 "The Emergence of China: Opportunities and Challenges for Latin America and the Caribbean provides a comprehensive overview of China's economic policy and performance over recent decades and contrasts them with the Latin American experience. What are the underlying factors behind China's competitive edge? What are the strategic implications of China's rise for growth and development in Latin America? These questions open new avenues for thinking about revitalizing development strategies in Latin America in the face of China's successful development and reduction of poverty. This insightful report is a must-read for analysts, policymakers, and development practitioners, not only in Latin America and the Caribbean, but wherever China's presence is being felt."--Jacket.

 Honduras: A Territorial Approach to Development presents an innovative approach to address the development challenges of the country. The document first describes the main challenges to inclusive development in Honduras identified by IDB technical staff, which results in a proposal for a Spatial Economic Strategy (SES) developed with the company GeoAdaptive LLC. The Strategy extends across and connects the entire territory, taking advantage of sectoral synergies for enhancing productivity and breaking the established inequality and poverty cycles. This innovative approach seeks to break away from the traditional sector-approach and proposes comprehensive interventions that would enable key stakeholders to maximize synergies and the impact of their actions.

 En África los diamantes han alimentado guerras que han acabado con cuatro millones de vidas. Piedras ensangrentadas relata por qué los diamantes se convirtieron en un bien tan peligroso. Describe el gran cártel del diamante y la peligrosa cadena que sale de África, un continente roto por la guerra, hasta llegar a los brillantes escaparates de París, Londres y Nueva York. Detalla la campaña que obligó a una industria y a más de 50 gobiernos a crear un mecanismo de control global y presenta un pronóstico aleccionador sobre el futuro del diamante. «Smillie miente más que habla», dijo el antiguo Presidente de Liberia Charles Taylor durante el juicio por crímenes de guerra en La Haya en el que Ian Smillie fue llamado como primer testigo. Smillie ha vivido y trabajado en África y Asia como maestro, asesor, investigador y escritor. Ha dedicado los últimos diez años de su carrera a la sangre derramada por culpa de los diamantes, las guerras que han alimentado y el programa diseñado para acabar con ellos. Smillie recibió la Orden de Canadá en 2003.

 Esta publicación presenta las actas de la Reunión Técnica regional sobre políticas y programas de semillas en América Latina y el Caribe que se llevó a cabo en Mérida, Yucatán, México, del 20 al 24 de marzo de 2000. La Reunión fue organizada por el Centro de Investigación Científica de Yucatán con el apoyo técnico y financiero del Servicio de Semillas y Recursos Fitogenéticos de la

FAO. De acuerdo con el Plan de Acción Mundial sobre los Recursos Fitogenéticos adoptado en Leipzig, Alemania, la Declaración de Roma sobre la Seguridad Alimentaria Mundial y el Plan de Acción de la Cumbre Mundial sobre la Alimentación, la Reunión reconoció que el principal desafío que enfrentan los países de América Latina y el Caribe es el uso sostenible de la enorme riqueza de recursos fitogenéticos de la región. Las deliberaciones se centraron en la identificación de mecanismos apropiados para asegurar el mantenimiento, la producción y la justa distribución de semillas de buena calidad de una vasta gama de variedades de plantas, contribuyendo así a la seguridad alimentaria nacional y regional. La Reunión propuso establecer un Foro Consultivo de Semillas para América Latina y el Caribe destinado a facilitar el manejo, la utilización y la distribución ordenada de informaciones y materiales relacionados con los recursos fitogenéticos para el desarrollo agrícola sostenible. Este Foro facilitará la colaboración científica y técnica entre los países y las regiones en materia de producción y abastecimiento de semillas, y promoverá la evaluación, conservación y utilización de los recursos fitogenéticos en la región.
Opportunities and Challenges for Latin America and the Caribbean John Wiley & Sons
Business Model Generation is a handbook for visionaries, game changers, and challengers striving to defy outmoded business models and design tomorrow's enterprises. If your organization needs to adapt to harsh new realities, but you don't yet have a strategy that will get you out in front of your competitors, you need *Business Model Generation*. Co-created by 470 "Business Model Canvas" practitioners from 45 countries, the book features a beautiful, highly visual, 4-color design that takes powerful strategic ideas and tools, and makes them easy to implement in your organization. It explains the most common Business Model patterns, based on concepts from leading business thinkers, and helps you reinterpret them for your own context. You will learn how to systematically understand, design, and implement a game-changing business model--or analyze and renovate an old one. Along the way, you'll understand at a much deeper level your customers, distribution channels, partners, revenue streams, costs, and your core value proposition. *Business Model Generation* features practical innovation techniques used today by leading consultants and companies worldwide, including 3M, Ericsson, Capgemini, Deloitte, and others. Designed for doers, it is for those ready to abandon outmoded thinking and embrace new models of value creation: for executives, consultants, entrepreneurs, and leaders of all organizations. If you're ready to change the rules, you belong to "the business model generation!"

