The New York Times Bestseller Trina is eighteen and suffers from bi-polar disorder, making her paranoid, wild, and violent. Frightened by her own child, Keri searches for help, quickly learning that the mental health community can only offer her a seventy-two hour hold. After these three days Trina is off on her own again. Fed up with the bureaucracy and determined to save her daughter by any means

necessary, Keri signs on for an illegal intervention known as The Program, a group of radicals who eschew the psychiatric system and model themselves after the Underground Railroad. In the upheaval that follows, she is forced to confront a past that refuses to stay buried, even as she battles to secure a future for her child. This book highlights the medical importance of and increasing global interest in herbal medicines, herbal health products, herbal pharmaceuticals, nutraceuticals, food supplements, herbal cosmetics, etc. It also addresses various issues that are hampering the advancement of Indian herbal medicine around

the globe; these include quality concerns and quality control, pharmacovigilance, scientific investigation and validation, IPR and biopiracy, and the challenge that various indigenous systems of medicine are at risk of being lost. The book also explores the role of traditional medicine in providing new functional leads and modern approaches that can offer elegant strategies for facilitating the drug discovery process. The book also provides in-

depth information on various traditional medicinal systems in India and discusses their medical importance. India has a very long history of safely using many herbal drugs. Folk medicine is also a key source of medical knowledge and plays a vital role in maintaining health in rural and remote areas. Despite its importance, this form of medicine largely remains under-investigated. Out of all the traditional medicinal systems used worldwide, Indian traditional

medicine holds a unique position, as it has continued to deliver healthcare throughout the Asian subcontinent since ancient times. In addition, traditional medicine has been used to derive advanced techniques and investigate many modern drugs. Given the scope of its coverage, the book offers a valuable resource for scientists and researchers exploring traditional and herbal medicine, as well as graduate students in courses on traditional medicine, herbal medicine

and pharmacy. Fraternal Capital Penguin What makes a film a teen film? And why, when it represents such powerful and enduring ideas about youth and adolescence, is teen film usually viewed as culturally insignificant? Teen film is usually discussed as a representation of the changing American teenager, highlighting the institutions of high school and the nuclear family, and experiments in sexual development and identity formation. But not every film featuring these

components is a teen film and not every teen film is American. Arguing that teen film is always a story about becoming a citizen and a subject, Teen Film presents a new history of the genre, surveys the existing body of scholarship, and introduces key critical tools for discussing teen film. Surveying a wide range of films including *The Wild One*, *Heathers*, *Akira* and *Donnie Darko*, the book's central focus is on what kind of adolescence teen film represents, and on teen

film's capacity to produce new and influential images of adolescence. *The Cat Naps* My Key to Immortality Tuning Your Mind into the Life of Universal Love Made in India examines seemingly disparate and high profile events in postcolonial India that captured national and transnational/diasporic interest since the 1990s: The emergence of the Indian homosexual, the new trans/national heterosexual woman, lesbian suicides, marriage and kinship contracts in

small towns around India and the simultaneous evolution of the modern homophobia and lesbian NGOs. These events demonstrate the material, political, and cultural contexts within which postcolonial subjects negotiate their lived experiences within moments of decolonization and recolonization. *Goddesses in Ancient India* Sterling Publishers Pvt. Ltd Astrology is not A complex science as it is often made out to be and,

in the hands of the world-famous 'human computer', Shakuntala Devi, it becomes yet simpler and easier to understand and practise. The present book discusses zodiacs, planets, asterisms, the rising signs, Bhavas, Yogas, Dasas and their effects and transits. It enables the reader to cast a horoscope, and also read one. There are tables of correction for various cities and for sidereal time, Nakshatra divisions and Vimshottari Dasa, Navamsas, etc. It is a

complete book that leaves nothing to become an amateur astrologer. *The Bṛihajjâtakam of Varâha Mihira* K G Saur Verlag Gmbh & Company James A. Shapiro proposes an important new paradigm for understanding biological evolution, the core organizing principle of biology. Shapiro introduces crucial new molecular evidence that tests the conventional scientific view of evolution based on the neo-Darwinian synthesis, shows why this view is

inadequate to today's evidence, and presents a compelling alternative view of the evolutionary process that reflects the shift in life sciences towards a more information- and systems-based approach in Evolution: A View from the 21st Century. Shapiro integrates advances in symbiogenesis, epigenetics, and saltationism into a unified approach that views evolutionary change as an active cell process, regulated epigenetically and capable of making

rapid large changes by horizontal DNA transfer, inter-specific hybridization, whole genome doubling, symbiogenesis, or massive genome restructuring. Evolution marshals extensive evidence in support of a fundamental reinterpretation of evolutionary processes, including more than 1,100 references to the scientific literature. Shapiro's work will generate extensive discussion throughout the biological community, and

may significantly change your own thinking about how life has evolved. It also has major implications for evolutionary computation, information science, and the growing synthesis of the physical and biological sciences.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily

rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

"This book presents the ancient Hindu astrology in its occult and esoteric aspects. Traditional practitioners often failed to defend the veracity of the subject and dispel the scepticism of modern

intellectuals. The ancient revelations have been restated here to meet contemporary requirements. The ancient seers presented Vedic Astrology under various assumptions and in allegorical and symbolic languages. They assumed polydimensional extension of human consciousness which was closely related with planetary impulses. Apart from the general approach to this ancient science, the study presents in depth the astrological description of

the nature of man. It also provides deeper implications of various planetary combinations. Advanced practitioners as well as general readers will find the book informative, illuminating and highly rewarding.

Anthropology is by definition about "others," but in this volume the phrase refers not to members of observed cultures, but to

"significant others"—spouses, lovers, and others with whom anthropologists have deep relationships that are both personal and professional. The essays in this volume look at the roles of these spouses and partners of anthropologists over the late nineteenth and early twentieth centuries, especially their work as they accompanied the anthropologists in the field. Other relationships discussed include those between anthropologists and informants, mentors

and students, cohorts and partners, and parents and children. The book closes with a look at gender roles in the field, demonstrated by the "marriage" in the late nineteenth century of the male Anthropological Society of Washington to the Women's Anthropological Society of America. Revealing relationships that were simultaneously deeply personal and professionally important, these essays bring a new depth of insight to the history of anthropology as

a social science and human endeavor. Lal Kitab Bloomsbury Publishing After the release of Anita Rau Badami's critically acclaimed first novel, *Tamarind Mem*, it was evident a promising new talent had joined the Canadian literary community. Her dazzling literary follow-up is *The Hero's Walk*, a novel teeming with the author's trademark tumble of the haphazard beauty, wreckage and folly of ordinary lives. Set in the dusty seaside town of

Toturpuram on the Bay of Bengal, *The Hero's Walk* traces the terrain of family and forgiveness through the lives of an exuberant cast of characters bewildered by the rapid pace of change in today's India. Each member of the Rao family pits his or her chance at personal fulfillment against the conventions of a crumbling caste and class system. Anita Rau Badami explains that "*The Hero's Walk* is a novel about so many things: loss, disappointment, choices and the

importance of coming to terms with yourself and the circumstances of your life without losing the dignity embedded in all of

us. At one level it is about heroism - not the hero of the classic epic, those enormous god-sized heroes - but my fascination with the day-

to-day heroes and the heroism that's needed to survive all the unexpected disasters and pitfalls of life."
