MORROW DUDLEY

Research in Finance Springer

This book deals with the application of wavelet and spectral methods for the analysis of nonlinear and dynamic processes in economics and finance. It reflects some of the latest developments in the area of wavelet methods applied to economics and finance. The topics include business cycle analysis, asset prices, financial econometrics, and forecasting. An introductory paper by James Ramsey, providing a personal retrospective of a decade's research on wavelet analysis, offers an excellent overview over the field.

Research Methods for Accounting and Finance GRIN Verlag

This volume focuses on the latest findings concerning financial environment research and the effects on business. Major topics addressed range from finance-driven globalization, contagion risk transmission, financial sustainability, and bank efficiency, to oil price shocks and spot prices research. Further topics include family business, business valuation, public sector development and business organization in the globalized environment. This book features selected peer-reviewed articles from the 16th EBES conference in Istanbul, where over 270 papers were presented by 478 researchers from 56 countries.

Accountants' Handbook, Financial Accounting and General Topics IGI Global

This special issue offers an interesting overview of the status quo of (German) research in real estate finance. It might also contribute to real estate research moving from a research niche closer to the center of academic interest.

Financial Services and General Government Appropriations for 2016: Office of Management and Budget; General Services Administration; The Supreme Court; The judiciary budget Springer
Research Methods for Accounting and Finance is an essential text for accounting and finance students undertaking research for the first time. It demystifies the research process by providing the novice researcher with a must-have guide through all of the

stages of the research process, from identifying a research topic to the finished project.

Topics in Public Economics Createspace Independent Publishing Platform

Successful investment strategies are specific implementations of general theories. An investment strategy that lacks a theoretical justification is likely to be false. Hence, an asset manager should concentrate her efforts on developing a theory rather than on backtesting potential trading rules. The purpose of this Element is to introduce machine learning (ML) tools that can help asset managers discover economic and financial theories. ML is not a black box, and it does not necessarily overfit. ML tools complement rather than replace the classical statistical methods. Some of ML's strengths include (1) a focus on out-of-sample predictability over variance adjudication; (2) the use of computational methods to avoid relying on (potentially unrealistic) assumptions; (3) the ability to "learn" complex specifications, including nonlinear, hierarchical, and noncontinuous interaction effects in a high-dimensional space; and (4) the ability to disentangle the variable search from the specification search, robust to multicollinearity and other substitution effects.

Energy Investments World Scientific

The aim of this e-book is to highlight the fact that: (i) qualitative research is now thriving in the academic finance community; and (ii) that qualitative methods are appropriate and insightful with regard to a range of key research questions and in a range of global locations. Overall, it is hoped that this collection of articles will continue the current movement in the direction of greater use of qualitative techniques in finance research, not as part of a trend towards the abandonment of the conventional quantitative techniques, but rather as a complement to them, as attempts continue to explain and predict individual and institutional behaviour in modern capital markets.

Financial Econometrics Springer Nature

Think big, buy small. Are you looking for an alternative to a career path at a big firm? Does founding your own start-up seem too risky? There is a radical third path open to you: You can buy a

small business and run it as CEO. Purchasing a small company offers significant financial rewards—as well as personal and professional fulfillment. Leading a firm means you can be your own boss, put your executive skills to work, fashion a company environment that meets your own needs, and profit directly from your success. But finding the right business to buy and closing the deal isn't always easy. In the HBR Guide to Buying a Small Business, Harvard Business School professors Richard Ruback and Royce Yudkoff help you: Determine if this path is right for you Raise capital for your acquisition Find and evaluate the right prospects Avoid the pitfalls that could derail your search Understand why a "dull" business might be the best investment Negotiate a potential deal with the seller Avoid deals that fall through at the last minute

Contemporary Research in Accounting and Finance Springer

This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

Contemporary Topics in Finance Springer

The Economic and Financial Impacts of the COVID-19 Crisis Around the World: Expect the Unexpected provides an informed, research-based in-depth understanding of the COVID-19 crisis, its impacts on households, nonfinancial firms, banks, and financial market participants, and the effectiveness of the reactions of governments and policymakers in the United States and around the world. It provides reflections and perspectives on the social costs and benefits of various policies undertaken and a toolkit of preventive measures to deal with crises beyond the COVID-19 crisis. Authors Allen N. Berger, Mustafa U. Karakaplan, and Raluca A. Roman apply their expertise to the research and data on the

