backward integration in Singapore, and forward integration in Hong Kong. The contributions of specialists from Asia, Europe, and the United States collected here envision an ongoing process of globalization and provide valuable perspective and background for business management and East Asian studies.

This book by a leading expert considers the growth of an inefficient superlayer in Southeast Asian economies and assesses the problems that this poses for future economic development. Yoshihara argues that as technological backwardness, the low

quality of government intervention, and discrimination against those of Chinese descent have prevented capitalism from stimulating development, there has emerged a brand of ersatz capitalism very different from the capitalism in Japan and the West. He goes on to offer recommendations for creating a dynamic capitalism while acknowledging that obstacles to their implementation exist in current Southeast Asian social and political systems.

Today, some suppliers have grown increasingly powerful and in certain cases, earn revenues that rival or even exceed that of their automaker clients. In the pre-globalisation period, automakers wielded absolute power over their significantly smaller suppliers. This book reveals the upending of this relationship, with the gradual shift in the balance of power from automakers to their suppliers in this era of globalisation. The book examines how suppliers in the global tyres, seats, constant velocity joints (hereafter 'CVJs'), braking systems and automotive semiconductor industries have evolved into powerful oligopolies through a mix of acquisition and organic growth strategies. It also highlights how joint ventures could be strategically deployed as springboards to acquisition, as they enable firms to familiarise themselves with their partners' markets and operations.

Moreover, the book analyses the disruption stirred by the entry of well-resourced technology titans into this industry and their inevitable clash with the traditional incumbents. This book is an invaluable reference for anyone interested in learning more about the automakers' and now their suppliers' relentless quest to create market-dominating intelligent driving systems.

"This pioneering study of United States direct investment in Japan will interest academic specialists, business managers, and government policymakers in America, Japan, and elsewhere. Drawing on rich historical materials from both sides of the Pacific, including corporate records and government documents never before made public, Mason examines the development of both Japanese policy towards foreign investment and the strategic responses of American corporations. This history is related in part through original case studies of Coca-Cola, Dow Chemical, Ford, General Motors, International Business Machines, Motorola, Otis Elevator, Texas Instruments, Western Electric, and Victor Talking Machine. The book seeks to explain why a little foreign direct investment has entered modern Japan. In contrast to the widely held view that emphasizes an alleged lack of effort on the part of foreign corporations, this study finds that Japanese restrictions merit greater attention. Many analysts of the modern Japanese political economy identify the Japanese government as the key actor in initiating such restrictions. Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese political economy and of its relations with the world economy."

On 28 July 2008, the ASEAN Studies Centre and the Regional Economic Studies Programme, both of the Institute of Southeast Asian Studies, and the Konrad Adenauer Stiftung organized a roundtable on The ASEAN Economic Community Blueprint. The brainstorming session gathered Southeast Asian experts from the region to discuss the AEC Blueprint, which ASEANs leaders had adopted at their summit meeting in November 2007, and the prospects of any obstacles to its implementation by the target year, 2015. The roundtable started with a progress report on the AEC Blueprint given by S. Pushpanathan, Principal Director of

Economic Integration and Finance, ASEAN Secretariat, Jakarta. Thereafter, the sessions examined the various aspects of the Blueprint tackling the non-tariff barriers, designing a comprehensive ASEAN Investment Agreement, a regional framework for competition policy, the role of infrastructure development in economic integration, the importance of international production networks in economic integration, etc.

**99,99% SUKSES SBMPTN SOSHUM 2018** John Wiley & Sons Lean Thinking was launched in the fall of 1996, just in time for the recession of 1997. It told the story of how American, European, and Japanese firms applied a simple set of principles called 'lean thinking' to survive the recession of 1991 and grow steadily in sales and profits through 1996. Even though the recession of 1997 never happened, companies were starving for information on how to make themselves leaner and more efficient. Now we are dealing with the recession of 2001 and the financial meltdown of 2002. So what happened to the exemplar firms profiled in Lean Thinking? In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date. Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition.
