Instant Notes Physical Chemistry Garland Science

This book is designed to give students rapid and easy access to key ecological material to assist learning and revision. Key topics such as populations and interactions, ecosystems, population genetics, community patterns and many more are structured into manageable sections, each cross-referenced, to allow easy navigation through the information.

Sport and Exercise Psychology Taylor & Francis

Instant Notes in Human Physiology will be valuable to students in whatever context they are studying physiology. It explains fundamental concepts and the major physiological systems, showing how they are integrated, without overloading the reader with information.

Instant Notes in Analytical Chemistry Garland Science

Instant Notes in Medical Microbiology covers medical microbiology from the molecular biology of

infectious agents right through to the clinical management of the infected patient, including disease pathogenesis, diagnosis, and the use of antimicrobial therapy. The first section covers how micro-organisms spread and cause disease in humans, and how the human body responds to infection in general. The next three sections give a broad outline of the important properties of human infectious pathogens; split into viruses, bacteria, and eukaryotic organisms. The final sections cover laboratory diagnosis, antimicrobial chemotherapy, prevention strategies, and infection from the point of view of the patient.

BIOS Instant Notes in Cognitive Psychology Springer

Instant Notes in Cognitive Psychology is a concise summary of the key theoretical and empirical topics in cognitive psychology, providing easy access to the core information in the field. The book can serve as a core text, supplemented by readings in the original literature, as a reference guide for students and lecturers alike, or as an ideal revision guide prior to exams. Instant Notes in Cognitive Psychology is intended primarily for students taking a first course in the subject, but can also be used as an introduction to the field for undergraduates and graduates from other subject areas.

BIOS Instant Notes in Sport and Exercise Psychology Garland Science

Instant Notes in Sport and Exercise Physiology looks at the key topics in exercise physiology and examines how each of the physiological systems responds to acute and chronic exercise. As well as reviewing special topics such as nutrition, altitude, temperature, and ergogenic acids, it assesses the importance of exercise to health and quality of life and considers the importance of exercise to adults, children and the elderly.

Instant Notes Animal Biology Taylor & Francis

Instant Notes in Physiological Psychology provides a succinct overview of the key topics in physiological psychology, providing easy access to the core information in the field. Although physiological psychology is a required component of most degrees, the authors recognise that many students come from non-scientific backgrounds and may find the subject daunting. This book covers all of the essential topics in a format that is ideal for learning and rapid revision for students from all backgrounds. It can serve as a core text, supplemented by readings in the original literature, as a reference guide for students and lecturers alike, or as an ideal revision revision guide prior to exams.
