The Secrets of the Self is a book-length, philosophical poem rooted in metaphysical thought and ideology, as well as Islamic theology.

Originally published in 1915, the poem speaks of the "Self" in relation to the universe, how it is the inner power and soul of each individual human. It instructs on how to improve the Self through Love and willpower, which can then help one control the forces within the universe. The poem includes stories that illustrate its points and promotes the spread of Islamic ideals.

MUHAMMAD IQBAL (1877-1938) was a poet, prophet, and politician in British India. Born in Sialkot, Punjab, Iqbal converted to Islam with his family as a child. He studied literature and law at Cambridge, Munich, and Heidelberg before starting his own law practice and concentrating on his scholarly writing, which he authored primarily in Persian. Many of Iqbal's

works promote Islamic revival, especially in South Asia, and he was a well-known leader of the All India Muslim League. Today, he is recognized as the official poet of Pakistan, and his birthday is celebrated as a national holiday.

Distance learning is becoming increasingly prevalent in educational settings around the world as it provides more flexibility and access to classes for students and educators alike. While online classrooms are proving to be popular, there is a significant gap in the personalization and humanization of these courses. The Handbook of Research on Humanizing the Distance Learning Experience features empirical research on promoting the personalization of online learning courses through presence, emotionality, and interactivity within digital classrooms. Highlighting best practices and evaluating student perceptions on distance learning, this handbook will appeal to researchers, educators, course designers, professionals, and administrators.

In Asia, Distance Education (DE) is providing major solutions in the areas of education and training. DE methods that are standard in other parts of the world, however, have yet to demonstrate their full potential in Asia. Covering nine DE projects by 39 researchers from 13 countries, this book analyses the DE scenario in Asia, the successes, the failures and the reasons behind them. This book is a unique collation of the results of studies of educational technologies across an extensive network of Asian countries. It also provides a useful snapshot of DE's development in Asia in the early years of the 21st century. The surveys reported cover different DE contexts, methodologies, and levels of generalisability, and add to the existing scholarship on the subject by providing previously unavailable, firm evidence about DE's prospects in Asia. The contributors give important recommendations that can be translated into practical and political actions to help solve critical socio-economic problems of Asia as well

as other parts of the world.

The Reconstruction of Religious Thought in Islam (1930) is Muhammad Iqbal's major philosophic work: a series of profound reflections on the perennial conflict among science, religion, and philosophy, culminating in new visions of the unity of human knowledge, of the human spirit, and of God. Iqbal's thought contributed significantly to the establishment of Pakistan, to the religious and political ideals of the Iranian Revolution, and to the survival of Muslim identity in parts of the former USSR. It now serves as new bridge between East and West and between Islam and the other Religions of the Book. With a new Introduction by Javed Majeed, this edition of *The Reconstruction* opens the teachings of Iqbal to the modern, Western reader. It will be essential reading for all those interested in Islamic intellectual history, the renewal of Islam in the modern world, and political theory of Islam's relationship to the West.