 En 2019 el desempeño del comercio mundial de bienes sería el peor desde la crisis financiera. En esta edición de *Perspectivas del Comercio Internacional de América Latina y el Caribe* se analiza dicho fenómeno, así como las crecientes tensiones comerciales y las repercusiones en el comercio regional. La fuerte desaceleración del comercio mundial responde tanto a la acumulación de barreras comerciales desde 2018 como a otros factores de más larga data. Entre estos se destacan la menor demanda mundial, la creciente sustitución de importaciones por producción nacional en algunas economías, la menor proporción de la producción china que se destina a la exportación, el retroceso de las cadenas globales de valor y la irrupción de nuevas tecnologías que causan un impacto en la naturaleza misma del comercio. En el capítulo II se analiza la forma en que el comercio internacional puede hacer un mayor aporte a la sostenibilidad ambiental. Los vínculos entre comercio y medioambiente se han hecho más visibles desde los años noventa, como muestra el aumento de las controversias comerciales vinculadas con aspectos ambientales y la creciente incorporación de capítulos ambientales en los acuerdos comerciales. Por último, en el capítulo III se examina la situación de la infraestructura y la logística, aspectos clave para el comercio internacional y la producción. Se concluye destacando la necesidad de reexaminar las políticas públicas en materia de concesiones de infraestructura económica y el rol central de la acción regulatoria del Estado, especialmente en el ámbito de la competencia.

'Beyond Reforms' argues that economic growth in developing countries is intrinsically tied to the dynamics of production structures, to the specific policies and institutions created to support it, and the creation of linkages among domestic firms and sectors. Avoiding macroeconomic instability is also essential. However, macroeconomic stability is not a sufficient condition for growth. The broader institutional context and the adequate provision of education and infrastructure are essential 'framework conditions,' but generally do not play a direct role in bringing about changes in the momentum of economic growth.

AVARICIA, CORRUPCIÓN Y GUERRA EN EL COMERCIO INTERNACIONAL DE DIAMANTES

OECD Publishing

Political Economy and International Economics is the fifth volume of collected essays by the noted economist Jagdish Bhagwati. Following Essays in International Economic Theory (edited by Robert Feenstra) and Essays in Development Economics (edited by Gene Grossman), it reflects Bhagwati's wide range of interests and his rare ability to combine economic theory and political analysis. Many of Bhagwati's writings provide fresh insights into old problems, from the theory of commercial policy, to foreign investment and labor migration; others open up new areas such as services to analysis.

Recent work on the theory of political economy, including DUP (directly unproductive profit-seeking) activities and quid pro quo direct investment, breaks new ground. Also included are a number of previously inaccessible lectures covering such important issues as poverty and public policy. Cutting across several fields of economics, including public finance and development, these provide masterly syntheses and overviews of broader issues. Jagdish Bhagwati is Arthur Lehman Professor of Economics and Professor of Economics at Columbia University. He is the founding editor of the new journal Economics and Politics. Douglas A. Irwin is an economist with the Board of Governors of the Federal Reserve System.

Complex systems analysis has become a fascinating topic in modern research on non-linear dynamics, not only in the physical sciences but also in the life sciences and the social sciences. After the era of bifurcation theory, chaos theory, syngetics, resilience analysis, network dynamics and evolutionary thinking, currently we observe an increasing interest in critical transitions of dynamic real-world systems in many disciplines, such as demography, biology, psychology, economics, earth sciences, geology, seismology, medical sciences, and so on. The relevance of this approach is clearly reflected in such phenomena as traffic congestion, financial crisis, ethnic conflicts, eco-system breakdown, health failures, etc. This has prompted a world-wide interest in complex systems. Geographical space is one of the playgrounds for complex dynamics, as is witnessed by population movements, transport flows, retail developments, urban expansion, lowland flooding and so forth. All such dynamic phenomena have one feature in common: the low predictability of uncertain interrelated events occurring at different interconnected spatio-temporal scale levels and often originating from different disciplinary backgrounds. The study of the associated non-linear (fast and slow) dynamic transition paths calls for a joint research effort of scientists from different disciplines in order to understand the nature, the roots and the consequences of unexpected or unpredictable changes in complex spatial systems.