COVID-19 economic crisis as well as draw on their own rich research experience. They take a holistic approach that compares and contrasts this crisis with other economic and financial crises and assesses economic and financial behavior and government policies in the booms before crises and the aftermaths following them, as well as the crises themselves. They do all this with a keen eye on “Expecting the Unexpected future crises, and policies that might anticipate them and provide better outcomes for society. Serves as a compendium of available research and data on COVID-19, policies in response to the pandemic, and its effects on the real economy, banking sector, and financial markets Contextualizes the COVID-19 economic crisis by comparing it to two other global crises from the past: the Crash of 1929 and the Global Financial Crisis of 2007–2009 Helps illustrate how crises that originate in financial markets and in the banking sector differ from each other as well as from the COVID-19 crisis that harmed the real economy first Compares the policies and outcomes of nations to the COVID-19 pandemic and assesses their costs and benefits, with potential implications for prospective future crises

HBR Guide to Buying a Small Business Princeton University Press

This book provides an essential toolkit for all students wishing to know more about the modelling and analysis of financial data. Applications of econometric techniques are becoming increasingly common in the world of finance and this second edition of an established text covers the following key themes:- unit roots, cointegration and other develop

Survey Research in Finance Emerald Group Publishing

This open access book considers the development of the sharing and collaborative economy with a European focus, mapping across economic sectors, and country-specific case studies. It looks at the roles the sharing economy plays in sharing and redistribution of goods and services across the population in order to maximise their functionality, monetary exchange, and other aspects important to societies. It also looks at the place of the sharing economy among various policies and how the contexts of public policies, legislation, digital platforms, and other infrastructure interrelate with the development and function of the sharing economy. The book will help in understanding the future (sharing) economy models as well as to contribute in solving questions of better access to resources and sustainable

innovation in the context of degrowth and growing inequalities within and between societies. It will also provide a useful source for solutions to the big challenges of our times such as climate change, the loss of biodiversity, and recently the coronavirus disease pandemic (COVID-19). This book will be of interest to academics and students in economics and business, organisational studies, sociology, media and communication and computer science.

Qualitative Research in Finance Cambridge University Press

This book provides a comprehensive overview of the emerging field of cultural finance. It summarizes research results of cultural differences in financial decision making and financial markets. Many of the results have been published in leading academic journals over the last ten years but some are presented here for the first time. The book is based on an international survey on risk and time preferences — the INTRA study, conducted in 53 countries worldwide. Applications to financial markets include the equity premium puzzle, the value premium, dividend payout policies and asset allocations.

Advances in Finance & Applied Economics Elsevier

This e-book presents six articles that employ survey-based methods in examining issues of importance in finance and financial decision-making. The topics range from dividend policy to derivatives usage to methodological issues in employing the survey method and the views of the profession regarding the survey method itself. In keeping with the international focus of the journal, the data used in these studies come from countries around the globe (the US, Brazil, Canada, Germany, Denmark, and Australia). The targets of these surveys include journal editors, chief financial officers and other practicing financial managers, and mutual fund managers. While the articles selected for this e-book all involve the use of surveys, a variety of techniques are employed to generate empirical results on a wide range of research topics.

The Sharing Economy in Europe Physica

Developing personal financial skills and improving financial literacy are fundamental aspects for managing money and propelling a bright financial future. Considering life events and risks that unexpectedly present themselves, especially in the light of recent global events, there is often an uncertainty associated with financial standings in unsettled times. It is

important to have personal finance management to prepare for times of crisis, and personal finance is something to be thought about in everyday life. The incorporation of financial literacy for individuals is essential for a decision-making process that could affect their financial future. Having a keen understanding of beneficial and detrimental financial decisions, a plan for personal finances, and personalized goals are baselines for money management that will create stability and prosperity. In a world that is rapidly digitalized, there are new tools and technologies that have entered the sphere of finance as well that should be integrated into the conversation. The latest methods and models for improving financial literacy along with critical information on budgeting, saving, and managing spending are essential topics in today’s world. The Research Anthology on Personal Finance and Improving Financial Literacy provides readers with the latest research and developments in how to improve, understand, and utilize personal finance methodologies or services and obtain critical financial literacy. The chapters within this essential reference work will cover personal finance technologies, banking, investing, budgeting, saving, and the best practices and techniques for optimal money management. This book is ideally designed for business managers, financial consultants, entrepreneurs, auditors, economists, accountants, academicians, researchers, and students seeking current research on modern advancements and recent findings in personal finance.

