Butterworth-Heinemann  
 Now in its 8th edition, **MATHEMATICS FOR PLUMBERS AND PIPEFITTERS** delivers the essential math skills necessary in the plumbing and pipefitting professions. Starting with a thorough math review to ensure a solid foundation, the book progresses

into specific on-the-job applications, such as pipe length calculations, sheet metal work, and the builder's level. Broad-based subjects like physics, volume, pressures, and capacities round out your knowledge, while a new chapter on the business of plumbing invites you to consider an exciting entrepreneurial venture. Written by a Master Plumber and experienced vocational

educator, **MATHEMATICS FOR PLUMBERS AND PIPEFITTERS**, 8th Edition includes a multitude of real-world examples, reference tables, and formulas to help you build a rewarding career in the plumbing and pipefitting trade. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Book Features: Highlighting and tabbing locations for each required book, so you can quickly and easily reference your materials during the exam. Practice questions. Testing techniques that are an indispensable part of these

open-book exams. To be a Florida Certified Contractor, you must be able to pass the contractor's test, provide a proven record of financial stability, and present evidence of your experience for the category in which you wish to be licensed. A contractor must have at least four years of field experience in the category being considered, and one of those years has to be

acting in a supervisory role. This last requirement could be substituted for at least three years of undergraduate credit hours. When the contractor wishes to be certified as a building or general contractor, he/she must present evidence of experience in four of these categories:
