*Bilingual Children's Dictionary (English-Indonesian)* Cornell University Press

This compilation of translations of modern Indonesian literature originated as a series of class exercises performed by some of my students at Cornell University as a part of the advanced Indonesian language class during the years 1952-1955. The selections have now been compiled primarily for use in a course on Southeast Asian Literature in Translation, in an attempt to overcome, to some extent, the lack of available material. These are presented herewith in the hope that they may also be of interest to others concerned with, or interested in, comparative or Far Eastern literature. In addition to the selections

translated by these students, several poems which Messrs. Burton Raffel and Nurdin Salam kindly sent me from Makassar have been included together with two translations by Professor Harry J. Benda of the University of Rochester. Indonesian literature since 1917 has indeed been a terra incognita for several reasons, two of the most obvious being the inaccessibility of the material and the language barrier. Both of these are very slowly but gradually being broken down, as a glance at James S. Holmes' *Angkatan Muda, A Checklist of Writings in Western Language Translations in Indonesia* 5, pp. 462-72, will reveal. It is my hope that this anthology will assist in dispelling some of the ignorance which now inevitably prevails concerning modern Indonesian literature. With the appearance in June of the Atlantic supplement, *Perspective of Indonesia* further opportunity will be given Americans and others to become acquainted with a sample of the literature of this area. In preparing this anthology I have often been reminded of a story, probably apocryphal, related about Einstein who, shortly after his arrival in this country, was asked to say a few words and replied that he would try to speak in English but if by chance he should slip back into German, Dr. Lindemann would 'traduce' him. I sincerely hope that none of the writers represented in this compilation has been traduced. I cannot conclude without acknowledging the assistance of Idrus Nazir Djajadiningrat and Hassan Shadily in carefully checking many of the translations and of Mrs. Tazu Warner, secretary in the Department of Far Eastern Studies at Cornell University, who performed an excellent job of typing the mats for reproduction and assisted in numerous other ways. Finally I wish to

express my appreciation to the Djakarta publishing houses, Balai Pustaka (Perpustakaan Perguruan Kementerian - P.P.&K.) and Pustaka Rakjat for granting permission to reproduce these translations of their publications. - John M. Echols

This is not your typical tourist phrasebook. It contains over 75 categories of terms in Basque and English with over 4,000 terms, phrases and sample sentences. Also included is a guide to the English and Basque alphabet and pronunciation. Basque is also known as euskara batua or simply batua. The English / Basque Phrasebook is designed to be used by the English speaker to learn the basics of the Basque language or for a Basque speaker to learn the basics of English. If you are intending to learn any new language, you'll need to get a phrasebook. The purpose of the phrasebook is to give you practice in real-life situations. Memorizing phrases ahead of time is the BEST way to use a phrasebook. Your grammar book, and sometimes even your course, does not give you the "Which room is mine?" kind of phrases. Yes, you will need to flip through the book to find responses or the next question on a different topic,

but that is only if you do not practice a bit ahead of time. You can't beat this book - for the price and the small, yet concise and relevant content. Learn how to tell time, order food, go through customs, as well as greetings and social conversations. Proper names may or may not be translated between languages. Generally country names are translated, but personal names, place names, and trade names (products) are not. Some words may provide an alternate translation or transliteration, others may not. This phrasebook is derived from our Words R Us system, a derivative of WordNet. English Wordnet, originally created by Princeton University is a lexical database for the English language. It groups words in English into sets of synonyms called synsets, provides brief definitions and usage examples, and records a series of relationships between these sets of synonyms. WordNet can be viewed as both a combination dictionary and thesaurus.

This book is the first work to address the question of what kinds of words get borrowed in a systematic and comparative perspective. It studies lexical borrowing behavior on the basis of a world-wide sample of 40 languages, both major languages and minor languages, and both languages with heavy borrowing and languages with little lexical influence from other languages. The book is the result of a five-year project bringing together a unique group of specialists of many different languages and areas. The introductory chapters provide a general up-to-date introduction to language contact at the word level, as well as a

presentation of the project's methodology. All the chapters are based on samples of 1000-2000 words, elicited by a uniform meaning list of 1460 meanings. The combined database, comprising over 70,000 words, is published online at the same time as the book is published. For each word, information about loanword status is given in the database, and the 40 case studies in the book describe the social

and historical contact situations in detail. The final chapter draws general conclusions about what kinds of words tend to get borrowed, what kinds of word meanings are particularly resistant to borrowing, and what kinds of social contact situations lead to what kinds of borrowing situations.
