We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The Peter Principle Yale University Press

A thought-provoking examination of the complex teacher-student relationship, from one of

the great minds of the modern literary world. Based on George Steiner's extensive experience as a teacher, *Lessons of the Masters* is a passionate examination of the "profession of the professor." He writes about what empowers one person to teach another, and explores the complexities and nuances of this bond. From the charismatic master to the loving disciple, Steiner explores the religious, philosophical, economic, and scientific aspects of imparting knowledge,

drawing upon history's most famous teachers: Socrates, Jesus, Faust, Virgil, Dante, Heloise, and Abelard.

Achtung-Panzer! John Wiley & Sons

This is an exact reproduction of the 1738 edition of Voltaire's *The Elements of Sir Issac Newton's Philosophy*. An index has been added under supervision of the general editor.

[Information Sources in Grey Literature](#) Routledge

A scientist friend asked Bruno Latour point-blank: "Do you believe in

reality?" Taken aback by this strange query, Latour offers his meticulous response in Pandora's Hope. It is a remarkable argument for understanding the reality of science in practical terms. In this book, Latour, identified by Richard Rorty as the new "bête noire of the science worshippers," gives us his most philosophically informed book since *Science in Action*. Through case studies of scientists in the Amazon analyzing soil and in Pasteur's lab studying the

fermentation of lactic acid, he shows us the myriad steps by which events in the material world are transformed into items of scientific knowledge. Through many examples in the world of technology, we see how the material and human worlds come together and are reciprocally transformed in this process. Why, Latour asks, did the idea of an independent reality, free of human interaction, emerge in the first place? His answer to this question, harking back to

the debates between Might and Right narrated by Plato, points to the real stakes in the so-called science wars: the perplexed submission of ordinary people before the warring forces of claimants to the ultimate truth.

Growing Pains of a Colonial Society IWA Publishing

What are scientific inquiry practices like today? How should schools approach inquiry in science education? Teaching Science Inquiry presents the scholarly papers and

practical conversations that emerged from the exchanges at a two-day conference of distinctive North American 'science studies' and 'learning science'scholars.

The Soar Cognitive

Architecture [Keele] :

University of Keele

This brilliant and original book sets out to dismantle the idea that movements, crises and other phenomena produced in society must be explained by exclusively social causes, without recourse to psychological explanations. The author

argues that we should reassess the significance of psychological causes in human affairs. Whilst psychological causes are undoubtedly distinct from social causes, all social phenomena are events or facts brought about by human beings: it is their passions which stimulate their great political, religious and cultural creations. He discusses the work of Durkehim, Mauss, Weber and Simmel, and argues that only a productive interplay between psychology and sociology

will do justice to the interdisciplinary character of their thought. Winner of the European Amalfi Prize for Sociology, *The Invention of Sociology* will be welcomed by students and researchers in sociology, social psychology, and the social sciences generally.

Historia da litteratura portugueza

Columbia University Press

Education in the Global South faces several key interrelated challenges, for which Open Educational Resources (OER) are seen to be part

of the solution. These challenges include: unequal access to education; variable quality of educational resources, teaching, and student performance; and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality and reduce the cost of

education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice and

research in developing countries.

Essays on the Reality of Science Studies

Prentice Hall

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his

days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book -

used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Adoption and impact of OER in the Global South

Runaway World Covering the full range of nursing interventions, Nursing Interventions Classification (NIC), 6th Edition provides a research-based clinical tool to help in selecting appropriate interventions. It standardizes and defines the knowledge

base for nursing practice while effectively communicating the nature of nursing. More than 550 nursing interventions are provided — including 23 NEW labels. As the only comprehensive taxonomy of nursing-sensitive interventions available, this book is ideal for practicing nurses, nursing students, nursing administrators, and faculty seeking to enhance nursing curricula and improve nursing care. More than 550 research-based nursing intervention labels with

nearly 13,000 specific activities Definition, list of activities, publication facts line, and background readings provided for each intervention. NIC Interventions Linked to 2012-2014 NANDA-I Diagnoses promotes clinical decision-making. New! Two-color design provides easy readability. 554 research-based nursing intervention labels with nearly 13,000 specific activities. NEW! 23 additional interventions include: Central Venous Access Device Management,

Commendation, Healing Touch, Dementia Management: Wandering, Life Skills Enhancement, Diet Staging: Weight Loss Surgery, Stem Cell Infusion and many more. NEW! 133 revised interventions are provided for 49 specialties, including five new specialty core interventions. NEW! Updated list of estimated time and educational level has been expanded to cover every intervention included in the text. Race and History Cambridge University

 “An eloquent expression of a great hope that philosophy may again become an activity really relevant not only to the perennial problems of life and death but to the unusual configurations of such problems in our time.”—Julian N. Hartt, Yale Review “Original, sincere, cultivated, and stimulating.”—Philosophy One of the founders of existentialism, the eminent philosopher Karl Jaspers here presents for the general reader an introduction to

philosophy. In doing so, he also offers a lucid summary of his own philosophical thought. In Jaspers' view, the source of philosophy is to be found "in wonder, in doubt, in a sense of forsakenness," and the philosophical quest is a process of continual change and self-discovery. In a new foreword to this edition, Richard M. Owsley provides a brief overview of Jaspers' life and achievement.

