NUREG-1556, Vol. 1, is the first program-specific guidance developed for the new process and will serve as a template for subsequent program-specific guidance. This document is intended for use by applicants, licensees, and NRC staff and will also be available to Agreement States. This document supersedes the guidance previously found in draft Regulatory Guide DG-0008, "Applications for the Use of Sealed Sources in Portable Gauging Devices," and in NMSs Policy and guidance Directive 2-07, "Standard Review Plan for Applications for Use of Sealed Sources in Portable Gauging Devices." This final report takes a more risk-informed, performance-based approach to licensing portable gauges, and reduces the information (amount and level of detail) needed to support an application to use these devices. It incorporates many suggests submitted during the comment period on draft NUREG-1556, Volume 1. When

published, this final report should be used in preparing portable gauge license applications. NRC staff will use this final report in reviewing these applications. The Code of Federal Regulations of the United States of America PediaPress XForms offer a more straightforward way to handle user input. This handbook presents a thorough explanation of the XForms technology and shows how to take advantage of its functionality.