Research in Banking and Finance John Wiley & Sons

Intends to raise the level of interest in the specific problems of accounting in emerging economies; and increase awareness of real issues, so that accounting in these countries will not just be seen as a matter of copying what is done in the industrialized countries.

Handbook of Research on Energy and Environmental Finance 4.0 Cambridge University Press

The book is a collection of chapters discussing the Sustainable Development Goals in the broader context of Islamic finance along with mapping the SDGs with Maqasid Al-Shariah. It provides a framework for both Muslim and non-Muslim countries to develop a sustainable economy which encompasses not only the concept of the welfare state but also supports development-related activities, ensures financial inclusion through equal distribution of wealth and alleviation of poverty, and protects the overall

environmental and ecological system. More specifically, this book explores various aspects of Islamic finance in relation to parameters of SDGs; restructuring of Islamic finance and connecting its dots in the light of SDGs; Islamic perspective on ESG and ecological quality; interest-free tools and modernization of Islamic financial institutions for sustainable development and economic stability; and the role of Islamic finance in infrastructure-related development activities. Consistent with the view that SDGs are embedded within the theme of Islamic finance, this book is specifically designed to meet the needs of key regulatory institutions, academic scholars, and industry practitioners both in the field of Islamic finance and sustainable finance.

[A Study on Capital Adequacy and Its Impact on the Banks' Performance. A Panel Data Analysis](#) Routledge

Arguably the strongest addition to numerical finance of the past decade, Algorithmic Adjoint Differentiation (AAD) is the technology implemented in modern financial software to produce thousands of accurate risk sensitivities, within seconds, on light hardware. AAD recently became a centerpiece of modern financial systems and a key skill for all quantitative analysts, developers, risk professionals or anyone involved with derivatives. It is increasingly taught in Masters and PhD programs in finance. Danske Bank's wide scale implementation of AAD in its production and regulatory systems won the In-House System of the Year

2015 Risk award. The Modern Computational Finance books, written by three of the very people who designed Danske Bank's systems, offer a unique insight into the modern implementation of financial models. The volumes combine financial modelling, mathematics and programming to resolve real life financial problems and produce effective derivatives software. This volume is a complete, self-contained learning reference for AAD, and its application in finance. AAD is explained in deep detail throughout chapters that gently lead readers from the theoretical foundations to the most delicate areas of an efficient implementation, such as memory management, parallel implementation and acceleration with expression templates. The book comes with professional source code in C++, including an efficient, up to date implementation of AAD and a generic parallel simulation library. Modern C++, high performance parallel programming and interfacing C++ with Excel are also covered. The book builds the code step-by-step, while the code illustrates the concepts and notions developed in the book.

[International Macroeconomics](#) Springer Nature

This text is a reflection of research carried out by European scholars into financial economics. Topics discussed include asset pricing in the context of perfect markets, take-over bids, and the interplay between banks and financial markets.

[Environmental and Energy Policy and the Economy](#) Springer

The book compiles a comprehensive set of case of studies in business and accounting from the MENA region. These case

studies consist of practical research studies with strong theoretical foundations. Hence, the book is a guide to the industries in various sectors regarding the best practices for efficient business and accounting management. In addition, the book will serve as an important teaching reference for business and accounting courses in the MENA region.

[Contemporary Topics in Finance](#) John Wiley & Sons

Energy and environmental finance (EEF) is an emerging global phenomenon. During the last few decades, many countries started monitoring EEF practices. Major components of these practices include costs, fraud, scandals, and more. Among several problems, the most prevalent is the lack of awareness about the issues of EEF among various stakeholders. The Handbook of Research on Energy and Environmental Finance 4.0 is an international reference that provides understanding and lessons learned in all aspects of EEF in individual, organizational, and societal experiences. This book examines research in the shape of experience, implementation, and application. Covering topics such as clean power, energy poverty, and environmental degradation, this book is a dynamic resource for academicians, researchers, professionals who work within the domains of EEF, EEF regulators, scholars of EEF, managers involved in EEF organizations, law practitioners involved in EEF regulations, auditors involved in audit and control systems of EEF, university professors, and students pursuing studies and research in EEF.