A Theory of Constitutional Rights

Franklin Classics
In 1550 the German adventurer Hans Staden was serving as a gunner in a Portuguese fort on the Brazilian coast. While out hunting, he was captured by the Tupinambá, an indigenous people who had a reputation for engaging in ritual cannibalism and who, as allies of the French, were hostile to the Portuguese. Staden's True History, first published in Germany in 1557, tells the story of his nine months among the Tupi Indians. It is a

dramatic first-person account of his capture, captivity, and eventual escape. Staden's narrative is a foundational text in the history and European "discovery" of Brazil, the earliest European account of the Tupi Indians, and a touchstone in the debates on cannibalism. Yet the last English-language edition of Staden's True History was published in 1929. This new critical edition features a new translation from the sixteenth-century German along with annotations

and an extensive introduction. It restores to the text the fifty-six woodcut illustrations of Staden's adventures and final escape that appeared in the original 1557 edition. In the introduction, Neil L. Whitehead discusses the circumstances surrounding the production of Staden's narrative and its ethnological significance, paying particular attention to contemporary debates about cannibalism. Whitehead illuminates the value of

Staden's True History as an eyewitness account of Tupi society on the eve before its collapse, of ritual war and sacrifice among Native peoples, and of colonial rivalries in the region of Rio de Janeiro. He chronicles the history of the various editions of Staden's narrative and their reception from 1557 until the present. Staden's work continues to engage a wide range of readers, not least within Brazil, where it has recently been the subject of two films and a graphic novel.

Way to Wisdom
Psychology Press
In this brilliant meditation on conceptions of history, Le Goff traces the evolution of the historian's craft. Examining real and imagined oppositions between past and present, ancient and modern, oral and written history, *History and Memory* reveals the strands of continuity that have characterized historiography from ancient Mesopotamia to modern Europe.

This is the first monograph dedicated to this interdisciplinary research area, combining the views of music, computer science, education, creativity studies, psychology, and engineering. The contributions include introductions to ubiquitous music research, featuring theory, applications, and technological development, and

descriptions of permanent community initiatives such as virtual forums, multi-institutional research projects, and collaborative publications. The book will be of value to researchers and educators in all domains engaged with creativity, computing, music, and digital arts.

A Collection of Essays
BRILL

Refugees from the violence of wars and the brutality of famished lives have knocked on other people's doors since the beginning of time. For the people behind the doors, these uninvited guests were always strangers,

and strangers tend to generate fear and anxiety precisely because they are unknown. Today we find ourselves confronted with an extreme form of this historical dynamic, as our TV screens and newspapers are filled with accounts of a 'migration crisis', ostensibly overwhelming Europe and portending the collapse of our way of life. This anxious debate has given rise to a veritable 'moral panic' - a feeling of fear spreading among a large number of people that some evil threatens the

well-being of society. In this short book Zygmunt Bauman analyses the origins, contours and impact of this moral panic - he dissects, in short, the present-day migration panic. He shows how politicians have exploited fears and anxieties that have become widespread, especially among those who have already lost so much - the disinherited and the poor. But he argues that the policy of mutual separation, of building walls rather than bridges, is misguided. It may bring some short-

term reassurance but it is doomed to fail in the long run. We are faced with a crisis of humanity, and the only exit from this crisis is to recognize our growing interdependence as a species and to find new ways to live together in solidarity and cooperation, amidst strangers who may hold opinions and preferences different from our own. People and Profits? Univ of California Press
A posthumous collection of essays by the great novelist, essayist, literary critic, and philosopher

Umberto Eco
Memory Practices in the Sciences Hachette UK
Jürgen Habermas is one of the most influential philosophers of our time. His diagnoses of contemporary society and concepts such as the public sphere, communicative rationality, and cosmopolitanism have influenced virtually all academic disciplines, spurred political debates, and shaped intellectual life in Germany and beyond for more than fifty years. In The Habermas

Handbook, leading Habermas scholars elucidate his thought, providing essential insight into his key concepts, the breadth of his work, and his influence across politics, law, the social sciences, and public life. This volume offers a comprehensive overview and an in-depth analysis of Habermas's work in its entirety. After examining his intellectual biography, it goes on to illuminate the social and intellectual context of Habermasian thought, such as the Frankfurt School, speech-

act theory, and contending theories of democracy. The Handbook provides an extensive account of Habermas's texts, ranging from his dissertation on Schelling to his most recent writing about Europe. It illustrates the development of his thought and its frequently controversial reception while elaborating the central ideas of his work. The book also provides a glossary of key terms and concepts, making the complexity of Habermas's thought accessible to a

broad readership.

History of Music

Columbia University Press
The Cambridge Assignments in Music series features a variety of books, audio cassettes and CDs including History of Music, Popular Music, Performing and Responding and Popular Music. This book presents a brief outline of the history of western music, covering all important areas, with the main emphasis on recognition of style and period. A checklist of pointers, or 'fingerprints' of music

style, is included for each period and the book ends with a main summary chart. The book is intended to help GCSE

candidates in areas of the examination which involve the history of music and music styles,

especially in questions where they are asked to identify the period and composer of previously unheard pieces of music.
